**Model 70XL**

**Water Pressure Reducing Valve**

**Application**
Ideal for use where Lead-Free* valves are required. Designed for installation on potable water lines to reduce high inlet pressure to a lower outlet pressure. The unitized replaceable cartridge reduces time involved with cleaning and maintenance. The direct acting integral bypass design prevents buildup of excessive system pressure caused by thermal expansion. The balanced piston design enables the regulator to react in a smooth and responsive manner to changes in system flow demand, while at the same time, providing protection from inlet pressure changes.

**Standards Compliance**
- • ASSE® Listed 1003
- • IAPMO® Listed
- • CSA® Certified
- • City of Los Angeles Approved
- • NSF® Listed - Standard 61 & 372*
- • Certified to NSF/ANSI 372* by IAPMO R&T
  *(0.25% MAX. WEIGHTED AVERAGE LEAD CONTENT)

**Materials**
- Body and bell: Cast bronze, ASTM B 584
- Seat: Stainless Steel, 300 series
- Stem & sleeve: Stainless Steel, 300 series
- Elastomers: Buna nitrile, FDA (CFR) 21, 177.2600 EPDM, FDA (CFR) 21, 177.2600
- Strainer screen: Stainless Steel, 300 series

**Features**
- Sizes: 3/4", 1"
- Maximum working water pressure: 300 psi
- Maximum working water temperature: 140°F
- Reduced pressure range: 25 psi to 75 psi
- Factory preset: 50 psi
- Threaded connections (FNPT): ANSI B1.20.1
- Copper connections (FC): ANSI B16.22
- CPVC tailpiece: Max. hot water temp. 180°F @ 100 psi
- Cold water rated temp. 73.4°F @ 400 psi

**Options**
(Suffixes can be combined)
- □ - standard with single union FNPT connection and 20 mesh strainer screen
- □ C - with FC (copper sweat) union connection
- □ DM - double male meter tailpiece connection (3/4);
  1" National Hose Thread fits 5/8" x 3/4" and
  3/4" water meters (no union included)
- □ DU - with double union FNPT connection
- □ P - tapped & plugged for gauge
- □ SC - sealed cage bell housing and stainless steel adjusting screw
- □ SS - sealed cage bell housing with stainless steel adjusting screw and spring
- □ CPVC - CPVC tailpiece connection
- □ LP - low pressure outlet 10-35 psi available in
  3/4" single union, & 3/4" double union
- □ CM - with male copper sweat union connection
- □ DUP - with Z-Bite™ push fit tailpiece connection
  250 psi max pressure
- □ DUPR - with Z-Press™ press fit tailpiece connection
  250 psi max pressure

Rev. D
Date: 6/15
Document No. REG-70XL
Product No. Model 70XL
Typical Installation
Local codes shall govern installation requirements. Unless otherwise specified, the assembly shall be mounted in accordance with the manufacturer’s instructions and the latest edition of the Uniform Plumbing Code. The assembly shall be installed with sufficient side clearance for testing and maintenance. The Model 70XL may be installed in any position. If installed in a pit, vault or indoors, specify the “SC” sealed cage option. Multiple installations are recommended for wide demand variations or where the desired pressure reduction is more than 4 to 1 (i.e.: 200 psi inlet reduced to 50 psi outlet). CAUTION: Anytime a reducing valve is adjusted, a pressure gauge must be used downstream to verify correct pressure setting. Do not bottom adjustment bolt on bell housing.

Specifications
The Pressure Reducing Valve shall be certified to NSF/ANSI 372, of the direct-acting type, and ASSE® 1003 Listed. The integral bypass check valve main body and bell housing shall be cast bronze (ASTM B 584). The pressure reducing valve shall be of the balanced piston design and shall reduce pressure in both flow and no-flow conditions using an adjusting bolt. All internal parts shall be corrosion resistant and included in a replaceable cartridge. The bronze bell housing shall be threaded to the body and shall not require the use of ferrous screws. The Pressure Reducing Valve shall be a ZURN WILKINS Model 70XL.
