**A/C EasySeal** is designed to prevent as well as repair leaks anywhere in the system. It is easily injected into the system, traveling with the refrigerant, searching for leaks. The fact that it travels with the refrigerant allows it to find leaks faster, using less sealant than those sealants designed to mix with the systems oil.

With **EasySeal Direct Inject** pumping down the unit is a thing of the past. And now the industry's leading refrigeration sealant has been combined with UV leak detection dye to give you EasySeal Direct Inject-UV. This product is designed to seal leaks and also show where larger leaks are.
