

# REPAIR ADAPTER EXTENSION

## **SPECIFICATION:**

Sioux Chief 972-3RA repair adapter extension shall be used when necessary in tub spout replacement or repair work. Repair adapter extension shall be preformed, one piece, Type M,  $\frac{1}{2}$ " CTS hard copper which conforms to ASTM B 88-93. Repair Adapter Extension shall have one  $\frac{1}{2}$ " male sweat connection end and one reduced male end. Repair Adapter Extension is designed to be used with Sioux Chief Smart Spout tub spout product line to extend length of  $\frac{1}{2}$ " CTS copper stub out on repair projects when copper penetrating through wall is less than 2-5/8" long. Copper Extension shall be soldered. When soldering cannot be done, copper extension shall be connected to CTS in wall using specially formulated copper-to-copper 2-step epoxy (not included but can be purchased separately). Epoxy substitutes will void warranty.
