Wireless TrueSTEAM™ Humidification

THE ULTIMATE IN HUMIDIFICATION COMFORT & CONTROL

Through the power of RedLINK, select models of TrueSTEAM Humidifiers are now wireless-enabled. The new models feature all the advantages of TrueSTEAM operation including 1:1 Humidification Delivery Rate, up to 90% less water waste, and remote installation flexibility - plus the benefits of wireless installation and advanced humidity control.

Plug & Play

Finally – universal installation regardless of equipment brand or type. Because TrueSTEAM is now wireless, there's no need to decipher complex wiring from the humidifier to the furnace board. Simply connect TrueSTEAM to the Wireless Adapter and press 'Connect'. The adapter then communicates wirelessly with Prestige to control humidity, fan airflow and temperature.

Set It & Forget It

With the simple press of a button, you can also add our Wireless Outdoor Sensor to automatically control humidity based on outdoor conditions. The Outdoor Sensor communicates the outdoor humidity to the thermostat so it can accurately set proper humidification levels in the home and achieve advanced energy efficiency. This means that you'll never over or under-humidify a home - and makes sure that homeowners never have to make adjustments.

Homeowner Friendly

Prestige eliminates wall clutter by controlling both temperature and humidity. Homeowners will appreciate having only one control on their wall just as much as they'll like using the sliding humidity scale on the Prestige Comfort System.

The sliding scale shows both actual and desired humidity on the same screen and relates Relative Humidity (RH) % into a comfort range so that homeowners easily understand how to control humidity in their home.

With the power of TrueSTEAM and the precision of Prestige, Honeywell delivers the most accurate humidification control available.
