

## Pollardwater ProScope

## FEATURES & BENEFITS

- Ideal for any hard to read water meter application whether it is under water or too deep or difficult to read normally
- Durable and compact design makes it ideal for everyday field use and a critical component to a meter reader's arsenal of tools
- Magnifier lens is a high quality Fresnel lens that offers superior optical properties over any other meter reading device in the industry (standard feature with model PP58505)
- Model PP58505 (36") includes (1) magnifier lens, (1) LED light w/batteries, retainer cap w/O-ring & wiper blade
- Models PP58501-PP58503 include (1) standard clear lens, (1) retainer cap w/O-ring & wiper blade
- Models PP58501-PP58503 available in (3) sizes: 24", 36" or 48"
