

<b>Aguasana Deluxe Drinking Filtration System AQ-4501</b>					
Model	Replacement	Operating pressure range	Rated capacity	Operating temp range	Rates flow
AQ-4501	AQ-4035	20-80 psi	500 gallons	40-90° F	0.4 gpm
Manufactured by: Aquasana, Inc. - 6310 Midway Road - Haltom City, Texas 76117 - 888.516.9752					

This filter system is designed and tested for use with genuine Aquasana parts including replacement filters and all hardware. Use of parts from other manufacturers may result in loss of contaminant reduction performance, system damage or failure. Use of parts from other manufacturers will also void your warranty.

## **Installation** Instructions

### AQ-4501 Premium Under Counter Water Filter

## Precautions and important information:

### Stop. Did you pick a location for the faucet mount?

- Determine the appropriate location for the faucet to be mounted
- The faucet may be mounted using an existing hole for a sprayer nozzle, or by drilling a 7/8" hole in the sink or countertop
- Note: we do not recommend drilling granite or porcelain sinks unless done by a professional. Be sure the location of the faucet allows the spout to extend slightly past the edge of the sink as all faucets have a 4" overhang

### "Pure Satisfaction"

All aquasana products offer a 90-day 100% money back guarantee. If for any reason you are not satisfied with your purchase, simply call us, or the dealer you purchased from, for a return merchandise authorization number and a full refund will be promptly issued upon return. Thank you for choosing aquasana!

### PLEASE NOTE:

For the first 72 hours this faucet will drip intermittently, until the filters become fully saturated. Once they are saturated you should anticipate a residual flow of water each time you use the filter, as the system is vented and designed to clear the line.

### IMPORTANT:

The aquasana AQ-4501 can only be used with a faucet supplied by Aquasana. Any other faucet may cause damage to the filter system and/or leakage.

**This unit can NOT be used in constant pressure applications, such as ice-makers or fountains.**

### PRECAUTIONS:

- Read all instructions carefully
- No constant hydrostatic pressure line to filter allowed
- For technical assistance support call: 888.516.9752

## Installation:

### 1. Unpack and unwrap contents.

- Open Relief Faucet
- Mounting Bracket
- Screws and Anchors
- 3/8" x 1/4" Brass "T"

### 2. Mount the faucet. (Figure A)

### 3. Mount the filter. (Figure B)

Note: make sure that the location of the filter unit allows the tubing from the faucet to connect to the base of the filter without kinking or side pressure; if the hose is not able to plug straight into the inlet without side pressure, it may drip.

### 4. Connect water supply. (Figure A)

Turn off your cold water supply valve and attach the "T" fitting to the cold water supply.

### 5. Once the filter and faucet are mounted and the "T" fitting is attached to the cold water supply line, proceed with the following steps:

- Connect the hoses. (Figure A)
- Turn the cold water supply line on; this will open the supply to the faucet.
- Check for leaks. If leaks are present, turn off the supply valve and check all connections.
- Turn handle clockwise and allow the water to run until all cloudiness and air bubbles are gone.
