

621 Silver Dollar Aluminum Roof Coating

- Bright Silver Finish Helps Keep Roof Surface Cool
- Reflects and Protects Roof Surfaces
- Long Lasting Weatherproof Finish
- Fiber-Reinforced

Gardner® Silver Dollar® Aluminum Roof Coating is a quality reflective coating that will form a bright “Silver” protective finish. This coating will provide a layer of weatherproofing from the elements. The aluminized finish will reflect the sun's rays, which protects the underlying roof and lowers heat gain. Provides lasting protection.

PREPARATION: All surfaces should be dry, clean, smooth, and in good repair. Surface temperatures should be a minimum of 50 °F and rising, not to exceed 110 °F. Repair all leaks and problem areas with **Gardner® Leak Stopper Roof Patch** and **Universal Patching Fabric** before applying coating. When applying this product to a previously coated asphalt surface, make sure the surface is totally cured and ready to be topcoated. Test a small area first if you are unsure.

FOR BEST RESULTS: Use a power drill mixer with paddle to disperse. Do not thin. Continue to stir product during application process as the product may settle out. In cooler weather, store product in heated room (65 °F to 80 °F) at least 24 hours prior to coating.

APPLICATION: Mix coating and apply evenly by brush or medium nap roller to the surface. Spread in both horizontal and vertical directions, overlapping ends of strokes. Avoid excessive build-up or puddling. When brushing, avoid scraping into existing roof surface. All finish strokes should be made in the same direction. Do not apply if rain or heavy dew is expected within 24 hours.

COVERAGE RATES: Depending on the surface, this product will cover 55 to 70 sq/ft per gallon.

NOTE: This product is not recommended for use on wood, asphalt shingles or roofs with slopes less than 1% (or 1/8” per ft.). Standing water dulls aluminum, and may cause adhesion failure between the coating and substrate. On hot roofs, use caution if applying to sloped roofs, as coating may result in some running until fully dry. Avoid foot traffic for longest life. When buying multiple containers, it is recommended to match the batch codes on the lids to avoid shade variances.

CLEAN-UP: Clean tools with Mineral Spirits.

PRECAUTIONS: For exterior use only. Protective clothing and eyewear should be used during application of these products. When transporting this product, ensure that lid is tight and pail secure and upright. Do not allow pail to tumble as this may cause lid to loosen and leakage to occur. Do not transport on passenger seats or inside the passenger compartment of any vehicle. Store product in the cargo area of vehicle, and secure over protective cloths to prevent damage due to accidental spills. Do not use in drinking water or food systems. Seal container when not in use. Do not use on EPDM, TPO, PVC or other rubber/synthetic surfaces. If there is any question regarding compatibility, test a small section first. Protect from freezing.

WARRANTY AND DISCLAIMER: This product is believed to be of good quality and to be in accordance with the specifications set forth herein. If the product proves to be defective, for a period of three (3) years from the date of purchase, it shall be replaced at the cost of Gardner. Such replacement is and shall be the only liability of Gardner. Gardner is not liable for product failure where poor drainage and ponding water exist. Gardner shall not be responsible to the consumer or any person for labor costs of any kind or any other costs or damages associated with the product or its installation, application or reapplication or any damages resulting therefrom. This warranty is exclusive and there are no other warranties either expressed or implied, including warranties of fitness or merchantability. No other written or oral representation by any person, entity, dealer, installer or representative of Gardner shall have any force or effect. For additional warranty and disclaimer information, contact the Gardner corporate office at 1-800-237-1155.
