

# COPPER VESSEL SINK INSTALLATION

## BEFORE YOU BEGIN

We recommend consulting a professional if you are unfamiliar with installing bathroom fixtures and plumbing. Signature Hardware accepts no liability for any damage to the floor, walls, plumbing, vanity cabinet, sink, counter top, or personal injury during installation.

Observe all local plumbing and building codes.

Unpack and inspect the sink for damage. If any damage is found, contact our Customer Relations team at 1-866-855-2284.

---

## GETTING STARTED

- Ensure that you have gathered all the required materials that are needed for the installation.
- For the following instructions, it is assumed that the vanity and countertop are already in place.

## TOOLS AND MATERIALS:

Silicone Sealant  
(100% Neutral  
Cure)

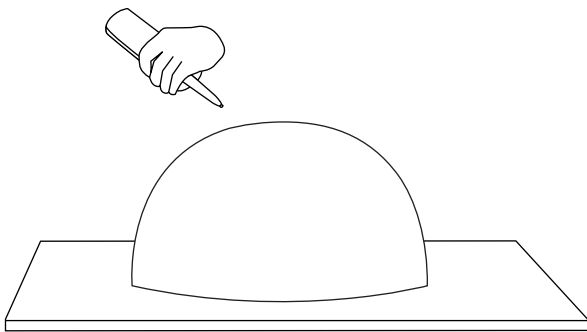

Damp Cloth

# COPPER VESSEL SINK INSTALLATION

## Installation

1. Carefully place your vessel sink upside down on the counter top. Apply a generous amount of silicone sealant to the base of the sink where it will rest on the counter.

2. Turn the sink right-side-up and position over the drain hole. Set the sink in place, and press firmly to secure.

3. If desired, apply a continuous bead of silicone sealant around the perimeter of the sink base for additional stability.

4. Remove any excess sealant with a damp cloth to complete installation.

## COPPER VESSEL SINK INSTALLATION

5. Proceed to the installation of the sink drain. Refer to the drain's installation instructions for guidance.

6. Allow the sealant to fully dry for 24 hours.

### Cleaning and Maintenance

To protect the copper finish, it is recommended that a coating of wax is applied to the sink. Most wax products have natural and added UV filters that help guard against color and finish degradation. Wax should be applied as often as necessary, depending upon usage.

It is recommended that you use a cleaner or polish that is designed specifically for copper products. You may use a gentle soap, such as dishwashing liquid and warm water. We recommend the use of a soft sponge or microfiber washcloth. Do not use any abrasive cleaning pads or materials. Rinse with warm water and dry with a clean, soft cloth.

Acidic cleaners, such as lemon juice and vinegar, will strip the antique finish from the copper. Mixtures containing acidic chemicals should be avoided to preserve the finish.
