**2 (#) Lead Base Residential Flashings, Galvanized
Cone**

Plumber's Flashing / Application

Used on roof applications for its longevity, malleable base and ability to conform to the contour of tile.

Santa Rosa Lead Products uses a narrow cone allowing the lead to sit on the roof sooner (does not create an umbrella effect as with large round cones). Available in 2 base sizes.

All SP items are boxed 10/box to prevent damage to flashing from warehouse to job site.

Product Code	Description	Lead Base Size	Fit Pipe	Qty/Box
