

Multi-Conductor Sprinkler Wire

Solid Bare Copper
PVC Insulation
Overall Poly Jacket
60°C, 30 Volt
Twisted Without Fillers

APPLICATIONS

Southwire's Multi-Conductor Sprinkler Wire is suitable for direct burial on applications up to 30 volts. Wire is to be used in field and central controls for underground sprinkler systems.

SPECIFICATIONS

Southwire's Multi-Conductor Sprinkler Wire meets the following applicable requirements:

- UL Spec No. 83
- File Listing: E217598
- Manufactured per customer specification

CONSTRUCTION

Southwire's Multi-Conductor Sprinkler Wire is manufactured using solid bare copper conductors with PVC insulation, twisted with overall polyethylene jacket.
