

## Drinking Water replacement AQ-4035

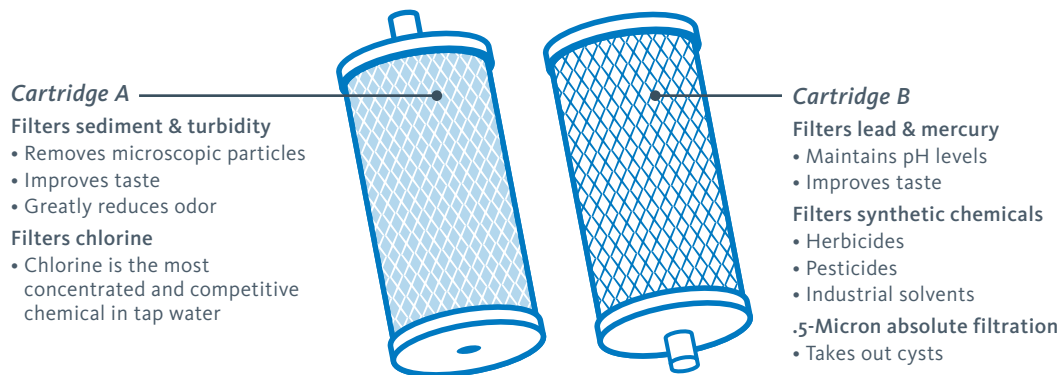

After devoting 18 months to redesigning and reformulating the company's filter cartridges, Aquasana has created its most powerful and best-performing filtration systems to-date. Unique in both design and functionality, the new Aquasana Claryum™ Filtration Technology features three distinct stages, including activated carbon, ion exchange and sub-micron filtration. Together, this unique combination forces water under pressure over more than two million square feet of surface area of contaminant-grabbing filtration material — the equivalent of almost 35 football fields or roughly seven blocks in New York City. In addition to reducing a comprehensive list of chemicals and contaminants, Claryum's™ patent-pending selective filtration technology reduces odor and improves the taste of tap water while also preserving its healthiest minerals such as calcium, potassium and magnesium for optimum hydration — which are vital for growth, development and overall health and wellness.

Key features of the Aquasana Claryum™ technology include

- NSF certified to standards 42 and 53
- Superior contaminant reduction from the unique triple-process filter technology
- Great taste from the healthy minerals that stay in your water
- Long lasting filters that provide 500 gallons or six months of crisp, clear, healthy water
- All at the same great value — with Aquasana filtered water costing as little as 10¢ a gallon

### What's inside

## Pure Satisfaction

All Aquasana products offer a 90-day 100% satisfaction guarantee. (This system includes a one-year warranty, which covers defects in materials and workmanship.) If for any reason you are not satisfied with your purchase, contact the dealer you purchased from for a full refund (upon return of the product.)

This filter system is designed and tested for use with genuine Aquasana parts, including replacement filters and all hardware. Use of parts from other manufacturers may result in loss of contaminant reduction performance, system damage or failure. Use of parts from other manufacturers will also void your warranty. Contact your Ferguson dealer for all replacement parts.

## Specifications

Model: AQ-4035  
Rated service flow: .4 gpm  
Max working pressure: 20-80 psi  
Max operating temperature: 40-90° F  
Max capacity: 500 gal

The AQ-4035 is designed specifically to work within the AQ-4000FP, and the AQ-4501 series water filters, and are the only replacement filters guaranteed to work in our filters. Using filters not designed for our systems can result in leaks, cracks, flooding, water damage, and a severe loss of filtration performance.

The AQ-4035 is the only replacement filter certified by NSF for use in the AQ-4000FP, and the AQ-4501 series water filters. Not using the AQ-4035 to replace your worn out filters means you're not getting optimum filtration, and may be vulnerable to the harmful effects of higher levels of water contamination.
