

TrenShore

Aluminum Hydraulic Jacks

An owner's manuals and parts book comes with each unit for operation use and regular maintenance.

Hydraulic shores are very flexible for varied widths and depths, with a simplistic method to work safely in the trench. The units can be transported in a pick-up and one man can install them into the trench.

Our TrenShore line has a long history of trench safety, saving time, money, and lives since 1960. Many features and improvements have been made over the years to bring more value to the user.

Features & Benefits

Tested double the certified capacity before shipment

Heavy duty high strength aluminum vertical rails

Hydraulic Shoring Repair

When the trenching season slows down or comes to an end, save time and money by sending you shores in for full detailed inspections, repairs and recertification. Kundel Hydraulic Shoring Repair will keep your equipment ready to go. Call today and Kundel will send you free shipping boxes for easy shipment for your routine maintenance or repairs.

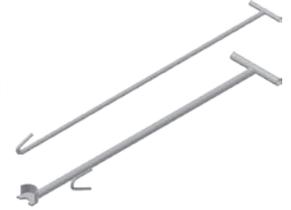

Manufactured by

Kundel

TrenShore Hydraulic fluid comes in both quarter or gallon bottles. Concentrated fluid is available as well. All Season is available as well for the really cold months. The steel bucket pumps are equipped with all steel fittings designed to withstand a higher pressures. Each pump has a builtin steel protective guard for the pumps gauges.

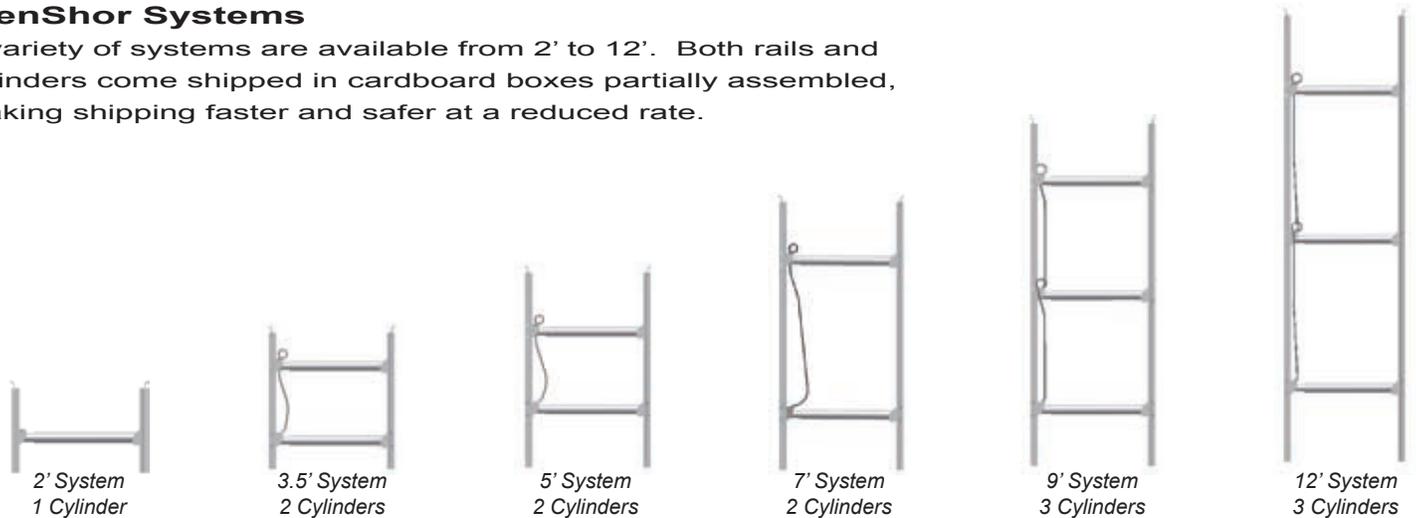

For easy installation of hydraulic jacks in trench, pick up one of our Release tools for installation and a Removal Hook to remove your jack when your job/repair is finished. The Release Tool and Removal Tool both come in lengths of 30", 50" or 100" to allow you to place and remove your jacks at a safe distance from the edge of the trench.

Another way to make your TrenShore system even more flexible is to get yourself a set of Over-Sleeves Extentions. The sleeves are available for all cylinder systems from 22" / 36" to 52" / 88", with an added protection 9" up to 72" in 9" increments.

TrenShor Systems

A variety of systems are available from 2' to 12'. Both rails and cylinders come shipped in cardboard boxes partially assembled, making shipping faster and safer at a reduced rate.

System	model	wgt.	depth / space	System	model	wgt.	depth / space	System	model	wgt.	depth / space
