

Model AQ-4035

Replacement Cartridge Instructions

1. Place the filter system on a flat surface and remove the threaded filter caps by turning in the direction of the arrows (Fig. A).
Note: if caps are too tight to loosen by hand, remove the hose by pressing and holding down the gray collet ring while pulling the hose out, then place an 17mm socket wrench over the hex-nut in the center of the cap. Turn wrench in direction of arrows to loosen (Fig. B).
2. Remove old filter cartridges and dispose of them in the trash. Reuse existing large O-rings as they have a 10-year lifecycle.
Note: the filter cartridges pose no environmental hazard and are biodegradable.

Don't Forget

- Note the date and replace your filter cartridges every 6 months.
- Your satisfaction is guaranteed. This Aquasana product comes with a 180-day warranty, and if for any reason you are not satisfied with your purchase, simply call us at 888.516.9752 for a full refund upon return.

This filter system is designed and tested for use with genuine Aquasana parts including replacement filters and all hardware. Use of parts from other manufacturers may result in loss of contaminant reduction performance, system damage or failure. Use of parts from other manufacturers will also void your warranty.

3. Install the new filter cartridges.
 - Insert the "A" cartridge with the nipple-end first.
 - Install the "B" cartridge by inserting the nipple into the "B" cap, ensuring o-ring is in place (Fig. C).
4. Tighten the threaded filter caps firmly in the opposite direction of the arrows shown on the caps.
 - The "A" cap will tighten by turning it to the left
 - The "B" cap will tighten by turning it to the right
5. Turn on the cold water and check for leaks with the filter still lying flat.
 - If leaks are noticed, repeat step 4
 - If no leaks are noticed, return the filter to the upright position and allow the water to run for 2-3 minutes until all cloudiness and discoloration have disappeared
6. Enjoy the benefits of drinking clean, healthy water!

This product is intended for use in municipally treated cold water supplies only and is not designed for use with water of unsafe or unknown bacteriological quality.
