What is MSA-U?

MSA-U is a feature-rich online training center that offers courses anytime, anywhere to maximize the users' competencies on MSA products, product technologies, and safety industry standards.

Benefits

- Complete training, anytime, anywhere
- Easy course navigation
- Link to 'New' Training from the home page
- Select certificates achieved, from the home page
- From the home page, view courses you accessed
- Immediate feedback on test performance
- Detailed training reports available for managers
- Receive feedback on incorrect test answers
- www.msasafety.com/msau

A screenshot of the MSA-U Training Center website. The page has a dark header with the MSA-U logo on the left and the MSA logo on the right. Below the header, there are navigation links for "Home", "My Account", and "Logout". The main content area is divided into several sections: "My Course" with a list of course titles, "My Certificates/Training" with links to view certificates and historical records, "NOTICE:" with instructions on how to receive credit, "Course categories" with a list of product categories, "Search" with a search bar, "Training News" with a "New" icon and a list of news items, and "Calendar" showing the month of March 2014. At the bottom, there are social media icons for Facebook, YouTube, and Twitter, and a footer with the text "© MSA 2011. All Rights Reserved".

Table of Contents

Part Number Index	251–257

99 Years of Products, Service and Expertise

Promoting Protection is Part of our History

Mine Safety Appliances Company was founded in 1914 by two mining engineers who designed or improved safety, rescue and protective gear. MSA has continued to help protect people from hazards great and small, and today helps protect millions of workers in many industries worldwide. MSA has sold gas masks for military use since World War I. We have always understood the demands placed on crucial protective equipment in extremely hazardous conditions. MSA historically and steadfastly has helped first responders before, during, and after emergencies, from small house fires to multiple explosions at chemical plants, from hazardous materials spills to hurricanes.

MSA makes and markets respiratory protection, gas-and-flame-detection instruments, head, eye, face, and hearing protection, fire helmets, fall protection, thermal imaging cameras, and mining, emergency, and specialty equipment via a national network of trained distributors, product specialists and knowledgeable contacts. MSA has been a global company for decades, protecting millions of people around the world. What have we done for YOU lately?

MSA Offers More than Safety on the Job

Great Products

MSA began making high-quality safety products in 1914. Technology enhances our innovation in product development, with computer-aided design and the latest rapid prototyping capability. MSA responds quickly as your needs change. Within most product groups is a wide selection of models, sizes, colors, materials, options, accessories and prices. Many components of MSA products are formulated, machined, tooled or molded in-house from raw materials, allowing for greater manufacturing control as well as quality assurance. MSA processes are certified as meeting ISO 9001-2008 quality assurance requirements of the International Standard Organization (ISO).

Great Plans for the Future

MSA continues to enhance our operations and expand/improve our product lines by acquiring companies and/or new capabilities to better serve our customers. In 2010, MSA acquired General Monitors Inc., which, when combined with already extensive capabilities in portable and fixed gas products, created the World Leader in Fixed Gas and Flame Detection. This is just one example of how focusing on our core products—Fixed Gas & Flame Detection; Portable Gas Detection; Head Protection; Fall Protection; Respiratory Protection—means greater innovation and product development for you.

Great People and Resources

Your personalized MSA service starts with a trained MSA-authorized distributor near you and the largest team of field representatives in the safety industry. They understand your hazards and the regulations with which you must comply, and will help to analyze your safety requirements and recommend solutions. MSA-authorized distributors are knowledgeable, well-trained and proficient at providing the services you need and also can assist in training your in-house trainer. Training your employees properly in the use, care and maintenance of our products is easy with MSA-U, our on-line application for 24/7 training. Go to www.MSAafety.com/msau for a list of available programs. New programs are being added regularly.

MSA's website includes additional information about most products in this printed catalog, plus links to PDF versions of printed literature and other materials that you can print yourself. Go to www.MSAafety.com.

To send us an e-mail message, use info@MSAafety.com.

Award-Winning Customer Service

Every customer wants it. Every good business has it.

Our multiple-award-winning Customer Service Center proves that MSA strives for continuous improvement in customer satisfaction. Every year brings positive changes: better-trained associates with more advanced processes, resulting in improved service and faster solutions. Each Customer Service Associate's computer workstation can simultaneously handle a variety of applications, and an automated call distributor monitors and routes call flow to ensure peak performance. Customer Service continues to look for ways to improve its relationship with customers via surveys. Our goal is to provide exceptional customer service, which in turn creates customer loyalty.

The MSA Customer Service Center provides:

- Pre-Sales Support
 - Prepare quotations/bids
 - Product support and recommendations
- Sales Order Support
 - Process purchase orders
 - Provide price and availability information
 - Order status/delivery information
- Post-Sales Support
 - Product support—use and troubleshooting
 - Shipment tracking
 - Order/shipment issue resolution
 - Repair service notifications—return authorizations
 - Credit and corrected invoice requests

Great International Sales

MSA's international sales capabilities start with MSA Sales Representatives who assist in choosing the right products for your applications and local approvals. Our extensive network of distributors, representatives and MSA-affiliate companies covers most major cities worldwide. Highly-trained international customer service associates guide your export orders from placement to delivery. MSA uses all major air and ocean freight forwarders and courier services due to their ability to consolidate multiple orders and minimize freight expenses. Associates understand international inspections, certifications, licensing and other customs issues necessary for successful importation.

To contact MSA International or to find the MSA affiliate company or distributor nearest you, please contact MSA International:

Respiratory Protection

Respirators fall under two classifications: **air-purifying** and **air-supplied**. Air-purifying respirators are used against particulates, gases, and vapors. These are categorized as negative-pressure respirators that use chemical cartridges and/or filters; gas masks; and positive-pressure units such as powered air-purifying respirators (PAPRs). Air-supplied devices rely on a primary air source to deliver a steady flow of respirable air to the user's facepiece. These consist of Self-Contained Breathing Apparatus (SCBA) and air-line devices.

About Respirators

MSA Air-Purifying Respirators (APRs) range from low-maintenance half-mask facepieces with cartridges and/or filters to the more complex PAPRs with full facepieces, or hoods.

- APRs for particulates use filters to capture dusts, mists, and fumes. Filters do not protect against gases or vapors, and generally become less effective as particles accumulate on the filter and plug spaces between the fibers. Filtering APRs require filter replacement when the user finds it difficult to breathe through them.
- Gas and vapor APRs employ chemical cartridges or canisters to remove hazardous gases or vapors from the air. They do not protect against airborne particles. Made to protect against specific gases or vapors, they provide protection only as long as the cartridge's absorbing capacity is not depleted.

The service life of a chemical cartridge depends upon many factors and can be estimated in various ways. Cartridges and canisters require an end-of-service-life indicator (ESLI) or a change schedule,

based on objective information or data that will ensure that canisters and cartridges are changed before the end of their useful life. You can access the MSA Cartridge Life Calculator on our website (MSAsafety.com). Click Resources, then Tools, then MSA Response Guide.

- Combination APRs, fitted with both particulate filters and gas/vapor cartridges, are worn in atmospheres that contain hazards of both particulates and gases.

Supplied-Air Respirators (SARs), comprise air-line respirators, SCBA, and combination supplied-air respirators.

- Air-Line Respirators are used for extended periods in non-IDLH atmospheres. They use an air-line hose to deliver clean breathing air from a stationary source of compressed air for prolonged periods of time. Although comparatively lightweight, air-line respirators can limit users' mobility because of the air-line hose that must be attached.

- Self-Contained Breathing Apparatus (SCBA) have an open-circuit design that provides air rated for 30 to 60 minutes. They consist of a wearable, clean-air supply and a tight-fitting facepiece, and are used for short duration entrance or escape from atmospheres that are or may be IDLH. They offer relatively unrestricted movement.
- Combination SARs are air-line devices used for extended work periods in atmospheres that are or may be IDLH. They have an auxiliary self-contained air cylinder that can be used if the primary air supply fails. With certain restrictions, the air cylinder can also be used for entry into or escape from IDLH atmospheres, such as confined spaces.

Respirator Selection

All respirators in use must be NIOSH-approved (NIOSH 42 CFR Part 84). Selecting respirators entails knowing what level of respiratory protection employees need, as well as which size respirator is right for any face and facial contours. Respiratory protective devices vary in design, application, and protective capability. Thus, the user must assess the inhalation hazard and understand the specific use limitations of available equipment to assure proper selection.

If your calculation shows that exposure concentrations exceed recommended limits and engineering/administrative controls do not reduce exposure below the permissible limit, tailor your respiratory protection program to the specific conditions based on:

- | | | | |
|----------------------------------|--|-------------------------|---|
| • Toxicity (TLV or TWA) | • Oxygen level | • Sorbent limitations | • Type of use (routine, escape, or emergency entry) |
| • Maximum Expected Concentration | • IDLH concentration | • Facepiece fit | • OSHA-assigned protection factor of respirator |
| | • Warning properties (adequate or not) | • Mobility requirements | |

All MSA Respirators are NIOSH-approved.

Air-Purifying Respirators

Advantage® 420 Half-Mask Respirator

With its UniBond over-mold facepiece, AnthroCurve™ face seal, and low profile design, the Advantage 420 Respirator is the superior option for respiratory protection. The over-mold facepiece and face seal ensure the unit provides an excellent fit and comfort to the wearer. The unique yoke and harness design (patent pending) allows a user to easily don and doff the state-of-the-art respirator while maintaining a customized fit. Other features include a ComforTop™ headband, a built-in moisture release chin cup hole, and extra-wide head and neck straps.

Features and Benefits

- Respirator boasts several features to increase comfort and provide customized fit
- Four-point yoke and harness design promotes easy donning and doffing
- Easily switches between lock-down and drop-down mode
- Designed for easy integration with other personal protective equipment
- Latex-free

See page 12 for Advantage filters and cartridges and page 13 for flexible pad-style filters.
See page 13 for Comfo filters and cartridges.
For more information, please see bulletin 1012-36-MC/July 2009.

Applications include:

- Asbestos Abatement
- Painting
- Welding
- Sanding & Grinding

Easy 3-Step Donning Process

Advantage 200 LS Half-Mask Respirator

The economical, lightweight Advantage 200 LS Respirator is extremely lightweight yet subtracts none of the toughness or performance. The unit's patented MultiFlex® System equalizes pressure on the face-seal area, ensuring the respirator doesn't collapse during wear. The respirator also has the AnthroCurve™ sealing surface, which instantly conforms to the wearer's face.

Features and Benefits

- Lightweight, cost-efficient
- Thermoplastic rubber increases softness and decreases weight
- Multiflex system equalizes facial pressure
- AnthroCurve conforms to each user's face

Comfo Classic® Half-Mask Respirator

The SoftFeel® facepiece of the Comfo Classic Half-Mask Respirator makes this unit dramatically more comfortable. The material increases the softness of both hycar rubber and silicone, which are the two facepiece materials available with Comfo Classic Respirators. The unit's unique face seal design also provides an exceptional fit.

Features and Benefits

- SoftFeel rubber and Silicone facepieces enhance softness, increasing wearer comfort
- Face seal design provides tight, comfortable fit

Air-Purifying Respirators

Advantage 4000 Series Full-Facepiece Respirators

Designed to cover a wide variety of respiratory applications, our Advantage 4200 and 4100 Facepieces work with several different MSA respirators to provide comfortable, cost-efficient performance. Both twin-port and single-port facepieces are compatible with several MSA respirator models, including air-purifying respirators, supplied-air respirators, and powered air-purifying respirators. Available in silicone and hycar, these units come in three standard sizes for a snug fit. The facepieces also feature a rubber or net head harness, and every mask includes a standard nose cup for reduced fogging in low-temperature or high-moisture environments.

Features and Benefits

- Facepieces are compatible with several MSA respirator models for comfortable, cost-efficient performance
- Option of three standard sizes ensures user will find a solid fit
- Standard nose cup reduces lens fogging
- Components lock into place in seconds for quick, convenient performance

----------------------	----------	---

Welder's Adapter for Advantage 4200 Respirator

Advantage 3000 Series Full-Facepiece Respirators

Designed to provide convenience and comfort, the Advantage 3000 Series Full Face Respirator is the ultimate choice for worker protection. Our state-of-the-art design allows for extremely low breathing resistance, while the standard nose cup reduces fogging and the pliable silicone facepiece increases comfort. The respirator also features a scratch-resistant, wraparound lens that eliminates distortion and increases peripheral vision. Pre-adjustable straps ensure the mask delivers a consistent fit, while the preset upper straps provide a tighter, more secure seal. Users can also opt for the European-style Advantage Head Harness, which dons like a catcher's mask. The 3100 Facepiece offers a single-port, standard thread filter connection.

Features and Benefits

- Full face respirator features state-of-the-art design to lower breathing resistance, while the nose cup reduces fogging and silicone faceplate increases comfort
- Scratch-resistant wraparound lens allows for wide field-of-vision, while adjustable straps offers consistent fit
- Single-port, standard thread filter connection

Air-Purifying Respirators

Ultra-Twin® Full-Facepiece Respirator

Designed to provide a secure fit and strong protection, Ultra-Twin Full-Facepiece Respirators offer several options that make it a clear choice for defense against toxic chemicals. The unit features an inturned lip for a comfortable seal against the face, a large chin cup for easy positioning, and 5 suspension headstraps with roller buckles that hold the facepiece in place while minimizing hair entanglement. The wide lens is scratch resistant, while a speaking diaphragm provides clear short-range communications. The unit also features a nose cup that helps eliminate lens fogging.

Features and Benefits

- Feature an inturned lip, large chin cup, and 5 headstraps with roller buckles for secure, comfortable fit
- Speaking diaphragm provides clear communications
- Nosecup reduces lens fogging

Ultra Elite® Twin-Cartridge Full-Facepiece Respirator

Combining state-of-the-art features with MSA's precision engineering, the Ultra Elite Full Facepiece is our top model in this range. The ergonomic design makes this a comfortable unit, while the 5-point harness makes it easy to put it on or take it off. The distortion-free coated lens provides a high level of peripheral and downward vision. The face blank has a single-sealing flange and comes in rubber or silicone, while the speaking diaphragm provides excellent close-range communication.

Features and Benefits

- State-of-the-art mask provides excellent comfort and protection
- Distortion-free lens allows wide field-of-view
- 5-point harness allows easy on/off
- Models include Hycar rubber and silicone versions
- Unique airflow prevents lens fogging

Note: Ultra Elite Facepieces must be fitted with a Twin-Cartridge Adapter P/N 803622 to be used as a twin-cartridge respirator.

Air-Purifying Respirators

Advantage Respirator Cartridges

The Advantage line of particulate, chemical and combination cartridges is NIOSH-certified (to 42 CFR, Part 84) and provides lightweight, low-profile performance. Cartridges fit 200 LS and 420 Half-Mask, 1000, 3000 and 4000 Series Full-Facepiece Advantage Respirators.

R95 Snap-On Prefilter and Cover	815397 Box of 20 815401 Reusable Snap-On Cover, 2 in a Package		An appropriate cartridge change-out schedule must be developed by a qualified professional, unless the cartridge/canister utilizes an end-of-service-life indicator. The change-out schedule must take into account all factors that may influence respiratory protection including specific work practices and other conditions unique to the worker's environment. If using against substances having poor warning properties, there is no secondary means of knowing when to replace the cartridges/canister. In such cases, take appropriate additional precautions to prevent overexposure, which may include a more conservative change-out schedule or using an air-supplied respirator or SCBA. Failure to follow this warning can result in serious personal injury or death. As a reference, below is a partial list of substances having poor warning properties:

* Effective against, but not NIOSH-approved, for Iodine Vapor.																																																				

Notes

- Do not use in atmospheres containing less than 19.5 percent oxygen, in atmospheres containing gases or vapors or in atmospheres immediately dangerous to life and health.
- Do not use in atmospheres containing less than 19.5 percent oxygen, or in atmospheres immediately dangerous to life and health.
- Do not wear for protection against organic vapors with poor warning properties or those which generate high heats of reaction with the sorbent material in the cartridge.
- 99.97 percent efficient against 0.3 micron DOP.
- Both a prefilter and cover must be used with the cartridge in order to obtain R95 or N95 particulate protection.

Comfo Respirator Cartridges

The Comfo line of particulate, chemical and combination cartridges is NIOSH-certified (to 42 CFR, Part 84). Cartridges fit Comfo Classic, Ultra-Twin, Ultra Elite Twin-Cartridge and Duo-Twin Respirators, and certain half-mask and full-face Advantage Respirators with Adapter (P/N 809999).

Flexi-Filter® Pads for Advantage Respirators

These low-profile, flexible pads fit well under a welding hood and with other personal protective equipment. They offer great balance and weight distribution for maintaining a good face seal, while their swept-back design provides improved vision and comfort.

Air-Purifying Respirators

Online Response® Respirator Selector

Available at www.MSAafety.com/responseguide

- Helps identify the proper respirator you need
- Has broadest range of respiratory protective devices available
- Recommends respirators for more than 700 chemical hazards
- Has nearly 3,000 chemical synonyms
- Lists up to 27 categories of respirators, with MUCs
- Is generic in nature

Cartridge Life Expectancy Calculator

Available at www.MSAafety.com/responseguide

MSA's interactive web pages help users determine the life expectancy of specific respirator cartridges in various hazardous situations. This information provides guidance for how long a cartridge should be used before it must be replaced.

Personal Safety Equipment Towelettes

Provides an excellent method for wiping and refreshing respirators, hardhats, and other safety equipment between full cleaning periods.

MSA Confidence Plus® Germicidal Cleaner

Mix with warm water for a germicidal cleaner that is effective against various micro-organisms including immunodeficiency virus Type 1 (HIV-1, associated with AIDS). EPA-approved for use on safety equipment.

* If only qualitative fit test is performed on a full-face negative pressure respirator, then an APF of only 10 can be assigned. If a quantitative fit test is performed, the APF is 50.

† For quantitative fit testing of pressure-demand facepiece, the facepiece must be tested in a negative pressure mode which requires a minimum fit factor of 500.

± MSA recommends a fit factor of 2000 if the application is a CBRN environment.

‡ The Quik-Chek Adapter allows quantitative fit tests to be performed on a pressure demand Ultra Elite Firehawk facepiece by only trained and qualified personnel. Special probed facepiece are not required.

Air-Purifying Respirators

OptimAir® Mask-Mounted Powered Air-Purifying Respirator (PAPR) and OptimAir MM2K PAPR with Type HE OptiFilter® XL Filter

- Lightweight, compact design for long-life, high-performance and low maintenance
- Sealed, water-resistant battery fits inside most pockets
- Dual-rate charger recharges fully discharged battery in less than three hours
- Water-resistant HEPA filter for protection against particulate contaminants
- Choice of facepiece model in several configurations
- Facepiece, motor/blower and filter combine to produce high air flow
- Compact, easy to maneuver, simple to decontaminate
- Constant air flow also cools user's face

OptimAir Mask-Mounted PAPR

OptimAir Mask-Mounted PAPR Kits consist of motor/blower, NiMH battery, dual-rate charger, one Type HE OptiFilter XL Cartridge, PVC decon belt, and choice of facepiece. Housing of polycarbonate/polyester construction and stainless steel connectors result in extreme durability. NIOSH-approved as mask-mounted PAPR. **OptimAir Mask-Mounted PAPR offers a full two-year warranty.**

OptimAir MM2K PAPR

OptimAir MM2K PAPR assemblies include motor/ blower, NiMH battery, dual-rate battery charger, cable, one Type HE OptiFilter XL Cartridge, belt, and Advantage 3000 Facepiece. OptimAir MM2K PAPR for mold remediation/abatement, asbestos and nuclear applications offers long life, high performance and low maintenance in an economical package. NIOSH-approved as mask-mounted PAPR. **MSA OptimAir MM2K PAPR offers a full one-year warranty.**

Specifications

Weight:

- Motor/blower with cable 7.0 oz
- Battery pack 12.5 oz
- OptiFilter Cartridge, 3.5 oz

Motor/blower: approximately 1500 hours

Battery: nickel metal hydride rechargeable battery pack provides 8 hours (one shift) of continuous use. Battery pack delivers 4.8 volts (nominal).

Battery life: up to 1,000 charge/discharge cycles

Battery charger: rated service of 100-264 volts @ 50/60 Hz

Limitations:

- OptimAir Mask-Mounted PAPR and OptimAir MM2K PAPR with Type HE OptiFilter XL Cartridge are approved as a high-efficiency particulate PAPRs
- OptimAir Mask-Mounted PAPR and OptimAir MM2K PAPR do not remove vapors or gases from air
- No filter is designed for all concentrations of all substances
- It is essential to determine contaminants present and to determine airborne concentrations and explosive limits before respirator selection
- OptimAir Mask-Mounted PAPR and OptimAir MM2K PAPR do not supply oxygen and should not be used unless surrounding air contains minimum 19.5% oxygen
- Respirators may be used in temperatures between 0°F and 120°F (-17°C to 49°C); however, if used in temperatures below 40°F (4.4°C), fully-charged battery may not operate for full 8 hours
- Replaceable filter cartridge for trapping particulate contaminants is minimum 99.97% efficient against 0.3 micron DOP

Complete Assemblies for OptimAir Mask-Mounted PAPR and OptimAir MM2K PAPR

All assemblies include: motor/blower, NiMH battery, dual-rate battery charger and cable, one Type HE OptiFilter XL Cartridge, waist belt, and choice of facepiece.

Waist Belts for OptimAir Mask-Mounted and MM2K PAPRs

- PVC belt with slide-through friction buckle is comfortable and easy to decontaminate
- Standard—P/N 473902 clear polyvinylchloride (PVC) support belt
- Accommodates waist sizes of up to 48 inches
- Optional—P/N 492827 polyurethane-coated nylon belt
- No-decon applications—P/N 9961 uncoated nylon web waist belt

Air-Purifying Respirators

OptimAir® TL Powered Air-Purifying Respirator

The low-profile OptimAir TL Powered Air-Purifying Respirator (PAPR) combines state-of-the-art design with superior "smart" features. The unit packages the motor blower, cartridges, and battery in a single hip-hugging design for lightweight comfort and fit. The low-profile motor blower offers optimal airflow through a crushproof breathing tube, while the ergonomic battery pack allows for free movement within confined spaces. The unit automatically adjusts flow rates for altitude changes via an internal pressure sensor, while the cutting-edge design permits fast, accurate change-out of cartridges, hoods and batteries. The standard kit includes motor blower, smart charger, standard battery, hose, and decon belt.

- Audible and visual alarms indicate low flow indication and low battery voltage
- Available with standard and an extended life battery
- Less bulk and better weight distribution improves worker efficiency

OptimAir TL Kits

Kits include: motor blower, battery, Smart Charger, breathing tube and decon belt.

Air-Purifying Respirators

Welder's Adapter for Full-Facepiece Respirators

MSA Welder's Adapters are molded of polycarbonate plastic, which has high resistance to impact, heat, and welding splatter. The clip-on adapter attaches to the facepiece by molded-in clips. A large vision area—4-1/2" x 5-1/4"—provides an unobstructed view of work. The Welder's Adapter is supplied with an impact-resistant cover lens; the desired filter plate is ordered separately. Rayfoe™ Filter Plates are available in two standard shades—10 and 12.

The heat-resistant Welder's Hood is designed to protect the welder's head, neck, and shoulders from welding splatter and sparks. The Kevlar hood has a rubber seal which fits snugly over the Welder's Adapter. The hood also helps protect cartridges when an air-purifying respirator is used in welding operations.

Chin-Type Gas Masks

Our lightweight Chin-Type Gas Masks use a replaceable canister to offer protection against particulate matter, vapors, and gases. The small canister and comfortable facepiece allow for downward head movement and high ease-of-use. Note: Not meant for fire fighting.

- Lightweight, comfortable gas masks offer protection against particulate matter, vapors, and gases
- Small round canister and comfortable facepiece provide easy downward head movement
- Canisters offer protection from: Phosphine/Ammonia/Chlorine-P100, Organic Vapor-P100, Hydrogen Fluoride/Chlorine/P100, Formaldehyde/Acid Gas/Chlorine Dioxide/Hydrogen Sulfide/P100

Air-Purifying Respirators

Riot Control and CBRN Gas Masks

Protect law enforcement and military personnel from a variety of respiratory hazards with this full line of CBRN and riot control gas masks. Featuring flexible lenses, wider field of view, permeation-resistant construction and built-in speaking diaphragms, these masks provide protection with a comfortable fit and superior visibility. Available in a variety of styles and configurations.

- Provides respiratory protection against military warfare, civil unrest and CBRN threats
- High-performance, custom-fit comfort in a variety of military- and riot-style masks
- Attracts, regains and neutralizes contaminants
- Flexible lens with a wider field of view for superior visibility
- Easy on/off and adjustment
- Choose from a variety of styles including total head protection

Responder® Powered Air-Purifying Respirator

With its industry-leading motor-blower and constantly filtered airflow, the belt-mounted Responder CBRN PAPR is ideal for first responders, military, and special ops personnel who require non-IDLH respiratory protection for up to 8 hours. The unit offers a choice of two MSA gas mask CBRN facepieces and three proprietary cartridges designed for CBRN, particulate and poisonous gases or vapors. The unit's constant airflow helps a user stay physically alert and focused, while also preventing fogging in the facepiece. Batteries can be "hot-swapped," and the blower's EMI shield ensures there is no interference with radio communications.

- Respirator provides constant filtered airflow, which reduces fatigue and prevents facepiece fogging
- Long-life unit provides non-IDLH respiratory protection for up to 8 hours
- Unit is compatible with MSA's Millennium and Ultra Elite facepieces

Air-Purifying Respirators

Safe Escape® CBRN Respirator

The Safe Escape Hood from MSA gives you the protection you need to escape from a terrorist situation safely, quickly and easily—whether you work in a high-profile office environment, for a government agency or embassy, or as a law enforcement officer or first responder. Manufactured with a high-performance laminate material, the hood is designed to provide the latest in head and neck coverage with respiratory protection against CBRN agents.

Features and Benefits

- Convenient respirator guards against chemical, biological, radiological or nuclear hazards
- Unit features self-adjusting cradle-type head straps
- Wide field of view provides excellent visibility and reduces claustrophobia
- High-stretch rubber neck seal ensures tight fit
- Nosecup reduces lens fogging
- Guards against: HD vapor, GB, ammonia, cyanogen chloride, cyclohexane, formaldehyde, hydrogen cyanide, hydrogen sulfide, nitrogen dioxide, phosgene, phosphine, sulfur dioxide

S-CAP™ Fire Escape Hood

Most victims of fire are not injured by heat or flames but rather by smoke and gases, especially carbon monoxide. The S-CAP Fire Escape Hood is simple to don and use and is effective within seconds, using a filter designed for a minimum rated service time of 15 minutes.

- Filters out CO and smoke
- Universal size
- Easily fitted with quick donning
- Minimal training required
- EN 403:2004 approved
- Highly visible yellow hood
- Adjustable head harness on the outside of the hood, with cotton neck seal for easy donning
- Wide field of view lens
- Heat-resistant against brief flame contact and elevated temperatures

A Guide to **Air-Line Systems**

Type-C Supplied-Air Respirators, more commonly referred to as air-line respirators, are designed to provide long-duration respiratory protection.

They generally consist of a full-facepiece or half-mask facepiece connected by an air-supply hose to an air source (either a compressor or bank of large air cylinders). When connected to the air source, the respirator delivers a supply of respirable air to the user.

Accessory equipment, such as pressure regulators, pressure relief valves, carbon monoxide monitors and filters for air compressors, may be necessary to ensure that the air is at the proper pressure and quality for breathing. Air quality must be Quality Verification Level Grade D or better as defined in ANSI Standard Z-86.1-1973 (Compressed Gas Association Specification G-7.1 Commodity Specification for Air).

Current air-line systems fall into two categories: **Pressure-Demand** and **Constant Flow**. The difference between the two is how the air is supplied.

Pressure-demand systems deliver air only when the user needs it. Thus, pressure-demand devices afford greater breathing efficiency.

In contrast, with a constant flow device, air flow to the respirator is continuous. However, because the air flow is continuous, constant flow air-line systems are generally used only with a compressor for a virtually unlimited air supply.

Type-C Supplied-Air Respirators are approved by the National Institute for Occupational Safety and Health (NIOSH) for use in atmospheres not immediately dangerous to life and health (IDLH) or from which the wearer can escape without wearing the respirator.

“Not immediately dangerous to life and health” means any hazardous atmosphere which may produce physical discomfort immediately, chronic poisoning after repeated exposure, or acute adverse physiological symptoms after prolonged exposure. (42 CFR, Part 84 subpart A, 84.2(x)).

This limitation is necessary because the air-line respirator depends entirely on an air supply not carried by the wearer. Therefore, if the air hose were severed or crimped, or the air compressor failed, the air supply to the wearer would be shut off. The wearer would be without respiratory protection and might not be able to safely escape from an IDLH atmosphere.

Another limitation of air-line respirators is that the air-supply hose limits the wearer to a fixed distance from the air source. As an air-line respirator user, it is your responsibility to supply the respirator with breathable air—Grade D or better. The following pages show complete hook-ups of various air-line systems, both pressure-demand and constant flow, from the air source to the respirator. The following information is a guide designed to aid you in hooking up your own air-line system.

Air-Line Respirators

Constant Flow Air-Line Respirators CF

Constant Flow Air-Line Respirators maintain a slight positive pressure of air inside the facepiece whether the wearer is inhaling or exhaling. This helps prevent contaminants from seeping in around the facepiece, even if there should be small breaks in the face-to-facepiece seal.

Constant Flow Air-Line Respirators maintain air flow at all times, rather than only on demand. Because of this, constant flow units almost always use a compressor as their air source. A constant flow unit would quickly exhaust the air from a cylinder or cascade system.

There are two types of Constant Flow Air-Line Respirators: one uses a tight-fitting facepiece; the other, a loose-fitting hood or helmet. Inlet air pressure must be able to maintain at least 4 cfm for a tight-fitting facepiece and 6 cfm for a loose-fitting hood.

The inlet pressure for Constant Flow Air-Line Respirators varies between 10-15 psig for low pressure systems and 35-40 psig for high pressure systems.

For Constant Flow Air-Line Hoods, the inlet pressure usually ranges between 10-15 psig and 85-100 psig, depending on the type. Also, depending on the inlet pressure, the length of approved air-supply hose for these systems is usually between 8-50 feet for low-pressure systems and 8-300 feet for high-pressure systems. Consult the instruction manual for your respirator to determine the specific inlet pressure and hose length.

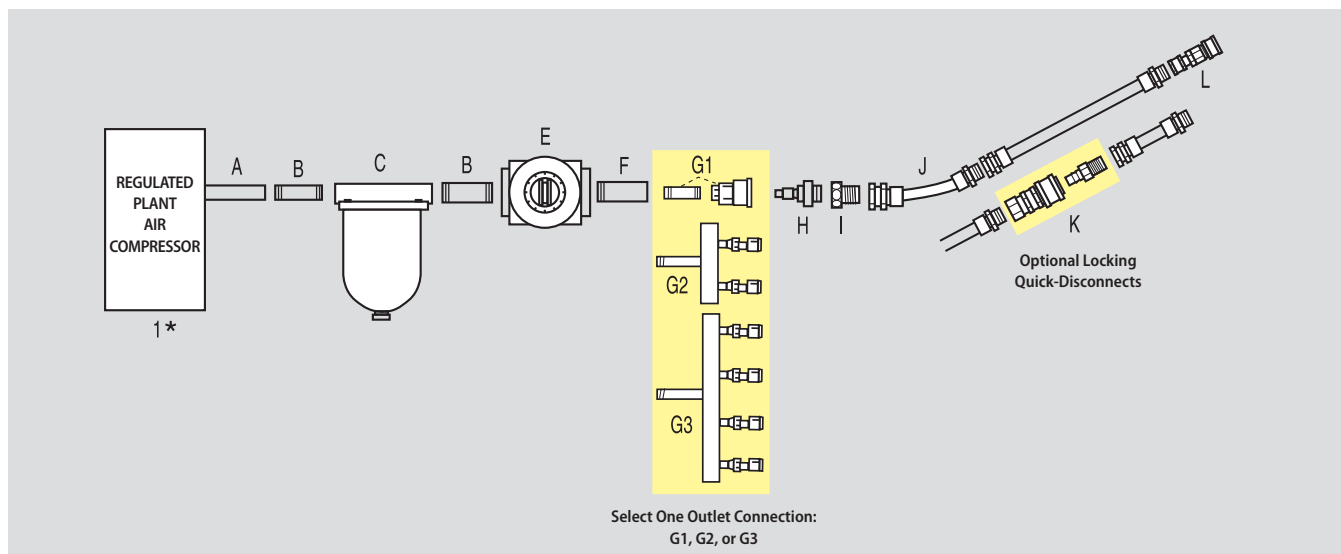

MSA Constant Flow Respirators with Tight-Fitting Facepieces include:

- Constant Flow Air-Line Respirator
- Constant Flow Duo-Twin™ Air-Line Respirator
- Constant Flow Duo-Flo™ Air-Line Respirator
- Abrasi-Blast™ Supplied-Air Respirator

MSA Constant Flow Respirators with Loose-Fitting Hoods include:

- Versa-Hood™ Air-Supplied Hood

Pressure-Demand Air-Line Respirators PD

Pressure-Demand Air-Line Respirators are designed to maintain a slight positive pressure of air inside the facepiece whether the wearer is inhaling or exhaling. This helps prevent contaminants from seeping in around the facepiece, even if there should be small breaks in the face-to-facepiece seal.

Pressure-Demand Air-Line Respirators are designed specifically for non-IDLH toxic atmospheres. The exception is if the respirator is equipped with an egress cylinder of air to use during escape.

Pressure-Demand Air-Line Units require an air supply from an uncontaminated compressed-air source as stipulated in General Industry Safety and Health Regulations, Part 1910.134 (OSHA) with the delivered air conforming to at least Grade D of ANSI Standard Z86.1.

A common air source for pressure-demand systems is a cylinder of air which can be set up in remote sites that might otherwise be impossible to reach with a large stationary compressor.

Another air source option for pressure-demand respirators is a cylinder cascade system. A cascade system consists of several air cylinders joined together in a bank by means of coupler tees. Generally, the banks

consist of three or more cylinders of either 244 cubic-feet or 330 cubic-feet-capacity. One or more workers can breathe from a cascade system.

If using a compressed air or a compressor system, each respirator generally requires 1.5 cfm per person and needs to maintain the inlet (working) pressure specified in the respirator instruction manual.

At a normal rate of consumption, a three-cylinder bank used with a pressure-demand unit will provide between 12 to 16.5 man-hours of air, depending on cylinder capacity.

MSA Pressure-Demand Air-Line Units include:

- PremAire® Cadet Respirator (for non-IDLH atmospheres)
- PremAire Cadet Escape Respirator
 - with Escape Cylinder (for egress from IDLH atmospheres)
- PremAire Air-Line Respirator System:
 - with Escape Cylinder (for egress from IDLH atmospheres)
 - with Vortex Tube (for suit-cooling applications)
 - with Dual-Supply (to eliminate additional hose lengths)

Air-Line Respirators

Constant-Flow Air-Line Respirator

This Type-C, supplied-air respirator supplies a continuous flow of air to the facepiece from an external source. The complete assembly is available with either an Ultravue or Ultra Elite Full Facepiece, Comfo Half-Mask Facepiece or Comfo Welder's Facepiece, plus breathing tube, web support belt and air flow control valve. Use only in non-IDLH environments.

Constant Flow Air-Line Respirator with Ultravue Facepiece

Features and Benefits

- Supplies long-duration respiratory protection
- Ideal for a wide range of applications including welding, painting and hazardous materials
- Maintains a slight positive pressure of air during both inhalation and exhalation to prevent contaminant seeping inside facepiece
- For use only in non-IDLH environments

Constant Flow Air-Line Respirator with Advantage 4000 Facepiece

	10088110	806777	480637	480639	480645	with CEJN Locking chrome-plated brass quick-disconnect

Note: Facepieces can also be ordered in silicone instead of hycar rubber. Three sizes of facepieces are available. For belts, MSA Air-Supply Hose and other accessories, see pages 44–45. For separate quick-disconnect plugs and sockets, see page 42. See pages 28–29 for typical Pressure Demand Air-Line and Constant Flow Air-Line Systems setup.

† Available by special order only. High-pressure control valves are also available with the following special order quick-disconnects: Snap-Tite brass or stainless steel, Foster brass, and Hansen brass, or stainless steel. Low-pressure control valves also available with: Snap-Tite brass or stainless steel, Foster brass, and Hansen brass. Please call your nearest MSA distributor for complete ordering information.

Duo-Twin™ Respirators CF

The Duo-Twin Respirator comes in a Constant-Flow version; Constant-Flow respirators are normally used where an ample air supply is available, such as that provided by an air compressor. The MSA Duo-Twin Respirator features air-purifying cartridges, which also protect against a variety of contaminants. If the air supply should ever fail on the Constant-Flow unit, the user is automatically protected by the air-purifying cartridges.

This product is popular in the pharmaceutical, chemical, petrochemical, and nuclear industries. This MSA respirator should not be used in atmospheres containing less than 19.5% oxygen. NIOSH approved.

Duo-Twin Respirator with Advantage 4000 Facepiece

Ordering Information

DUO-TWIN RESPIRATOR COMPLETE ASSEMBLIES	10091873	Constant Flow Duo-Twin Respirator with Advantage 4000 Facepiece – complete with facepiece, breathing tube, adapter assembly/regulator, web belt and Foster steel plug and socket assembly. Uses Advantage Respirator Cartridges listed on page 12.
	490143	Constant Flow Duo-Twin Respirator with Ultravue Facepiece – complete with facepiece, breathing tube, adapter assembly/regulator, web belt and Foster steel plug and socket assembly. Uses Comfo Respirator Cartridges listed on page 13.

Duo-Flo™ Respirators CF

This combination air-supplied/air-purifying respirator is designed for use in adequately ventilated areas with at least 19.5% oxygen. Featuring a unique, switchable exhalation valve, these units are well suited for abatement work.

Features and Benefits

- Fresh-air respirators for use in adequately ventilated areas
- Requires at least 19.5% oxygen for use
- Air-supplied mode permits long service use
- Air-purifying mode is for entry, egress and moving from station to station in a contaminated atmosphere

Constant-Flow Duo-Flo Respirator

Ultra Filter P100 cartridge

Duo-Flo Respirator Designed for Torus and Wetwell Abrasive Blasting

MSA's custom designed products for torus and wetwell blasting include the Duo-Flo Respirator with a tight-fitting facepiece, a durable hood that provides head, neck and upper body protection and replacement 3-layer lens covers for workers engaged in abrasive blasting. The Constant Flow Duo-Flo Option is designed to handle both air-supplied and air-purifying (P100) modes of operation. The 3-layer cover lens allows for lens removal without stopping work. The shoulder-length hood is made of cotton-polyester material. It has an elastic neck and Velcro closures for comfortable sealing around the neck.

- APR filter for entry/egress
- Constant flow Airline with Type CE approval for blasting operation
- Customized blasting hood designed specifically for maximum vision and mobility
- Standard Ultravue Facepiece maximizes vision in tight quarters
- Easy integration with Fall Protection
- NIOSH approved

Air-Line Respirators

Abrasi-Blast™ Supplied-Air Respirator CF

This supplied-air respirator provides respiratory and upper body protection for personnel engaged in abrasive blasting. Includes hood, facepiece with lens housing, breathing tube, lens cartridge, flow-control device, air-supply hose, and support belts. Ideal for a range of applications including blasting operations.

Features and Benefits

- Provides respiratory and upper body protection
- Modular design allows customization for a range of applications
- Heavy, rubber hood protects against rebounding abrasive materials
- Removable flat-glass cover lens
- Choose waist-length or shoulder-length style

Versa-Hood™ Air-Supplied Respirator CF

Use this economical respirator wherever a Type-C air-supplied hood is required. Works with an air system or personal air compressor. The three-point Velcro system affixes the hood securely to an MSA V-Gard Cap, while adjustable suspensions minimize the need for a chinstrap. A disposable outer cover eliminates cleaning.

Features and Benefits

- Use wherever a Type-C air-supplied hood is needed
- Disposable outer cover
- Twin lens system for double the hood life
- Air distribution system keeps lens fog free
- Knit collar for greater comfort
- Available in two lengths and two materials

Note: This Versa Hood Assembly would typically require a compressor that puts out between 10 to 12 cfm per person at 10 to 40 psi. Required inlet pressure is based on airline hose length.

Air-Line Respirators

PremAire® Cadet Supplied-Air Respirator

Get air on demand with this high-performance, Type-C, supplied-air respirator. Mask-mounted regulator responds quickly to changing breathing requirements. Maintains a slight positive pressure to prevent contaminants from invading the face piece. Ideal for chemical and petrochemical processing, municipal utilities, and asbestos and lead paint abatement, as well as non-IDLH environments such as pharmaceutical applications and hazardous materials clean up.

Features and Benefits

- Supplies on-demand respiratory protection
- Provides longer-duration air supply when used with a compressor
- Maintains a slight positive pressure of air during both inhalation and exhalation
- Well-suited for chemical, petrochemical, utility and industrial applications
- For use only in non-IDLH environments

PremAire Cadet Respirator Kits

These PremAire Cadet Respirator Kits include PremAire Cadet Respirator with Advantage 4000 Facepiece (medium size, hycar rubber, polyester net head harness) with Push-To-Connect Firehawk® Regulator, nylon belt assembly, listed quick-disconnect for connecting respirator to air-supply hose, neoprene air supply hose 50-foot section complete with corresponding plug to attach air-supply hose to air source.

PREMAIRE CADET KITS	10108493	PremAire Cadet Air-Line Respirator with Foster Steel quick-disconnects, neoprene air supply hose 50-foot section with Foster Steel Plug
	10108594	PremAire Cadet Air-Line Respirator with Snap-Tite Aluminum quick-disconnects, neoprene air supply hose 50-foot section with Snap-Tite Aluminum Steel Plug
	10108495	PremAire Cadet Air-Line Respirator with TransportAire™ Portable Air-Supply Assembly: kit includes a PremAire Cadet Respirator with an Advantage 4000 Facepiece (medium size, hycar rubber, polyester net head harness) with Push-To-Connect Firehawk Regulator and nylon belt assembly, Snap-Tite Quick-Disconnect and a low-pressure TransportAire Portable Air Supply with 30-minute carbon fiber cylinder, and eight-foot coiled nylon air supply hose

PremAire Cadet Respirator Assemblies

All listed configurations include: Ultra Elite Facepiece (medium size, hycar, rubber head harness) or Advantage 4000 Facepiece (medium size, hycar, polyester net head harness) with Push-To-Connect Firehawk Regulator and nylon belt assembly.

Note: See page 42 to order quick-disconnects for use with the PremAire and PremAire Cadet Systems (column 2 for the plug and column 5 for the socket assembly).

Facepieces for PremAire Cadet and PremAire Cadet Escape Respirators

MSA offers choice of two facepieces, the Ultra Elite Facepiece or the Advantage 4000 Facepiece for the PremAire Cadet family of respirators. Choose from three facepiece sizes (small, medium, or large) in either hycar or silicone rubber. Nosecups are available in two sizes, standard and large.

Ultra Elite Facepiece

The Ultra Elite Facepiece features:

- One-way check valve preventing exhaled air from entering the mask-mounted regulator
- A rugged polycarbonate lens with scratch-resistant coating
- A mechanical speaking diaphragm for short-range communications
- Five adjustable rubber straps for exceptional head comfort, security, and safety
- Optional heat-resistant Kevlar net-style head harness

	Small	Medium	Large

Air-Line Respirators

PremAire® Cadet Escape Respirator

This combination supplied-air respirator with SCBA is designed especially for use in and escape from IDLH atmospheres. Versatile, comfortable, and affordable, it features a single-assembly first-stage regulator and cylinder valve. Small in size and profile, making it ideal for working in tight places.

Features and Benefits

- One-piece assembly with both first-stage regulator and cylinder valve
- Small size and profile for confined spaces
- Downstream design and dual springs for maximum reliability
- Recessed pressure gauge for added protection
- Choice of cylinder hip placement for freedom and versatility
- Standby mount for second-stage regulator

PremAire Cadet Escape Respirator Kits

The PremAire Cadet Escape Respirator Kits below include a PremAire Cadet Escape Respirator with an Advantage 4000 Facepiece (medium size, hycar rubber, polyester net head harness) with Push-To-Connect Firehawk Regulator and nylon harness, aluminum cylinder, and the listed quick-disconnect for connecting the respirator to the air supply hose, a 50-foot section of neoprene air supply hose complete with the corresponding plug to attach the air supply hose to your air source.

PREMAIRE CADET ESCAPE KITS

Approvals

The PremAire Cadet Escape Respirator is approved by the National Institute for Occupational Safety and Health (NIOSH) as an Open-Circuit, Pressure-Demand, Escape, Self-Contained Breathing Apparatus or Combination, Open-Circuit, Pressure-Demand, Escape, Self-Contained Breathing Apparatus and Type-C, Supplied-Air Respirator (TC-13F-542,543,544,545). The respirator is approved for use at temperatures above -25°F. The compressed-air container shall be fully charged with air meeting the requirements of CGA C-7.1 Grade D or higher quality. When supplied with respirable air through an air supply hose, the air supply pressure range shall be 70-90 psig, the hose length shall be 8-300 feet, and the air supply shall meet the requirements of CGA C-7.1 Grade D or higher quality.

The Assemble-To-Order System for PremAire Cadet Escape Respirator

Thousands of possible combinations lets you select just the right PremAire Cadet Escape Respirator for the job. The ATO System works by allowing users to create their own part numbers. Each digit of an ATO part number will represent a specific component, so that the entire part number represents a finished respirator built exactly to your desired specifications. Advantages of the ATO System include: you get the exact model of PremAire Respirator you need; no special orders, because all orders are customized; fresher cylinders from our continually rotated inventory; simplified ordering process; and timely delivery.

Air-Line Respirators

PremAire® Air-Supplied Respirator System

This full-face, pressure-demand, Type-C supplied-air respirator features a patented waist-mounted manifold for incredible flexibility. Dual-supply option lets users connect from one pressurized continuous air source to another—without losing continuity of airflow. The vortex tube option delivers whole-body temperature control for added comfort.

Features and Benefits

- Cost-efficient supplied-air respirator
- Modular system fit to match respiratory needs to the task at hand
- Lightweight, mask-mounted regulator provides high air flow
- Suitable for IDLH environments (with escape cylinder option)

Traditional MSA Part Numbers

See the following page for Assemble-To-Order information. For customers who require faster delivery, the most popular PremAire system combinations can still be ordered with a traditional MSA part number. These assemblies come with a medium hycar Ultra Elite Facepiece and nosecup with rubber harness. For these assemblies, quick-disconnects must be ordered separately (see page 42; you need a male plug with female 1/4" NPT (column 2), and a female socket assembly (column 5).

			<i>Must choose No Bypass option when ordering PremAire less an escape cylinder</i>						<i>Note: If you have selected the Dual-Supply option, you will need two of the same Quick-Disconnects. Just put one letter in the part number to indicate your selection, but when you calculate the price of your system, make sure you include a price for each Quick-Disconnect.</i>			
C-	PS											QUANTITY

* Unit requires use of a quick-disconnect for connection to air-line to maintain approval. All quick-disconnects listed are non-locking except for the Cejn chrome (J). Note: See page 44 for air-line hoses. Note: This matrix must only be used for ordering complete PremAire Systems. This matrix cannot be used for ordering individual components (i.e., facepieces, escape cylinders, etc.). Please order components separately using their standard MSA part number.

For applications strictly limited to non-IDLH atmospheres, NIOSH requires that the respirator system be configured without a bypass on the Firehawk Mask-Mounted Regulator (MMR). Please contact MSA Customer Service for more information.

Air-Line Respirators

Compressed Air-Line Accessories

MSA compressed air-line accessories help ensure proper air supply. Our pressure regulator helps maintain desired operating pressure, while our manifolds supply single source air to up to four respirators. MSA compressed air-line accessories are designed especially for use with MSA air-line systems.

Features and Benefits

- Enhance long-duration respiratory protection
- Ensure proper pressure and air quality
- Pressure regular reduces plant air system compressor pressure and maintains desired operating pressure
- Manifolds feature quick-disconnect assemblies and automatic shut-off outlets

Industrial Air Cart

The Industrial Air Cart permits up to 4 NIOSH-approved air-line respirators to be connected to 2 one-hour 4,500 psig breathing apparatus cylinders (not included). See table below for cylinder ordering information. A 60-minute cylinder will provide maximum air supply.

Features

- Two-wheel poly powder-coated cart, two sets of double-cylinder straps, air-line hose rack and adjustable pull handle.
- A 5,500 psig pressure regulator reduces the 4,500 psig cylinder air to the proper air-line respirator inlet pressure.
- Low-pressure cylinder alarm whistle.
- An outlet pressure gauge operates in 0-125 psig range.
- Four-outlet manifold is available with 4 outlet fitting options.

Cart Weight and Dimensions

Size: 35" H x 21" W x 15.25" D

Unit Weight: 38.5 pounds without cylinders

For more complete information, see Bulletin 0114-28.

TransportAir System:
High-Pressure
Configuration

PortAir System
with cart

The TransportAir™ System

The TransportAir System is available in two versions: one for high-pressure cylinders and one for low-pressure cylinders. Both versions consist of an impact-resistant handle with urethane-coated nylon straps that fit around a standard MSA SCBA air cylinder (purchased separately), a regulator, and a regulator-to-hose adapter. An Audi-Larm device is provided standard on the high-pressure system and is available as an option for the low-pressure system. Both systems are designed for use with MSA supplied-air respirators equipped with a dual-supply option. A major advantage of the dual-supply option is improved mobility; workers need not remain tethered to a single air-supply hose throughout a work period. For more complete information, see Bulletin 0114-21.

The PortAir® System

The PortAir System holds two standard SCBA air cylinders to provide firefighters, industrial personnel, confined-space workers, and others with a portable, compressed-air source any time an air-line device is required.

Designed for use with MSA pressure-demand supplied-air respirators, including dual-purpose self-contained breathing apparatus (SCBA), the PortAir System consists of a compact air-pressure regulating system housed in a lightweight, yet durable, anodized aluminum frame. For more complete information, see Bulletin 0114-21.

Air-Line Respirators

Quick-Disconnects for Air-Line Respirators and Air-Supplied Hoods

Quick-disconnect assemblies connect air-supply hoses to the manifold and to the air source. If you want to use a quick-disconnect to interconnect lengths of air-supply hose, you must use a locking-type quick-disconnect—specifically, the locking quick-disconnects listed in the yellow box at the bottom of this page. For more complete information, see the Pocket Guide to Air-Line Systems (Bulletin 0114-14-MC).

Breathing Air Distribution System Filtration Box

The Breathing Air Distribution System filtration system is housed in a rugged polymer case. It is equipped with three-stage filtration, a pressure regulator, a four-outlet manifold and a continuous flow 115 VAC carbon monoxide monitor. The filtration box may be used in a portable or stationary position. Two models of filtration boxes are available – one box provides 50 cubic feet of air per minute and a second provides 100 cubic feet of air per minute.

Portable Grade-D filtration system provides breathing air for up to four air-line respirators

	474043*	50ft, with brass hose coupling

* Recommended usable length 4–25ft

Cascade System Accessories

The following components are used to assemble a 2400 psi cascade system, which consists of a bank of respirable-air cylinders (user-supplied) that supply a flow of air to pressure-demand air-supplied respirators. Air-supply hoses are listed separately at left.

CASCADE SYSTEM ACCESSORIES	85078	Audi-Larm™ Warning Device, low-pressure CGA 346, 0–3000 psig
	492307	Audi-Larm™ Warning Device, high-pressure CGA 347, 0–5500 psig
	68850	Air Coupler Tee—low-pressure CGA 346, 0–3000 psig
	10081206	Air Coupler Tee—high-pressure CGA 347, 0–5500 psig
	68851	Air Pigtail—low-pressure CGA 346, 0–3000 psig
	10081205	Air Pigtail—high pressure CGA 347, 0–5500 psig
	68858	Air Cylinder Pressure Regulator, dual-gauge, 0–3000 psig
	633352	High-Pressure Air Cylinder Regulator, dual-gauge, 0–5500 psig
	55716	Male Air-supply Hose Adapter for Foster quick-disconnects (for PVC hose)
	69542	Union Adapter (required to attach male plug)

Manifolds

Required when using multiple (2–4) respirators from a single air source; some of these manifolds have quick-disconnect assemblies with automatic shut-off outlets. Note: Gauge required when greater than 10' between air-line point of connection and the regulator.

MANIFOLDS 4-outlet	47370	Manifold, with Foster quick-disconnect
	93931	Manifold, with Snap-Tite quick-disconnect
	488914	Manifold, less quick-disconnect
MANIFOLDS 2-outlet	84416	Manifold, with Foster quick-disconnect
	486053	Manifold, with Snap-Tite quick-disconnect
	84418	Manifold, less quick-disconnect

Air-line Filter

The MSA air-line filter removes a minimum of 99% of 0.3 micron and larger particulates, including dusts, mists, fumes, smoke, and petroleum vapors. Caution: It does not remove carbon monoxide. The air-line filter can be used at inlet pressures up to 125 psig. The pressure drop is one psig at a maximum rated air flow of 25 cfm.

AIR-LINE FILTER	81857	Air-line Filter - with 1/2" NPT female inlet and outlet
	488041	Air-line Filter - with 3/4"-16 straight threads
	484923	Replacement Filter Kit

Pressure Regulator

MSA's pressure regulator is used with a plant air compressor system to reduce compressor pressure to the desired operating pressure. The regulator maintains pressure on the outlet side until readjusted for use with inlet pressure of up to 125 psig.

PRESSURE REGULATOR	66716	Pressure regulator
-----------------------	-------	--------------------

Inlet Pressure Gauge

MSA offers an inlet pressure gauge that enables a user to check pressure at the inlet of the MSA Air Supply Hose, thereby assuring that air pressure is within the certified range. The gauge is supplied with Quick-Disconnect fittings.

INLET PRESSURE GAUGE	476734	Inlet pressure gauge, with Snap-Tite fitting
	476735	Inlet pressure gauge, with Foster or Schrader fitting
	476737	Inlet pressure gauge, with Hansen fitting
	492586	Inlet pressure gauge, less quick-disconnect*

*See Column 4 plug and Column 3 union on page 42.

Support Belts

MSA PVC belts are easy to decontaminate. If decontamination is not a factor, users may opt for an uncoated nylon web belt.

SUPPORT BELTS	9961	Web support belt (uncoated)
	473902	PVC support belt, clear
	492827	Polyurethane-coated nylon support belt, black

Escape Respirators

TransAire® 5 and TransAire 10 Escape Respirators

These self-contained devices help personnel escape dangerous and deadly atmospheres, including those with high concentrations of toxic gases or vapors or oxygen deficiency. Low profile, lightweight, and easy to carry, these escape respirators feature one-control operation for a swift exit.

Features and Benefits

- Provides emergency air in toxic or oxygen-deficient conditions; 5- and 10-minute standard-flow air supply
- Compact and lightweight for easy egress from tight spaces
- Fog-reducing hoods in urethane or Teflon easily fit over eyeglasses and facial hair
- Rugged, high-density polyethylene carrying case available
- Washable nylon cloth carrier can be worn on the waist, neck or shoulder

Ordering Information

TRANSAIRE 5 ESCAPE RESPIRATOR	10008292	TransAire 5 Escape Respirator complete (includes aluminum cylinder, carrier, hood tube, hood assembly)
	10066739	TransAire 5 Escape Respirator complete, less air (includes aluminum cylinder, carrier, hood tube, hood assembly)
TRANSAIRE 10 ESCAPE RESPIRATOR	10008293	TransAire 10 Escape Respirator complete (includes aluminum cylinder, carrier, hood tube, hood assembly)
	10083327	TransAire 10 Escape Respirator complete (includes fully-wound carbon fiber cylinder, carrier, hood tube, hood assembly)
	10066740	TransAire 10 Escape Respirator complete, less air (includes aluminum cylinder, carrier, hood tube, hood assembly)

Two-unit and single-unit wall mounting cases feature a chemical-resistant ABS plastic case which resists weathering, moisture, and corrosion to ensure escape respirators stay in ready-to-use condition.

ACCESSORIES	696192	Single-unit wall-mounting case
	696193	Two-unit wall-mounting case
	10012530	Single unit carrying case, yellow polyethylene, with handle, for all escape respirators

Custom Air V® Escape Respirators

Escape toxic gasses, vapors or oxygen deficiency with this quick-use, hooded emergency respirator. Features a high flow rate of 72 liters per minute (lpm) and a continuous flow of air from the compressed air cylinder. The flexible urethane hood reduces fogging and fits over eyeglasses and facial hair. Lightweight and easy to carry, the unit can also be wall-mounted, as needed.

Features and Benefits

- Provides emergency air in highly toxic or deadly environments
- 5-minute high-flow cylinder meets stringent air-flow requirements for extremely aerobic escape applications
- Quick-retracting protective cover saves precious time when donning the hood
- Weighs less than 5 pounds

Ordering Information

CUSTOM AIR V ESCAPE RESPIRATOR	10008292	Custom Air V Escape Respirator complete (includes fully-wound carbon fiber cylinder, carrier, hood tube, hood assembly)
	10066739	Custom Air V Escape Respirator complete (includes aluminum cylinder, hood tube, hood assembly), less air

About **Industrial SCBA**

Industrial Self-Contained Breathing Apparatus (SCBA) are designed for use in Immediately Dangerous to Life or Health (IDLH) atmospheres.

These are respirators that do not require compliance with NFPA-1981, the National Fire Protection Association's (NFPA) standard on open circuit breathing apparatus for firefighters.

Applications for Industrial Self-Contained Breathing Apparatus include industrial facilities, agricultural grain fumigation, water and waste water treatment plants, HazMat work, HVAC, oil, gas and petrochemical plants.

Industrial SCBA use compressed air cylinders that are available in low pressure (cylinders rated from 2216-3000 psig) and high pressure (cylinders pressurized to 4500 psig).

Optional air-line connections allow greater versatility.

All MSA SCBAs are "pressure-demand" apparatus designed to maintain a slight positive pressure of air inside the facepiece during inhalation and exhalation. Positive pressure helps prevent contaminants from seeping in around the facepiece, even if there should be small breaks in the face-to-facepiece seal.

The Industrial SCBA consists of the following basic components: Facepiece; mask-mounted regulator; first-stage regulator; carrier and harness assembly; cylinder; and end-of-service-time indicator (EOSTI).

Self-Contained Breathing Apparatus (SCBA)

AirHawk® II Industrial Air Mask

Lightweight, durable and economical, this SCBA is ideal for a variety of industrial-hazard applications. Choose from a variety of options for many of the system's major components including: facepiece; mask-mounted regulator; carrier and harness assembly; cylinder; and end-of-service-time indicator (EOSTI).

Features & Benefits

- Lightweight, durable, economical SCBA
- Pressure-demand maintains positive air pressure inside facepiece
- Choice of Ultra Elite or Advantage 4000 Facepiece
- Ergonomic carrier and harness assembly for comfortable, stable wear
- Detachable components for easy maintenance
- Easy-release friction buckles

Self-Contained Breathing Apparatus (SCBA)

FireHawk® M7 Air Mask

This advanced air mask features seven life-safety design components, providing the highest quality and protection against fire ground hazards. It is the highest quality SCBA available and is virtually bulletproof against fire ground hazard. Lightweight and easy to use, it's a stellar performer against impact, water ingress, temperature extremes (up to 500°F), and Chemical Warfare agents—giving firefighters a lifesaving edge.

Features and Benefits

- Patented PASS alarm performs at 500°F
- Lightweight and low-profile systems
- Facepiece cross-contamination check-valve
- Palm-sized regulators
- Comfortable Ultra Elite Facepiece
- Thermal alarm
- Time-remaining display
- Front and rear buddy lights
- Auto-dim HUD
- Large, drag-carrying handles
- Stainless steel cylinder band with cam-lock system

Value Configurations Option

FireHawk M7 Air Mask Less Pass

Your answer for basic, rugged, reliable SCBA protection at lower cost for applications where no PASS device is needed. All pneumatic and electronic components are the same as that of MSA's trusted FireHawk M7 Air Masks. The FireHawk M7 Value Air Mask meets NFPA 1981 and can be retrofitted for an integrated PASS device if needed. This SCBA meets NFPA 1981 and 1982 when a PASS device is added.

	Low Pressure	High Pressure	
FIREHAWK M7 LESS PASS	10121712	10121714	Double-pull harness, CBRN solid cover, slide-to-connect with threaded hose, pressure gauge, W/O PASS
	10121713	10121715	Double-pull harness, CBRN solid cover, push-to-connect with threaded hose, pressure gauge, W/O PASS

Self-Contained Breathing Apparatus (SCBA)

Facepiece Assemblies for FireHawk M7 Air Masks

Ultra Elite Facepiece

Combining state-of-the-art features with MSA's precision engineering, the Ultra Elite Full-Face mask is our top model in this range. The ergonomic design makes this a comfortable unit, while the 5-point harness makes it easy to put it on or take it off. The distortion-free coated lens provides a wide field of vision, while the unique airflow prevents lens misting. The face blank has a single-sealing flange and comes in rubber or silicone, while the speaking diaphragm makes communication easy.

Features and Benefits

- State-of-the-art mask provides excellent comfort and protection
- Distortion-free lens allows wide field-of-view
- 5-point harness allows easy on/off
- More than 40 different models include rubber and silicone versions
- Unique airflow prevents lens misting

Firehawk® MMR

The Firehawk Second-Stage Regulator features a unique Slide-To-Connect (STC) attachment system that allows firefighters to hang the regulator on the facepiece in the "ready position," then simply push it into the facepiece when SCBA air is needed. Two large release buttons automatically turn off the flow of air as the regulator is doffed. A dual-swivel feature on the pressure hose provides maximum freedom-of-head movement and the silicone hose material ensures hose flexibility even at very cold temperatures.

In addition to the STC system, MSA also offers a second connection option for the Firehawk Regulator, the Push-to-Connect (PTC). The PTC's Adapter self-centers the Firehawk Regulator and the loud dual sound of the regulator engaging onto the facepiece provides you with confidence that the Firehawk PTC is securely attached to your facepiece—an action that takes just seconds.

MSA M7 I-HUD Receiver for FireHawk M7 Air Mask

- Wireless M7 I-HUD Receiver contoured shape fits securely inside firefighter's Ultra Elite Facepiece
- Nearly 40% lighter than external M7 HUD Receiver
- Placement inside facepiece eliminates snag point
- Unit automatically awakes and sleeps based upon pairing with SCBA
- Wireless magnetic radio transfers actual SCBA data via IEEE 802.11 network
- Enhanced light pattern for safety and security differentiation
- Displays SCBA cylinder pressure in quarter-cylinder increments
- If telemetry-equipped PASS device is used, M7 I-HUD Receiver displays evacuation alarm
- Red "buddy lights" in three locations alert other firefighters to low cylinder pressure, or motion alarm
- Powered by single, disposable CR2 lithium battery
- Low battery condition displays via single LED flash on display's left side; low battery SCBA condition displays as double flash
- TEST function button to verify functionality before use

Durability Testing

- M7 I-HUD Receiver survives two-meter drop test when mounted inside Ultra Elite Facepiece
- IP67-rated to withstand extreme hot and cold environments
- Vibration testing to NFPA 1981 standards
- Protection against short-time water submersion for thorough facepiece cleaning

Note: M7 I-HUD Receiver is not compatible for use with FireHawk M7 Less PASS SCBA.

ClearCommand® Communications System

MSA's ClearCommand Communications System features an internally mounted microphone coupled with a large-diameter (50mm) amplified speaker for optimal clarity and volume. Using a proprietary circuit design, the system delivers more than twice the volume of a facepiece alone. The ClearCommand System doesn't block vision or mechanical communication. The Ultra Elite Facepiece's mechanical speaking diaphragm is still fully functional, even with the system installed.

Emergency Egress System: MSA Rescue Belt II System

Rappel to safety with this innovative, quick-release device for emergency egress. Ergonomically contoured, it easily stores rescue rope, hook or carabiner and descender. Ideal for extreme conditions, it features a web management system that also integrates a regulator holder. One belt fits all (up to 310 pounds, including equipment).

Features & Benefits

- Single-handed pouch opening for rapid deployment of hook and descender
- Ergonomically contoured rope lumbar pad for handling ease and comfort
- Durable Ara-Shield construction
- Low-profile steel D-ring for positioning attachment
- 10- and 15-foot end markers
- Termination knot easily releases under load, even with gloved hands
- Quick-release system for SCBA drop in emergency situations
- No special tools or training required

FireHawk M7 Carrier and Harness Assembly

The one component of any SCBA that has the most impact on firefighter comfort is the carrier and harness assembly. The FireHawk M7 Carrier and Harness assembly places an emphasis on firefighter comfort while maintaining the robustness and reliability that is expected in the fire service. The carrier comes standard with large side handles and a central attachment point for pulling firefighters to safety in rescue scenarios. The swiveling lumbar pad provides maximum freedom of movement and comfort when crawling or climbing.

The assembly utilizes the proven components from previous generations of air masks such as the tunneled shoulder straps for hose containment, and tri-bar slides for easy removal/installation of the waist belt and shoulder straps. All units are equipped with double-pull waist belts and an optional chest strap is available.

Field Maintenance and Repair

MSA offers a complete program for maintenance and repair of MSA air masks. The program is supported with personalized training tailored to customers' needs and taught in the field by MSA-authorized personnel.

User maintenance covers procedures necessary to conduct general cleaning, inspection, and limited maintenance in accordance with the Occupational Safety and Health Administration (OSHA), National Fire Protection Association (NFPA), and the American National Standards Institute (ANSI) standards.

C.A.R.E. Certified Air Mask Repair Education covers all maintenance for both low- and high-pressure SCBA. Air Mask inspection and maintenance can be performed by MSA or a factory-authorized service center. Or, individuals can obtain training for C.A.R.E. certification from MSA. By having a C.A.R.E.-certified technician on staff, fire departments and other facilities with a large number of Air Masks can perform all inspection and maintenance in-house.

- All repairs and maintenance can be done in the field.
- A selection of overhaul kits, spare parts, and tool kits is available.
- Users may conduct periodic performance testing using an authorized MSA regulator tester.

Self-Contained Breathing Apparatus (SCBA)

MSA Accountability System

MSA's FireHawk M7 Accountability System revolutionizes fireground safety by combining the latest computer software with a high-performance radio module and the field-proven technology of MSA's ICM TxR Integrated PASS.

A new way to monitor vital information

- Each MSA base station can monitor up to 50 firefighters, and you can use multiple base stations on a single computer.
- The FireHawk M7 Air Mask with telemetry transmits to incident command the firefighter's name, team assignment, cylinder pressure, service-time remaining, PASS alarms (motion or manual), thermal alarms, battery status, radio connectivity, and evacuation acknowledgement.

A fireground management system

- Personalized ID tags for each firefighter tell incident command exactly who is on scene.
- An integrated PAR (personnel accountability report) timer helps manage radio calls to each team.
- Incident command can manually add firefighters who are not wearing an SCBA or mutual aid firefighters, so all personnel can be accounted for.

Intuitive and easy to use

- Assign firefighters to teams by clicking on a firefighter's icon and dragging it to another team.
- A volume of critical information is available at a glance of the screen, due to the large number of firefighters that can be displayed and the pictorial format of the information.
- Receive both audible and visual indications of critical events such as PASS alarms or low-pressure alarms.

A two-way evacuation feature

- An individual firefighter, a team of firefighters, or all firefighters can be evacuated with the click of a button.
- When incident command transmits the alarm through the FireHawk M7 Air Mask, they'll know the firefighter received it, because the unit automatically sends a confirmation message to the base station.
- Firefighters will hear the evacuation alarm on their own personal PASS device. Also, visual indications in the HUD and an icon on the control module will alert the firefighter that it is time to evacuate.
- By simply pressing a button on the control module, a firefighter can send a manual confirmation to acknowledge that they have received and understand the critically important evacuation message.
- Although certain concrete and steel commercial structures can challenge any radio signal, MSA's Accountability System coverage with radio technology provides highly reliable performance for a 1-mile line-of-sight range.
- Due to the spread-spectrum design, it does not interfere with other high-band radio frequency equipment.
- For additional safety, both base station and firefighter modules have an icon message to inform users if a firefighter falls out of radio signal range, so that alternate accountability measures, such as voice contact with teammates, can be taken.

Emergency Breathing Systems

The Quick-Fill® System

The patented Quick-Fill System lets MSA air mask users refill and transfill air cylinders while the SCBA is worn, without removing the air cylinder—even in IDLH atmospheres. Use this MSA-exclusive option to:

- Fill an SCBA cylinder from a mobile compressor or cascade system in less than a minute.
- Transfill between two cylinders, providing an Emergency Breathing System.
- Extend the air supply over longer durations, using a remote compressed-air source.

Because performance is not affected, MSA air masks retain NIOSH certification during use of the Quick-Fill System.

Air masks compliant to recent NFPA standards have the Quick-Fill URC fitting located at the Audi-Larm warning device. A Quick-Fill hose with a quick-disconnect connects the air source to the adapter for air transfer. See Bulletin 0105-92-MC for a Question & Answer overview of Quick-Fill Systems.

RescueAire™ II Portable Air-Supply System

The RescueAire II Portable Air-Supply System is designed to meet the needs of Rapid Intervention Teams (RITs). The system consists of a lightweight Carbon-Wrapped cylinder, Quick-Fill emergency breathing system, ExtendAire™ emergency breathing system, and an MMR regulator, supported by a flame- and heat-resistant harness. The RescueAire II is a complete system that can provide emergency breathing air for most any victim and is available in both low-pressure (2215 psig) and high-pressure (4500 psig) versions.

Ordering Information

RESCUEAIRE II PORTABLE AIR-SUPPLY SYSTEM <i>Low-pressure (2215 psig)</i>	10100096	RescueAire II, w/Firehawk Responder MMR and L-30 cylinder
	10041196	RescueAire II, Firehawk STC MMR and L-30 cylinder
	10041230	RescueAire II, Firehawk PTC MMR and L-30 cylinder
	10100095	RescueAire II, w/Firehawk Responder MMR, less cylinder
	10041198	RescueAire II, Firehawk STC MMR, less cylinder
RESCUEAIRE II PORTABLE AIR-SUPPLY SYSTEM <i>High-pressure (4500 psig)</i>	10041232	RescueAire II, Firehawk PTC MMR, less cylinder
	10100097	RescueAire II, w/Firehawk Responder MMR and H-60 cylinder
	10041195	RescueAire II, Firehawk STC MMR and H-60SL cylinder
	10041199	RescueAire II, Firehawk PTC MMR and H-60SL cylinder
	10100094	RescueAire II, w/Firehawk Responder MMR, less cylinder
	10041197	RescueAire II, Firehawk STC MMR, less cylinder
10041231	RescueAire II, Firehawk PTC MMR, less cylinder	

Self-Contained Breathing Apparatus (SCBA)

The ExtendAire™ I and II Systems

The ExtendAire™ System

The ExtendAire II System upgrade

The ExtendAire System can be used as both an emergency breathing system and a dual-purpose device for MMR SCBA to allow firefighters to quickly and easily connect to an air-line.

The new ExtendAire II offers an integrated rescue hose into the PR14 First-Stage Regulator with both a male and female quick-connect fitting.

Ordering Information

THE EXTENDAIRE I AND II SYSTEMS	812958	ExtendAire Air-line Hose with foster plug
	812973	40" Rescue Hose
	10031798	ExtendAire Upgrade Kit for Threaded Firehawk MMR

Technical Rescue Cart

Cart Weight and Dimensions

Size: 35" H x 21" W x 15" D

Unit Weight: 54.5 pounds without cylinders

The Technical Rescue Cart is a steel cart with a color-designated control panel that allows one side of the panel to be used for primary respirator breathing air and one side for tool/secondary air requirements.

Two 1-hour cylinders are used to provide air for respirators. High-pressure cascade (fire truck) cylinder air is used to operate pneumatic tools.

Features

Breathing-Air Segment includes:

- Two-wheeled, poly-coated steel cart, two sets of double-cylinder straps, air-line hose rack and adjustable pull handle
- Low-pressure cylinder bell alarm
- Four-outlet manifold—available with four outlet fitting options

Tooling-Air Segment includes:

- CGA-347 fitting to attach to an auxiliary remote high-pressure air source
- Low-pressure pneumatic alarm whistle
- Four-outlet manifold with quick-disconnects

The Technical Rescue Cart is sold without air cylinders. The following MSA cylinders can be used with the cart:

- 60-minute, H-60SL carbon-wrapped cylinder, PN 10127946-SP
- 45-minute, H-45SL carbon-wrapped cylinder, PN 10127945-SP
- 30-minute, H-30SL carbon-wrapped cylinder, PN 10127944-SP

See p. 54 for cylinder ordering information. 60-minute cylinders will provide maximum air supply.

ClearCommand® Helmet Communication System

The ClearCommand Helmet Communication radio interface system improves the sending and receiving of messages—even in high-noise environments. No pressure points means the system is comfortable to wear, and the reversible boom speaker assembly lets wearers position it over either ear. The system simply snaps onto fire or industrial helmet suspension.

Features & Benefits

- High-tech communication system improves communication
- Bone-conduction voice transmitter virtually eliminates high ambient noise
- Custom-fit speaker transmits all communication to the ear
- Easily snaps onto helmet's ratchet suspension
- Reversible boom speaker assembly for positioning over either ear

See pp. 60–61 for lapel mics, PTTs, and accessories.

ClearCommand® Communications System for Ultra Elite Facepieces

MSA's ClearCommand Communications System is available in two versions, amplifier and amplifier with radio interface. The systems are designed for "shared-use" of the amplifier with a unique "bus-bar" arrangement, so individual issue is not required.

The ClearCommand systems feature an internally mounted microphone coupled with a large-diameter (50mm) amplified speaker for optimal clarity and volume. Using a proprietary circuit design, the system delivers more than twice the volume of a facepiece alone. Mounted in an out-of-the-way position, the ClearCommand System doesn't block vision or mechanical communication. The Ultra Elite Facepiece's mechanical voicemitter is still fully functional, even with the system installed.

The radio interface version features the same amplifier as the amp-only version, combined with an ear-speaker for incoming radio messages and a lapel mic assembly for interface with over 100 radios. The lapel mic can be used as a component of the ClearCommand System or as a stand-alone hand mic.

Both the amplifier and radio interface models are intrinsically safe, and meet the applicable requirements of NIOSH and NFPA 1981, 2002 edition.

Self-Contained Breathing Apparatus (SCBA)

APR Adapter

The APR Adapter allows users to switch from a positive-pressure facepiece to a negative-pressure air-purifying respirator. The Adapter uses MSA's comprehensive line of air-purifying cartridges; select from Advantage cartridges or our CBA/RCA canisters to protect against a multitude of airborne contaminants.

The APR Adapter is designed for use in non-IDLH environments and is NIOSH-approved. Contact MSA for more information.

5 Reasons to Choose Cairns® Helmets by MSA

We've been proudly manufacturing helmets for the fire service since 1836; first under the Gratacap banner, then as Cairns & Brothers, and now as MSA. And to this very day, when it comes to head protection, more first responders trust Cairns than any other fire helmet brand. Here are just a few reasons why:

1. Our helmets can take the heat.

Because Cairns Helmets are up to 66% cooler than fire helmets without an impact cap, our helmets actually reduce your stress level, which means you can make better decisions more quickly when time is of the essence.

2. Our helmets can take the beating.

When you consider the combined effectiveness of our helmet shell, crumple-zone front holder, impact cap, tube-lock system, suspension straps and chinstrap, our fire helmets offer the most complete impact absorption system on the market. And when you view those elements in light of our exclusive shell release system, there's simply no comparison.

3. Our shell release system can give you a second chance.

Suppose you are wearing any of our competitor's helmets: if that helmet is torn off your head by a structure collapse or a fall through a roof or floor, only your Nomex hood stands between your head and the chaos around you.

Frankly, you deserve better. That's why we invented shell release. In this dire situation, your Cairns impact cap is designed to separate from your helmet shell and remain on your head, shielding you from heat, debris and projectiles as you search for the nearest exit or await rescue.

4. Our retractable Defender® Visor loves a good challenge.

Unlike other integrated visors, only our Defender Visor is tough enough to meet NFPA 1971 and ANSI Z87.1+, yet simple enough that you can change out the lens without needing tools or requiring helmet disassembly. Plus, because the entire lens stows between our helmet shell and impact cap when it's not in use, the Defender Visor is protected from fire ground heat and debris, and it can't be lost or misplaced. No wonder it's our top-selling eye protection!

5. Our helmets cost less.

Although you may pay more upfront for Cairns Helmets, our helmets actually cost less than our competitors' when you account for quality, durability and ease of maintenance over their 10-year lifetime (per NFPA 1851). And when you factor in the added value of the safety features above, there's no contest.

Traditional Structural Firefighting Helmets

Leather Helmets

Since 1836, Cairns has been the original manufacturer of leather firefighting helmets. Today's Cairns leather helmets retain the authentic look and quality that generations of firefighters have trusted with their safety.

- Models: N5A New Yorker and N6A Houston
- Handcrafted from 100% top-grain steer hide
- Hardened by our natural resin system
- Can be custom fit with our comfort pad kit

Composite and Thermoplastic Helmets

- Models: Cairns 1010, 1044 and 880 Tradition
- Our most popular style
- Meets NFPA 1971
- Provides superior and thermal impact protection
- Reduces risk of neck injury thanks to exclusive Shell Release System
- Available with our integral, retractable Defender Visor
- Available with DuraGlas® fiberglass composite or Ultem thermoplastic shell
- Available in a variety of colors and options

N5A New Yorker

Cairns 1010 Helmet with Defender Visor

Modern Structural Firefighting Helmets

- Models: Cairns 660C, 664, HP3 and 360S/R
- Sleek, low-profile modern style
- Meets NFPA 1971
- Provides superior and thermal impact protection
- Reduces risk of neck injury thanks to exclusive Shell Release System
- Available with our integral, retractable Defender Visor
- Available with DuraGlas fiberglass composite or Ultem thermoplastic shell
- Available in a variety of colors and options

Cairns 660C Helmet with Defender Visor

Modern Rescue Helmets

- Models: HP3 and 360R/R-13
- Sleek, low-profile modern style with no watershed
- Meets NFPA 1951
- Provides superior and thermal impact protection
- Available with our integral, retractable Defender Visor
- Available with DuraGlas fiberglass composite or Ultem thermoplastic shell
- Available in a variety of colors and options

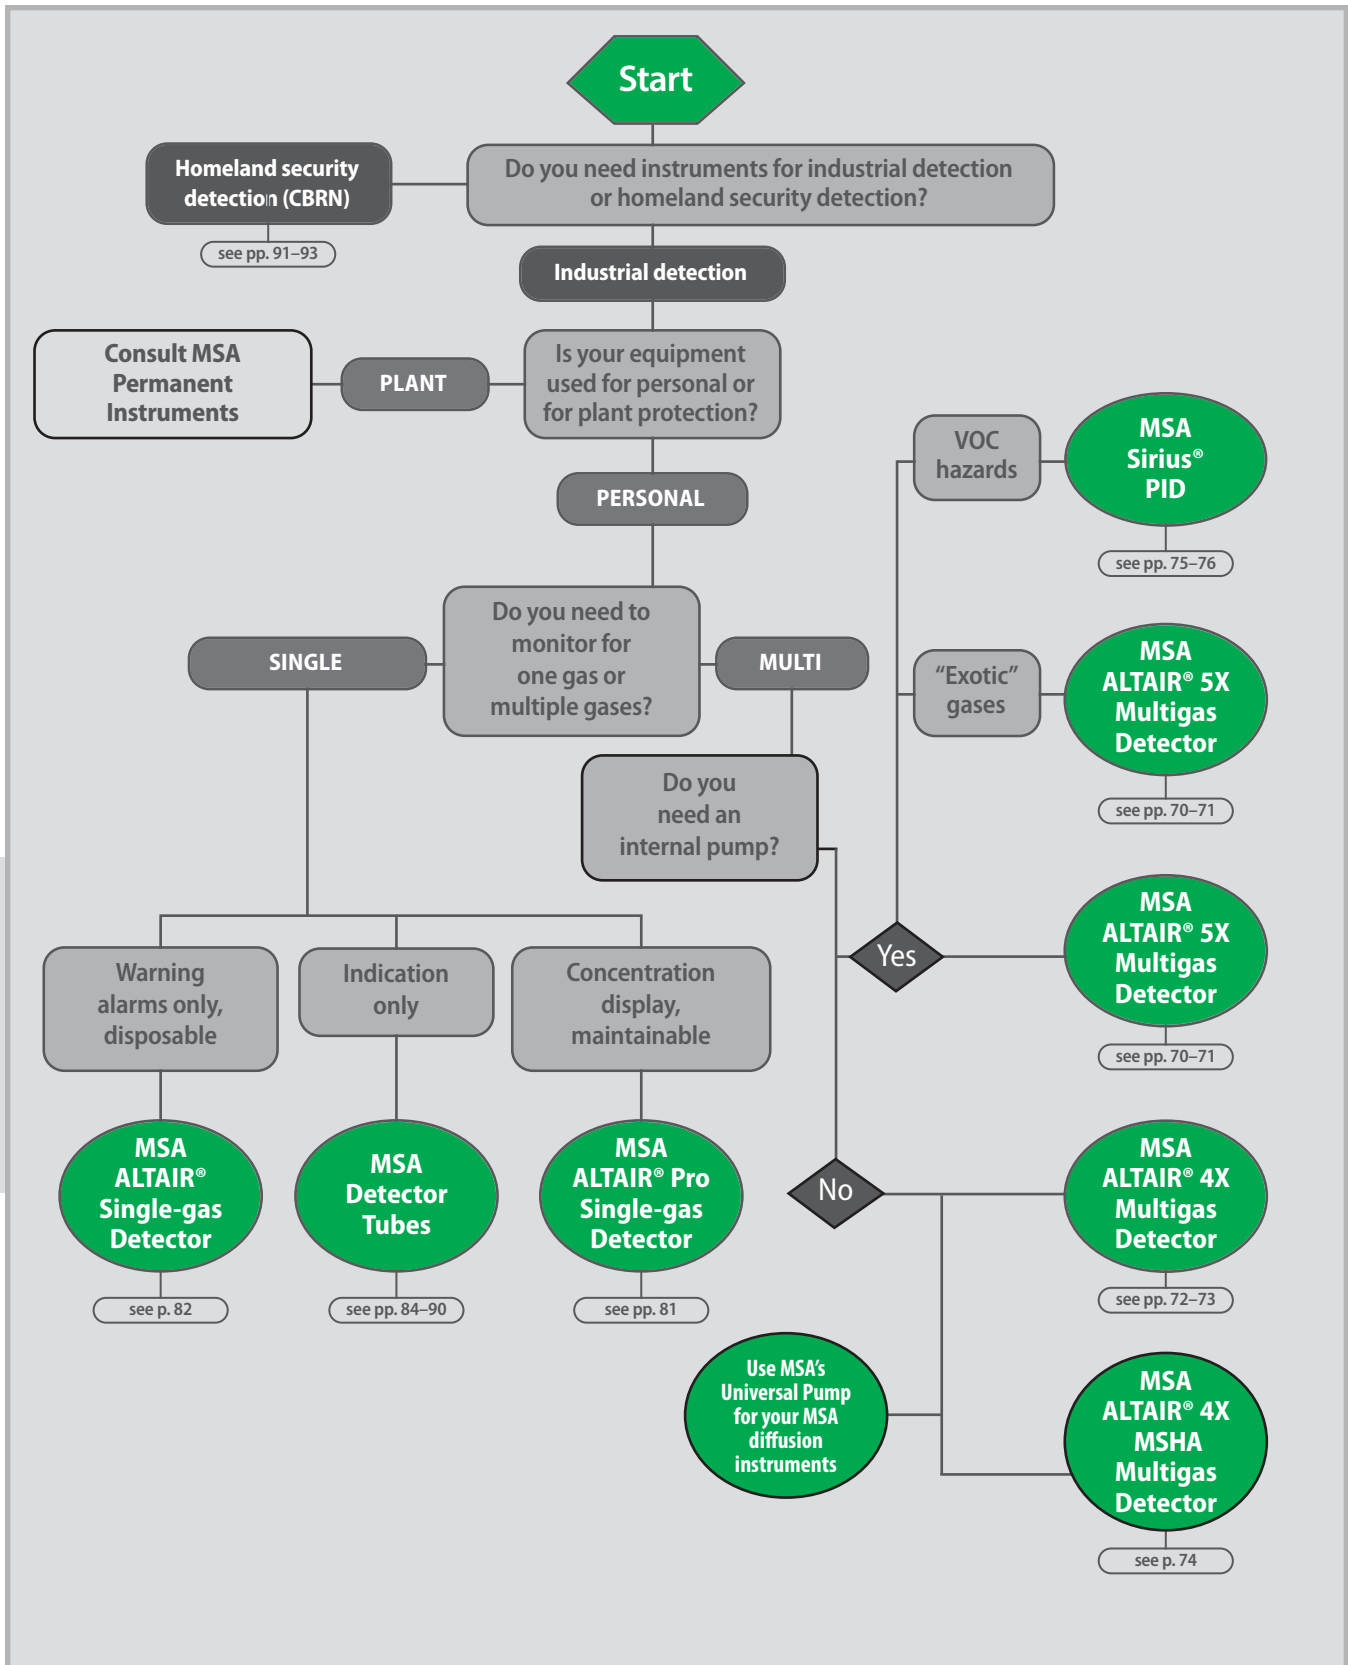

Cairns Commando HP3 Structural & Rescue Helmet with Defender Visor

Gas-Detection Instruments

Portable Instrument Selection Quick Guide

Gas-Detection Instruments

Understanding Environmental Surveillance

Battery-powered, direct-reading instruments are classified as two groups—**single-gas instruments** or **multiple-gas instruments**—typically monitoring one or a combination of the following atmospheric conditions:

1. *oxygen deficiency or enrichment*
2. *the presence of combustible gas*
3. *the presence of certain toxic gases*

Depending on the capabilities of the instrument, monitoring can be conducted simultaneously for oxygen and combustible gas, or for oxygen, combustible gas and toxic gases. These devices are commonly referred to as 2-in-1, 3-in-1, 4-in-1 or 5-in-1 alarms.

No matter which type of instrument is used to check environmental gas concentrations, regular monitoring should be performed because a contaminant's level of combustibility or toxicity might increase even if it initially appears to be low or non-existent. In addition, oxygen deficiency can occur unexpectedly.

Atmospheric Composition

To determine the composition of an atmosphere, reliable instruments should be used to draw air samples. If possible, do not open the entry portal to the confined space before this step has been completed. Sudden changes in atmospheric composition within the confined space could cause violent reactions, or dilute the contaminants in the confined space, giving a false low initial gas concentration.

Figure 1

Figure 2

The results of the atmospheric testing will have a direct impact on the selection of protective equipment necessary for the tasks in the area. It may also dictate the duration of worker exposure to the environment of the space, or whether an entry will be made at all. Substance-specific detectors should be used whenever actual contaminants have been identified.

Combustible Gases

In order for combustion to occur, there must be three elements:

1. *fuel*
2. *oxygen to support combustion*
3. *heat or a source of ignition*

This is known as the fire triangle, but if you remove any one of the legs, combustion will not occur (see *Figure 2*).

The percentage of combustible gas in the air is important, too. For example, a manhole filled with fresh air is gradually filled by a leak of combustible gas such as methane or natural gas, mixing with the fresh air. As the ratio of gas to air changes, the sample passes through three ranges: lean, explosive and rich (see *Figure 3*). In the lean range, there isn't enough gas in the air to burn. On the other hand, the rich range has too much gas and not enough air. However, the explosive range has just the right combination of gas and air to form an explosive mixture. Care must be taken, however, when a mixture is too rich, because dilution with fresh air could bring the mixture into the flammable or explosive range. An analogy is the automobile that won't start on a cold morning (a lean atmosphere because the liquid gasoline has not vaporized sufficiently), but can be flooded with too much gasoline (a rich atmosphere with too much

Figure 3

Figure 4

When testing permit-required spaces for acceptable entry conditions, always test in the following order:

1. *oxygen content*
2. *flammable gases and vapors*
3. *potential toxic air contaminants*

Comprehensive testing should be conducted in various locations within the work area. Some gases are heavier than air, and tend to collect at the bottom of a confined space. Others are lighter, and are usually in higher concentrations near the top of the confined space. Still others are the same molecular weight as air, so they can be found in varying concentrations throughout the space. This is why test samples should be drawn at the top, middle and bottom of the space to pinpoint varying concentrations of gases or vapors (see *Figure 1*).

vaporization). Eventually, when the right mixture of gas and air finally exists (explosive), the car starts.

How Combustible Gas Monitors Work

To understand how portable combustible gas detection instruments work, it is first important to understand what is meant by the Lower Explosive Limit (LEL) and Upper Explosive Limit (UEL). When certain proportions of combustible vapors are mixed with air and a source of ignition is present, an explosion can occur. The range of concentrations over which this reaction can occur is called the explosive range. This range includes all concentrations in which a flash will occur or a flame will travel if the mixture is ignited (see *Figure 3*). The lowest percentage at which this can happen is the LEL; the highest percentage is the UEL.

Most combustible instruments display gas concentrations as a percentage of the LEL. Some models have gas readouts as a percentage by volume and others display both percent of LEL and percent combustible gas by volume. What's the difference? For example, the LEL of methane (the major component in natural gas) is 5 percent by volume, and the UEL is 15 percent by volume. If we slowly fill a room with methane, when the concentration reaches 2.5 percent by volume, it is 50 percent of the LEL; at 5 percent by volume it is 100 percent of the LEL. Between 5 and 15 percent by volume, a spark could set off an explosion.

Different gases need different percent by volume concentrations to reach 100 percent of the LEL (see Figure 4). Pentane, for example, has an LEL of 1.5 percent by volume. Instruments that measure in percent of the LEL are easy to use because, regardless of the gas, you are most concerned with how close the concentration is to the LEL.

Single-Gas Monitors for Oxygen Deficiency

Oxygen indicators measure atmospheric concentrations of oxygen. Concentrations are generally measured over a range of 0 to 25 percent oxygen in air, with readings displayed on either digital readout or an analog meter.

Oxygen indicators are calibrated with uncontaminated fresh air containing a minimum of 20.8 percent oxygen. With some models, an alarm is activated when oxygen levels drop below 19.5 percent.

Single-Gas Monitors for Toxic Gases

Compact, battery-powered devices can be used to measure levels of such gases as carbon monoxide (CO) or hydrogen sulfide (H₂S), depending on the model selected. Toxic gas monitors use electrochemical cells (see Figure 6). If the gas of interest enters the cell, the reaction produces a current output proportional to the amount of gas in the sample. With these instruments, audible and visible alarms sound if the gas concentration exceeds a preset level. These devices are well suited for use in confined spaces containing motors or engines, which can generate large quantities of CO, as well as in sewers, waste treatment plants and "sour crude" processing stations which tend to have hazardous volumes of H₂S.

Multiple-Gas Monitors for Oxygen and Combustible Gas

In applications where it is necessary to determine oxygen and combustible gas levels simultaneously, 2-in-1 devices can be used. Sensors measure 0 to 100 percent of the LEL and oxygen from 0 to 25 percent. Remote sampling with a diffusion device requires either a pump module or an aspirator bulb adapter.

Photoionization Devices for Toxic Gases and Vapors

A photoionization detector uses ultraviolet light to ionize molecules of chemical substances in a gaseous or vaporous state (see Figure 7). A real-time digital readout allows the user to make an immediate determination of gas and vapor concentrations. Depending upon calibration input, gas and vapors are measured over a 0.1 to 10,000 ppm scale. Some instruments automatically compensate for signal loss due to humidity, which is inherent in all PID detectors.

Figure 5

Figure 6

Figure 7

Single-Gas Monitors for Combustible Gases

Single-gas instruments for monitoring combustible gases and vapors are generally calibrated on pentane and are designed for general-purpose monitoring of hydrocarbon vapors. Such instruments operate by the catalytic action of a heated platinum filament in contact with combustible gases (see Figure 5). The filament is heated to operating temperature by an electric current. When the gas sample contacts the heated filament, combustion on its surface raises the temperature in proportion to the quantity of combustibles in the sample. A Wheatstone bridge circuit, incorporating the filament as one arm, measures the change in electrical resistance due to the temperature increases. This change indicates the percentage of combustible gas present in the sample.

Calibration

To ensure the accuracy of all monitoring and detection equipment, calibration should be performed regularly. If the instrument reading differs significantly from the values of the known standard, the instrument should not be used until it has been adjusted or, if necessary, repaired.

ALTAIR® 5X Multigas Detector

The rugged, multi-featured ALTAIR 5X Multigas Detector boasts several options that provide maximum safety and make it easy to use in even the most demanding situations. It features large buttons for easy use, and its polycarbonate housing protects the detector from drops of up to 10 feet. The detector also boasts the exclusive MotionAlert™ Function, which lets others know if the user has become immobile, and InstantAlert™ Panic Button, a manual alarm that alerts others if a dangerous situation has arisen. Available glow-in-the-dark housing makes it easy to see in a confined space, while the large buttons and bright display makes operation possible even when the user is wearing gloves.

Features and Benefits

- Rugged detector tests levels of LEL, O₂, CO, H₂S and SO₂, and other toxic gases
- Rapid bump test gives results in under 15 seconds
- Versatile MSA Link™ Software allows user to transmit data to a computer
- MotionAlert option tells others that user has become immobile
- InstantAlert provides manual alarm to alert others of a dangerous situation
- Large buttons and bright display provide easy operation, even when user is wearing gloves
- Durable XCell sensors last longer than 3 years
- Rugged housing protects detector from drops of up to 10 feet
- Exclusive end-of-sensor warning cautions user when unit's sensor must be changed
- Polycarbonate housing is both dust-tight and water-tight

Gas-Detection Instruments

ALTAIR 4X Multigas Detector

The ALTAIR 4X Multigas Detector surpasses industry standards in several crucial areas. Its four-year sensor life is 60% longer than the industry average, while its 24-hour run time exceeds the industry average by 71%. This versatile portable detector is a perfect match for industries ranging from fire fighting to welding, and its digital sensor output makes it less likely to suffer from RF interference. The unit features exclusive MotionAlert Function, which lets others know if the user has become immobile, and InstantAlert Panic Button, a manual alarm that alerts others of potentially dangerous situations. This rugged unit is designed to withstand a drop of up to 20 feet and uses less than half as much calibration gas as the industry average.

Features and Benefits

- Dependable multigas detector tests for LEL, O₂, CO, H₂S and NO₂.
- Economical construction saves users more than 50% on calibration gas, replacement sensors and maintenance
- Four-year sensor life means detector lasts 60% longer than the industry average
- Unit uses 50% less calibration gas per minute than the average detectors within the industry
- Two-tox CO/H₂S sensor removes practically all cross-channel interference
- Large buttons and high-contrast screen make operation easy in low-light conditions
- Ribbed rubber housing provides secure grip and high durability
- Unit features 95+ db alarm and ultra-bright LEDs
- Exclusive end-of-sensor warning cautions user when unit's sensor must be changed
- MotionAlert option tells others that user has become immobile
- InstantAlert provides manual alarm to alert others of a dangerous situation

ALTAIR 4X MSHA Multigas Detector

Optimized for Miners

Building on years of design experience, MSA revolutionizes sensor technology with breakthroughs that improve mining application performance:

- Methane-optimized catalytic bead sensor provides increased stability over time
- Sensor response and clear times in less than 15 seconds
 - Reduces gas usage for bump testing and calibration
- Greater accuracy and repeatability within changing environmental conditions
 - Temperature, humidity and pressure
- Digital sensors offer increased RF (radio frequency) immunity
 - Eliminate false alarms from radios
- Accurate CO readings from 0-2000 ppm
- Industry-first CO/NO₂ combination sensor with wide range and fast response times
- Increased methane sensor poison resistance decreases down time and frequency of sensor replacements
- End-of-sensor life warning gives advanced notice of failing sensors
- Sensor life that greatly exceeds industry average

ALTAIR Pro Single-Gas Detector

ALTAIR Pro family of gas detectors

Based on the industry-standard ALTAIR Single-Gas Detector—but with added features and functionality—ALTAIR Pro toxic gas and oxygen detectors combine reliable detection and LED/audible/flashing/vibrating alarms with clear, backlit LCD displays. Electrochemical sensors measure concentrations of toxic gas (ammonia, carbon monoxide, chlorine, chlorine dioxide, hydrogen cyanide, hydrogen sulfide, nitrogen dioxide, phosphine and sulfur dioxide) or percent oxygen. Purpose-built for superior dust and water protection, excellent impact resistance and excellent RFI performance.

Features and Benefits

- Gas concentration (NH_3 , CO , Cl_2 , ClO_2 , HCN , H_2S , NO_2 , PH_3 and SO_2) or percent oxygen displayed on a large, clear, backlit LCD
- Unit detects CO , H_2S , O_2 , NH_3 , Cl_2 , ClO_2 , NO_2 , SO_2 , HCN and PH_3
- Automatically records the last 50 alarm/test events while simultaneously recording peak gas readings or low O_2 readings every three minutes in a periodic data log
- User can read data or change alarm set points by connecting unit to MSA Link via built-in IR communication port
- Adjustable alarm set points
- No-miss quad alarm system includes bright flashing LEDs, piercing audible alarm, LCD notification, and an internal vibrating alarm
- Rubberized armor housing and one-button operation for maximum durability and simplicity
- Easy alarm check, bump check, fresh air zero, and calibration
- Easily replaceable batteries and sensors

ALTAIR Maintenance-Free Single-Gas Detector

Designed for superior lifespan—patented sensors operate for over two years—and high performance, the ALTAIR Single-Gas Detector is the smart choice for market-leading, cost-effective gas monitors. Features sensor options for carbon monoxide, hydrogen sulfide, and oxygen coupled with LED/audible/vibrating alarms. Superior dust/water protection, high RFI resistance, and one-button operation provide heightened safety, plus increased durability and ease-of-use.

Features and Benefits

- Sensor options for CO, H₂S, and O₂
- Patented electrochemical sensors and MSA-built button sensors
- Stainless steel and solid electrolyte construction virtually eliminate sensor leakage
- Automatically records the last 25 alarm/test events and can communicate data by connecting to MSA Link via built-in IR communication port
- No-miss triple alarm system includes bright flashing LEDs, piercing audible alarm, and an internal vibrating alarm
- Rubberized armor housing and one-button operation for maximum durability and simplicity

ALTAIR Quick-Check Station

The ALTAIR QuickCheck Station uses several tests to make sure ALTAIR and ALTAIR Pro Detectors are fully ready for action. The station administers a bump test to make sure the detector responds to a specified concentration of gas. The station also uses a microphone and electronic check to ensure the detector's audible, visual and vibrating alarms are good to go. With easy-to-understand LEDs, the QuickCheck Station tells a user which test is being administered and whether the detector passed or failed.

Features and Benefits

- Station administers a bump test and uses a microphone and electronic check to ensure a detector is ready for action
- Station is compatible with all 3 ALTAIR Detector versions (CO, H₂S and O₂) and with ALTAIR Pro O₂, H₂S, CO, CO Fire and CO Steel detectors
- Station comes in manual and automatic versions
- Easy-to-see LEDs give simple-to-understand test results

Ventilation Smoke Tube Kits

MSA's Ventilation Smoke Tube Kits are for use where controlled generation of a visible smoke is desired in order to determine the velocity of slow-moving air currents and establish their direction and flow patterns in shafts, mines and tunnels. They can also be used in commercial buildings and industrial processing plants to determine velocity and flow patterns of heating, ventilating, and air-conditioning systems.

VENTILATION SMOKE TUBE KITS	458481	Ventilation Smoke Kit, including aspirator bulb, two rubber plugs, and six smoke-producing tubes contained in plastic carrying case
	5607	Ventilation Smoke Kit, including aspirator bulb, six tube caps, and two glass smoke-producing tubes contained in plastic carrying case
	458480	Ventilation smoke tubes, box of 12
	5645	Glass smoke tubes, box of 10

Kwik-Draw® Detector Tube Pumps

MSA's Kwik-Draw and Kwik-Draw Deluxe Pumps can be used with an assortment of MSA detector tubes to spot-test atmospheres for a wide variety of toxic substances. They are designed for one-hand operation and consistent delivery of a sample draw volume of 100 milliliters (ml).

KWIK-DRAW DETECTOR TUBE PUMPS	488543	Kwik-Draw Basic Pump, with remote sampling adapter and carrying pouch
	487500	Kwik-Draw Deluxe Pump, with remote sampling adapter, carrying pouch and end-of-stroke indicator

HAZMATCAD® and HAZMATCAD® Plus Chemical Agent Detectors

The clear choices for initial assessment of chemical warfare agent or toxic industrial spill, the HAZMATCAD and HAZMATCAD Plus Chemical Agent Detectors detect both chemical warfare agents and selected toxic industrial chemicals (TICs). Ruggedly constructed, compact and lightweight, each is designed for ease of use and requires no prior training—a single button press begins automatic sampling and analysis. Utilizes both audible and visual alarms for clear, simple condition display.

Features and Benefits

- HAZMATCAD utilizes Surface Acoustic Wave (SAW) microsensors
- HAZMATCAD Plus utilizes both SAW technology and electromechanical cells
- Single-key automatic sampling and analysis
- Alphanumeric system display with both audible and LED alarms
- Operates 8–12 hours using lithium-ion rechargeable batteries
- Rapid warm-up with self-diagnostic check
- RS 232 and IrDA communication ports store up to eight hours of data
- Includes battery charger, belt clip, two long-life lithium-ion rechargeable batteries, waterproof carrying case, vapor check source and operating manual

HAZMATCAD Detector Kit Ordering Information

Kits include: HAZMATCAD Detector battery charger; belt clip; two Sony rechargeable batteries; hard, water-resistant carrying case; operating manual; vapor check source.

HAZMATCAD DETECTOR KITS	10055094	HAZMATCAD Detector	<i>Chemical Agents Detected: Nerve and Blister</i>
	10055095	HAZMATCAD Detector	<i>Chemical Agents Detected: Nerve, Blister and Hydrogen Cyanide</i>
	10055096	HAZMATCAD Detector	<i>Chemical Agents Detected: Nerve, Blister and Phosgene</i>
	10055097	HAZMATCAD Plus Detector	<i>Chemical Agents Detected: Nerve and Blister agents and TICs (phosgene, hydrogen cyanide, halogen and hydride gas)</i>

HazMat Response Kit

The HazMat Response Detector Tube Kit can be used by firefighters, HazMat Response Teams and other workers to help classify unknown chemical gases and vapors at accident or spill sites.

Features and Benefits

- Quickly classifies unknown chemical gases and vapors
- Quad-Port Sampler allows simultaneous testing with four detector tubes, meaning less time in IDLH atmosphere
- Flow-limiting orifices ensure even sample flow
- Portable and easy to handle
- Includes simple interpretation guide

Ordering Information

HAZMAT RESPONSE KIT	807472	Includes 12 types of detector tubes, multiple tube holder, Kwik-Draw® Pump and interpretation guide

SAFESITE® Multi-Threat Detection System

SafeMTX® Multi-Threat Detector

SafeCOM™ Command Center

HAZMATCAD Plus Detector with SAFECOM Belt-Bridge

Sirius PID Multigas Detector with SAFECOM Belt-Bridge

SAFESITE Multi-Threat Detectors

Monitor, detect and alert to potential threats with these advanced detection systems. Provides critical information and data for rapid decision-making in the face of chemical, gas, radiation and other hazard-inducing conditions. Flexible, scalable and customizable, these detection systems offer superior preventive and countermeasure solutions for first responders, law enforcement, government agencies and more.

Features and Benefits

- State-of-the-art, 24/7 threat detection and advanced communication capabilities
- Detects a variety of threats, including chemical warfare agents, gamma radiation, volatile organic compounds, combustible gas and more
- Ideal for numerous applications, including homeland security, emergency response, public events, mass transportation and perimeter monitoring
- Multiple-system integration and management
- Wired or wireless network access
- Delivers precise results with fewer false positives

SAFECOM Belt-Bridge with Sirius Wireless Interface

For thorough gas detection and seamless communication in emergency situations, the SAFECOM Belt-Bridge with Sirius Wireless Interface provides excellent results. Used in conjunction with a Sirius Multigas Detector, the belt-bridge allows users to transmit data from a remote location to a SafeCOM Command Center. The work begins with the Sirius Multigas Detector, which features PID and detection for CO, H₂S, O₂ and combustible gases. The detector sends its data to the user's belt-bridge via Bluetooth technology. The belt-bridge then converts the signal and transmits the data—plus the user's GPS location—to a SAFECOM command center via a one-watt, spread spectrum, frequency hopping 900 MHz radio for up-to-the-moment results when seconds count.

Features and Benefits

- Belt-Bridge converts data from Sirius Multigas Detector and transmits to SAFECOM Command Center up to two miles away
- Belt-Bridge uses a one-watt, spread spectrum, frequency hopping 900 MHz radio to ensure results are received
- GPS tracking provides real-time updating

Threat	Technology	Benefit
CHEMICAL WARFARE AGENTS	Surface acoustic wave (SAW)	Low false positives and false alarms, differentiates nerve and blister agents
GAMMA RADIATION	Cadmium zinc telluride (CZT)	Sensitive with adjustable threshold and 2 ranges. (0-100 mR/hr, 0.1 mR/hr resolution and 0-1000 mR/hr, 1 mR/hr resolution)
VOLATILE ORGANIC COMPOUNDS	Photo-ionization (PID)	10.6 eV lamp provides ppm readings for broadband toxics and VOC detection
TOXIC INDUSTRIAL CHEMICALS	Electrochemical	Detects many specific toxic gases such as chlorine, ammonia, hydrogen cyanide and hydrogen chloride
OXYGEN DEFICIENCY ENRICHMENT	Electrochemical	Oxygen monitoring for confined space
COMBUSTIBLE GAS	Catalytic bead	Wide range detection for hydrocarbons

ADASHI First Responder Software helps emergency responders manage, communicate and respond to dangerous incidents.

BIOSENSOR™ 2200R Biological Agent Detector

With its exclusive five minute time-to-answer, the BIOSENSOR 2200R Biological Agent Detector delivers state-of-the-art, rapid detection, analysis, and identification of biological agents in a handheld instrument. Harnessing bioassay technology for excellent sensitivity and low false positives, this highly accurate detection method provides rapid measurement of biohazards such as anthrax, ricin, botulism, SEB, and plague. Patent-pending dynamic surface generation combines the benefits of both the free solution and lateral flow types for faster analysis, a user-friendly format, and detector stability across multiple climates.

Features and Benefits

- Highly accurate bioassay technology
- Five minute time-to-answer
- Tests both wet and dry samples
- Nondestructive tests allow for sample retention
- Uses positive and negative control cartridges
- Battery-operated with ability to run 50 tests on a single charge
- Fully deconable, IP67 rated housing
- Both visual and audible alarms for clear status indication
- One hour training time
- Integrated RFID (radio frequency identification) for automatic cartridge recognition
- Permanently housed in sturdy, lightweight Pelican case.

Ordering Information

BIOSENSOR 220R BIOLOGICAL AGENT DETECTOR	10084834	MSA BIOSENSOR 2200R Biological Agent Detector Kit*, includes carry case, charger, cartridge starter kit (10084758), instruction manual, and quick start guide.
BIOSENSOR CARTRIDGE PLANS	10084758	MSA BIOSENSOR cartridge starter kit includes 3 Anthrax/Ricin dual kits**, 1 Anthrax, 1 Ricin, 3 positive control, 2 negative control cartridges, and 2 wet sample kits
	10084753	MSA BIOSENSOR Low volume cartridge plan includes 6 Anthrax/Ricin dual kits**, 2 Anthrax, 2 Ricin, 6 positive control, 2 negative control cartridges, and 2 wet sample kits
	10084754	MSA BIOSENSOR Medium volume cartridge plan includes 24 Anthrax/Ricin dual kits**, 6 Anthrax, 6 Ricin, 24 positive control, 6 negative control cartridges, and 4 wet sample kits
	10084755	MSA BIOSENSOR High volume cartridge plan includes 60 Anthrax/Ricin dual kits**, 8 Anthrax, 8 Ricin, 60 positive control, 8 negative control cartridges, and 6 wet sample kits.

* Extended warranties available.

** Each biohazard cartridge test kit includes a dry sample kit. Please contact your local MSA rep for more information.

GALAXY® GX2 Automated Test System

The new GALAXY GX2 Automated Test System provides simple and intelligent testing and calibration of MSA ALTAIR® and ALTAIR PRO Single-Gas Detectors, as well as ALTAIR 4X and ALTAIR 5X Multigas Detectors, driven by the most advanced technology available in any portable gas detector: MSA XCell® Sensors.

This easy-to-use automated test stand offers high performance as either a stand-alone unit or an integrated portable detector management system, enabling total data access and control of your MSA ALTAIR Gas Detector fleet.

Once any ALTAIR Family Gas Detector is placed within the GALAXY GX2 System, it can be tested, calibrated and charged automatically.* Flexibility allows for up to 10 test stations, four cylinder holders and multi-unit charger within one GALAXY GX2 System detector bank.

Features and Benefits

- Color touchscreen for ease of setup and viewing; no touch operation is needed for calibration or bump test
- Visual indicators on GALAXY GX2 System and software
- RFID automated calibration gas setup, status alerts and traceability
- MSA Link Pro and MSA Link Software
- Global platform—many language options
- Significant cost of ownership reduction when used with MSA XCell Sensors
- Simultaneous testing of up to 10 gas detectors
- Securely configure gas detectors at the touch of a button
- MSA XCell Sensor Technology
- Your MSA ALTAIR Multigas Detectors are always ready for use*

Galaxy GX2 Assemble-To-Order (ATO) Options

To create your Galaxy GX2 Test System configuration, select the instrument option codes and mark them in the boxes to the right.

A	TEST STAND INSTRUMENT TYPE	Each instrument type has a dedicated GALAXY GX2 System test stand. 10 test stands can be banked together in any combination, allowing for ultimate flexibility.	Test Stand Options ALTAIR/ALTAIR Pro Detector ALTAIR 4/4X Detector ALTAIR 5/5X Detector	Code A B C	Selection
B	ACTIVE CYLINDER PORTS	Single valve test stands allow for only one calibration cylinder to be used. 4 valves allow for 1-4 calibration cylinders to be accessed.	Calibration Cylinder Options 1 Valve / 1 Cylinder 4 Valves / Up to 4 Cylinders	Code 1 4	Selection
C	INSTRUMENT CHARGING	Instrument charging allows for a single instrument to be charged per test stand. Only available on ALTAIR 4/4X and ALTAIR 5/5X Multigas Detector test stands. Choose Yes/1 if you wish to use the "always ready" function of ALTAIR 4X or ALTAIR 5X Detectors. <i>* Contact your local sales representative regarding availability.</i>	Test Stand Options No Yes	Code 0 1	Selection
D	SMART CYLINDER HOLDER	Smart cylinder holder provides calibration gas information and gas levels. Information such as part number, gas types, concentrations, expiration date, lot number, and real time pressure levels are automatically set up in the test stand. Smart cylinder holder provides end users with automated, remote warnings as to low or no gas and expired or nearly expired cylinders.	Smart Cylinder Holder Options None 1 Cylinder Holder 2 Cylinder Holders 3 Cylinder Holders 4 Cylinder Holders	Code 0 1 2 3 4	Selection
E	MULTI-UNIT CHARGER	Selection of ALTAIR 4/4X Detector and multi-unit charger provides charging for 1-4 ALTAIR 4/4X Detectors. Selection of ALTAIR 5/5X Detectors and multi-unit charger provides charging for 1-4 ALTAIR 5/5X Detectors.	Multi-unit Charger Options None Multi-unit charger	Code 0 1	Selection
F	POWER CORD	Each test stand (with the exception of Argentina version) comes with 6V power supply. Power cord option then chooses the appropriate power cord by region. None provides power supply and no power cord. Argentina version provides no power supply and no power cord.	Power Cord Options North America Europe United Kingdom Australia Argentina None	Code N E U A R 0	Selection
G	MSA LINK™ PRO SOFTWARE	Proactively manage safety by addressing gas exposure information and missing or failed calibration and bump tests. End user receives software on digitally-keyed USB drive.	MSA Link Pro Software Options None 1 MSA Link Pro Software USB Key	Code 0 1	Selection
H	SECURE DIGITAL USB	Allows end user to securely configure instrument set points at GALAXY GX2 System test stand. Must be inserted to process any setting changes to an instrument.	Secure Digital USB Options None Secure Digital USB Key	Code 0 A	Selection

Gas-Detection Instruments

Regulators

Regulators are used to ensure you receive the required flow of calibration gas for your application. MSA regulators save customers money by delivering calibration test gas at a rate of .25 lpm versus competitors test gas which flows at a rate of .50 lpm.

Features and Benefits

- Gas Miser® Demand Regulator: no additional maintenance is required for accurate calibration once attached to the calibration cylinder
- Gas Miser Manifold: allows test or calibration of up to four instruments at the same time using the same calibration gas
- Calibration Tubing: polyurethane tubing for use with calibration equipment
- Model RP Check Kits and Model R Check Kits: consist of a regulating valve which includes a cylinder pressure gauge, an adapter hose with sampling line connection, sensor adapters (where applicable), instructions, and a case fitted with room for two calibration check gas cylinders
- Model RP Check Kits
- Model RP Combination Regulators

Calibration Gas

Each MSA Calibration Gas Cylinder is shipped with an individual copy of a material safety data sheet (MSDS) and an individual copy of a certificate of analysis. MSA certifies that the gas mixture in calibration gas cylinders was prepared gravimetrically, using NIST traceable weights. The lot number and nominal value of the gas constituents in percent by volume, percent by mass, PPM, or volume are specified on the cylinder. The uncertainty statement of the specified nominal value is also listed.

Model RP and Model R Calibration Cylinders—Non-Reactive Gases, Steel Cylinder

Model RP Cylinder

- *Contents:* Pressure 1000 psig; approximately 100 liters at atmospheric pressure

	710483	Double Cylinder Holder, wall-mounted

Calibration Cylinders Are Recyclable!

MSA has affiliated with the Association of Retarded Citizens, Butler County—a nonprofit organization that employs mentally retarded citizens—and established a Cylinder Recycling Center. The calibration cylinders are not refilled, but salvaged for scrap. All money generated from selling the scrap cylinders is placed in the ARC operating fund for salaries and operating costs.

Calibration cylinders are considered hazardous unless the cylinders are empty. MSA has developed special devalving tools that will ensure the cylinder is empty and render the cylinder non-fillable. For your convenience, MSA also offers a specially pre-addressed shipping box (also recyclable) which helps you pay the lowest shipping costs available.

The MSA Recycling Center limits the return of calibration cylinders to MSA-logoed cylinders only. Non-MSA cylinders will be rejected. Contact the Customer Service Center for additional details at 1-800-MSA-2222.

Head, Eye, Face, and Hearing Protection

Standards for Industrial Head Protection

ANSI/ISEA Z89.1-2009 and CSA Z94.1-2005

ANSI/ISEA Z89.1-2009 and CSA Z94.1-2005 are voluntary industry standards that establish the types and classes of industrial helmets and provide performance and testing requirements for these helmets. These standards include specifications for helmets designed to offer protection from top and/or lateral impact.

The three classes included in these standards indicate the helmet's electrical insulation rating:

Class E (Electrical) – Helmets intended to reduce the danger of exposure to high-voltage electrical conductors, proof-tested at 20,000 volts

Class G (General) – Helmets intended to reduce the danger of exposure to low-voltage electrical conductors, proof-tested at 2,200 volts

Class C (Conductive) – Helmets do not provide protection from electrical conductors

The test requirements for Industrial Head Protection per ANSI/ISEA Z89.1-2009 and CSA Z94.1-2005 are separated by helmet type: Type I helmets protect the wearer from top impact, while Type II helmets protect the wearer from top and lateral impact. The test requirements for ANSI/ISEA Z89.1-2009 and CSA Z94.1-2005 are available from the Industrial Safety Equipment Association (www.safetysiteequipment.org) and www.CSA.ca, respectively.

Three non-mandatory tests were added to the updated ANSI/ISEA Z89.1-2009 standard. Manufacturers who want to claim one or more of these features can test their helmets according to the new procedures and mark their product accordingly. These tests are as follows:

1 – Reverse Donning [↻]

In order for a helmet to be worn in reverse or a swing ratchet suspension to be used in a helmet, that particular helmet must be marked with the "double-arranged circle" to indicate that it meets the new ANSI/ISEA Z89.1-2009 non-mandatory reverse donning test.

2 – Lower Temperature [LT]

The traditional low temperature test for a helmet is -18°C or 0°F. Helmets that meet ANSI Z89.1 requirements for LOWER temperatures (-30°C or -22°F) can be marked with "LT" by the manufacturer.

3 – High-Visibility [HV]

Helmets that meet the non-mandatory requirements for high-visibility, including special tests for Chromaticity and Luminescence for added visibility, can be marked with "HV" by the manufacturer.

All MSA helmets have been tested per the mandatory and non-mandatory ANSI/ISEA Z89.1-2009 and CSA Z94.1-2005 requirements. MSA offerings include:

MSA Helmet	Standard(s)	Type	Class	↻ /LT/HV
V-GARD CAP/HAT	ANSI/ISEA Z89.1-2009; CSA Z94.1-2005	TYPE I	CLASS E	↻ /LT/HV
V-GARD GREEN CAP	ANSI/ISEA Z89.1-2009; CSA Z94.1-2005	TYPE I	CLASS E	↻ /LT
V-GARD 500 VENTED CAP	ANSI/ISEA Z89.1-2009	TYPE I	CLASS C	↻ /LT/HV
V-GARD 500 NON-VENTED CAP	ANSI/ISEA Z89.1-2009	TYPE I	CLASS E	↻ /LT/HV
SMOOTHDOME CAP	ANSI/ISEA Z89.1-2009; CSA Z94.1-2005	TYPE I	CLASS E	↻ /LT/HV
TOPGARD CAP/HAT	ANSI/ISEA Z89.1-2009; CSA Z94.1-2005	TYPE I	CLASS E	↻ /LT/HV
THERMAGARD CAP	ANSI/ISEA Z89.1-2009; CSA Z94.1-2005	TYPE I	CLASS G	↻ /LT/HV
SKULLGARD CAP/HAT	ANSI/ISEA Z89.1-2009	TYPE I	CLASS G	↻ /LT/HV
SUPER-V CAP	CSA Z94.1-2005	TYPE II	CLASS E	LT/HV
VANGUARD CAP ¹	ANSI/ISEA Z89.1-2009; CSA Z94.1-2005	TYPE II	CLASS E	LT/HV
COMFO CAP	ANSI/ISEA Z89.1-2009	TYPE I	CLASS G	LT

¹Vanguard Cap meets all applicable requirements for a Type II helmet as outlined in CSA Z94.1-2005 and ANSI/ISEA Z89.1-2009.

Head, Eye, Face, and Hearing **Protection**

V-Gard® GREEN Protective Helmet

The world's first hard hat made from renewable resources

Both V-Gard GREEN Helmets and traditional V-Gard Helmets, regardless of material, offer the same trusted look and quality customers have come to expect from MSA. V-Gard and V-Gard GREEN helmets are third-party SEI certified as Type I, Class E under ANSI/ISEA Z89.1-2009 and CSA Z94.1-2005. The only difference is V-Gard GREEN Helmets are produced from green high-density polyethylene (GHDPE), rather than standard HDPE like the traditional V-Gard helmets. GHDPE is a biopolymer made from sugar cane-based ethanol. GHDPE is a renewable resource because the rate of sugarcane growth is faster than the rate of harvest.

- Classification:** Type I
- Market(s):** General industry, manufacturing, repair and maintenance, construction, oil and gas, shipbuilding, automotive, mining
- Application:** General purpose
- Shell Material:** Green high-density polyethylene (GHDPE)
- Available Styles:** Slotted cap with 4-point Fas-Trac®III Suspension
- Sizes:** Standard (6-1/2" to 8")
- Standards:** ANSI/ISEA Z89.1-2009 (Class E); CSA Z94.1-2005 (Class E)
- Certification:** Third-party by SEI
- Customization:** Logos, striping and MSA accessories available
- Replacement Suspensions:** See page 107

White	Yellow	Blue	Green	Red
10150199	10150200	10150221	10150222	10150223

On average, the production of each V-Gard GREEN helmet removes approximately 2 lbs. of CO₂ from the atmosphere, according to the GHDPE material supplier.

Did you know that MSA offers a complete line of helmet accessories for MSA helmets?
Turn to pages 118–142 for more information.

V-Gard Protective Caps and Hats

Classification: Type I

Application: General purpose

Shell Material: Polyethylene

Available Styles: Slotted Cap; Slotted Full-Brim Hat

Sizes: **Cap:** Small (6 – 7 $\frac{1}{8}$ "); Standard (6 $\frac{1}{2}$ – 8"); Large (7 – 8 $\frac{1}{2}$ ") **Hat:** Standard (6 $\frac{1}{2}$ – 8")

Standards: ANSI/ISEA Z89.1-2009 (Class E); CSA Z94.1-2005 (Class E)

Certification: Third-party by SEI

Customization: Imprinting and striping available

Replacement Suspensions: See page 107

NOTE: Small and Large V-Gard Caps are NOT CSA-certified. Standard-size V-Gard Caps and Hats are CSA-certified when assembled with MSA's Fas-Trac III or 1-Touch Suspension ONLY.

¹Certified to CSA.

²V-Gard Cap/Hat meets the voluntary standard for hi-visibility as prescribed by ANSI/ISEA Z89.1-2009. Look for the official hi-visibility marking [HV] on the helmet's ANSI label.

NOTE: Small and Large V-Gard Caps are NOT CSA-certified. Standard size V-Gard Caps and Hats are CSA-certified when assembled with MSA's Fas-Trac, Fas-Trac III or 1-Touch Suspension ONLY.

Replacement Suspensions for MSA Safety Helmets

MSA Fas-Trac® III Suspension

Ensuring your workforce wears their safety helmets can be a real headache. MSA, the leading provider of protective helmets, has the perfect remedy: the Fas-Trac III Suspension. No more pressure headaches. No more pulled hair. No more falling off. No more sacrificing worker comfort for safety.

- 1 Sweatband fully covers the headband and worker's forehead.
- 2 Three levels of nape strap adjustment for customized fit.
- 3 Lower nape strap cradles the head. Retention is greatly improved—even when bending over!
- 4 Smooth ratchet rotation and secure hold.

Learn how the Fas-Trac III Suspension can relieve your headaches. Visit MSAsafety.com/FasTrac.

The new **Fas-Trac III sweatband** accessory helps keep workers cool and dry.

FAS-TRAC III SWEATBAND ACCESSORY	Part No.	Product Specifics
	10153518	<ul style="list-style-type: none"> • For use with MSA Fas-Trac® III Suspension • Optional, moisture-wicking and washable • Can be attached/replaced while suspension is assembled in helmet • Sold ONLY in packages of 10

▲ WARNING

Use only the indicated MSA suspension in your MSA helmet. Do not mix suspension sizes and helmet sizes (i.e., putting a standard sized suspension in a large helmet or any other mismatched combination). Do not use competitor suspensions in MSA helmets. Inspect your suspension frequently. Suspensions should be replaced every 12 months, regardless of inspection results. Replace immediately (along with the helmet), if an impact has occurred. Failure to follow these instructions will reduce the energy absorbing ability of the protective helmet to receive impact, and could result in serious injury or death.

¹Swing ratchet size is 6 1/2" through 7 1/2"

Head, Eye, Face, and Hearing Protection

Helmet Customization

Put your reputation on ours: add your company logo, slogan or even a picture to your MSA helmet!

MSA offers 14 different helmets (in up to 20 colors), 4 suspensions, 27+ striping options, 19 stock logos/slogans, and multiple logo locations for endless customized helmet possibilities! We've been logoing hard hats for 30 years—longer than anyone else in the business!

Custom Logos

All logos are submitted to MSA Logo Express® Service design team by a MSA distributor. Logo Express Service artists then send an approval form that includes a FREE rendering of the selected hard hat. Once we receive written approval, we get started on the order!

Striping

Add any of 27+ different reflective and retro-reflective stripes¹ to your helmet. MSA reflective stripes help enhance the visibility of workers in daytime conditions, while retro-reflective stripes offer additional enhancement in nighttime or low-light conditions. Stripes are available in various sizes and shapes, and can be placed on all types of MSA helmets.

Minimum Order Quantities (MOQ)

MSA requires MOQs, by helmet type, for logoing and striping. Qualifying MOQs of custom-imprinted or striped helmets must be of the same size, model and options (i.e., color and suspension). MOQs are:

- 20 for V-Gard, V-Gard 500, V-Gard GREEN, SmoothDome, Topgard and Comfo Cap Helmets
- 16 for Skullgard or Thermalgard Helmets
- 12 for Super-V and Vanguard Helmets
- 40 for Bump Caps

Placing Customized Helmet Orders

In three easy steps, you can get your first order of new logos and/or striping:

1. Complete all sections on the MSA Logo Express Order Form (ID 0617-01 MC).
2. See "Artwork Guidelines" (ID 0617-06-MC) for details on artwork submission.
3. Submit an electronic file of your artwork by email (Logo.Express@msasafety.com) or by US Postal Service (MSA Logo Express, 3880 Meadowbrook Rd., Murrysville, PA 15668-1753). Be sure to include a copy of the completed Order Form with your artwork submission.

NFPA 70E is a work practice; it is not a standard and does not specify any test methods. No products "meet" NFPA 70E—the user simply follows the practice of NFPA 70E. When it comes to head protection, NFPA 70E recommends that a user wear a Class E hard hat in order to follow this work practice.

¹Thermalgard Caps can withstand radiant heat loads up to but not exceeding 350°F.

MSA helmets marked "LT" are not only preconditioned to 120°F as all helmets that meet the requirements of ANSI/ISEA Z89.1-2009 are, but they also meet the voluntary requirements for "Lower Temperature." Helmets marked "LT" are conditioned to -22°F and then tested for impact and penetration, as outlined in the Standard. Any helmet NOT marked with "LT" is tested to 0°F.

Comfo-Cap® Protective Caps

- Classification:** Type I
- Application:** Mining
- Shell Material:** Polycarbonate
- Available Styles:** Non-Slotted Cap
w/ lamp bracket and cord holder
- Sizes:** Standard (6 1/2 – 8")
- Standards:** ANSI/ISEA Z89.1-2009 (Class G)
- Certification:** Third-party by SEI
- Customization:** Imprinting and striping available

Replacement Suspensions: See page 107

DESCRIPTION	w/Staz-On	w/Fas-Trac III

Bump Caps

- Classification:** None
- Application:** Non-impact
- Shell Material:** Polyethylene
- Available Styles:** Non-Slotted Cap w/ plastic suspension
- Sizes:** Standard (6 1/2 – 8")
- Standards:** Not applicable
- Certification:** None
- Customization:** Imprinting and striping available (*locations limited*)

DESCRIPTION	w/Plastic Suspension
BUMP CAP ASSEMBLIES	
WHITE	10033652
BLUE	10033650
YELLOW	10033651
ORANGE	10033654
RED	10033653
GREEN	10033655

⚠ WARNING

Bump caps are not safety helmets and do not meet OSHA or ANSI/ISEA Z89.1 requirements. DO NOT use bump caps for impact protection, for sports or when an ANSI-compliant helmet is required.

Head, Eye, Face, and Hearing Protection

V-Gard Accessory System: V-Gard Frames for Caps

The V-Gard Accessory System offers helmet-mounted frames for various work conditions and MSA helmets. The sloped design allows liquids, chips and other materials to slide off the frame and away from the line of sight. Each frame, whether used with or without debris control, meets the applicable requirements for ANSI/ISEA Z87.1-2010, EN 166, CSA Z94.3, AS/NZS 1337, and many local standards.¹

Classification:	General purpose
Market(s):	General industry, manufacturing, repair and maintenance, construction, oil and gas, forestry, shipbuilding, metalworking, automotive, mining
Application(s):	Chipping, splash, chiseling, drilling, grinding, machining, power fastening, sanding, sawing
Material:	High density polyethylene (HDPE)
Color(s):	Black
Available Styles:	Frame for Slotted Caps Universal Frame for Caps
Size:	Fits MSA Safety Caps
Features:	Offered with or without debris control
Standards¹:	ANSI/ISEA Z87.1-2010; EN 166; CSA Z94.3; and AS/NZS 1337
Certification:	Third-party by Intertek, INSPEC International Ltd., CSA International and SAI Global Ltd.
Min Order Qty:	10

V-GARD FRAMES FOR GENERAL PURPOSES	Part No.	Product Specifics
	10115730 	<ul style="list-style-type: none"> Fits all MSA Slotted Caps Sold with replaceable debris control which creates tight seal between frame and cap Stowable slot adaptors secure frame tightly in slotted MSA caps, and allow frame to work with or without earmuffs² Sliding adjustment blades allow visor to work with most half-mask respirators and other PPE worn under a visor
	10121266 	<ul style="list-style-type: none"> Fits all MSA Slotted Caps³ Debris control sold separately Stowable slot adaptors secure frame tightly in slotted MSA caps, and allow frame to work with or without earmuffs² Sliding adjustment blades allow visor to work with most half-mask respirators and other PPE worn under a visor
	10115822 	<ul style="list-style-type: none"> Fits all MSA Caps (Slotted or Non-Slotted)⁴ Sold with replaceable debris control which creates tight seal between frame and cap Heavy duty flat rubber strap allows easy and secure placement on all MSA caps, including non-slotted models Design allows use with other PPE, including MSA earmuffs and respirators
	10121268 	<ul style="list-style-type: none"> Fits all MSA Caps (Slotted or Non-Slotted)⁴ Debris control sold separately Heavy duty flat rubber strap allows easy and secure placement on all MSA caps, including non-slotted models Design allows use with other PPE, including MSA earmuffs and respirators

⚠ WARNING

Use V-Gard Frames ONLY with V-Gard Visors, to ensure compliance with safety standards. Misuse can result in death, permanent impairment of sight, or other serious injury.

¹Standards requirements met by each V-Gard Frame/V-Gard Visor combination designated on each V-Gard Visor.

²Patent pending

³MSA recommends the use of debris control on V-Gard frames when wearing BOTH large V-Gard molded Visors and cap-mounted earmuffs.

⁴MSA does not recommend the use of the V-Gard Universal Frame with the MSA SmoothDome when using cap-mounted muffs and large V-Gard molded Visors. The V-Gard Frame for Slotted Caps should be worn with this particular combination.

V-Gard Accessory System: V-Gard Frames for Caps

Classification:	Elevated temperature
Market(s):	Food manufacturing/canneries, steel mills, construction, open-pit mining, agriculture, oil/gas/petrochemical refineries, rubber manufacturing, and steam tunnels
Application(s):	Food processing, machine operation, maintenance, millwright, cutting, punching, extrusion, drilling, blasting, casting/conveying, chemical mixing, sanding
Material:	Polycarbonate
Color(s):	Grey
Available Styles:	Frame for Slotted Caps Universal Frame for Caps
Size:	Fits MSA Safety Caps
Features:	Offered with or without debris control Tested to withstand temperatures of 350°F (176.7°C), reducing warping, cracking or crazing All non-metal construction
Standards¹:	ANSI/ISEA Z87.1-2010; EN 166; CSA Z94.3; and AS/NZS 1337.
Certification:	Third-party by Intertek, INSPEC International Ltd., CSA International and SAI Global Ltd.

V-GARD VISORS FOR HEAVY DUTY GENERAL PURPOSE APPLICATIONS	Part No.	Product Specifics
	10115853 	<ul style="list-style-type: none"> Molded visor for superior optics under heavy duty use Extended length for greater coverage of neck/face Performs well against many chemicals. Please refer to MSA's Chemical Application Quick Reference Guide (ID 0670-007/MC) for details
	10115854 	<ul style="list-style-type: none"> Molded visor for superior optics under heavy duty use Extended length for greater coverage of neck/face Green tint, helps reduce glare; not for use where a Shade IR visor is required

V-Gard molded, green and clear visors (whether propionate or polycarbonate) offer superior optical quality and resistance to many chemicals. For details on optics, please refer to the MSA White Paper, "Optical Quality Requirements and V-Gard® Visors" (ID 0302-32 MC) available for download from MSA's Asset Library.

¹Standards requirements met by each V-Gard Frame or Headgear/V-Gard Visor combination designated on each V-Gard Visor.

V-Gard Accessory System: General Purpose V-Gard Visors (Non-Impact)

Classification:	General purpose: non-impact
Market(s):	General industry, manufacturing, repair and maintenance, construction, oil and gas, forestry, shipbuilding, automotive, mining
Application(s):	Flying chips and other light debris
Material:	Epoxy-coated steel mesh (20 x 20)
Color(s):	Black Aluminum
Available Styles:	Flat
Size:	Varies; see "Product Specifics" in Ordering Information chart.
Features:	General protector (Z87); not for impact hazards
Standards¹:	ANSI/ISEA Z87.1-2010; EN 1731-F; and AS/NZS 1337
Certification:	Third-party by Intertek, INSPEC International Ltd., and SAI Global Ltd.
Min Order Qty:	10

V-GARD VISORS FOR GENERAL PURPOSE APPLICATIONS	Image	Part No.	Product Specifics
		10116557	<ul style="list-style-type: none"> • 8" (20.3 cm) x 17" (43.2 cm) • Visor; plastic-edged mesh • Not for use against splash, impact, elevated temperatures or UV hazards • Can be worn with earmuffs
		10116558	<ul style="list-style-type: none"> • 8" (20.3 cm) x 17" (43.2 cm) • Nitrometer; for use with V-Gard Retractable or Standard Chin Protectors • Plastic-edged mesh • Not for use against splash, impact, elevated temperatures or UV hazards • Can be worn with earmuffs
		10116556	<ul style="list-style-type: none"> • 8" (20.3 cm) x 16.5" (41.9 cm) • Aluminum-bound mesh • Not for use against splash, impact, electrical or UV hazards

Only eye/face products marked as Z87+ are impact-rated. The "+" indicates the impact rating. Product literature can be vague, indicating that eye/face products "meet the requirements" of ANSI Z87. If you need a Z87 impact-rated product, be sure to ask the manufacturer if it is marked with "Z87+".

¹Standards requirements met by each V-Gard Frame or Headgear/V-Gard Visor combination designated on each V-Gard Visor.

V-Gard Visors: Heavy Duty Chemical and Splash

- Classification:** Chemical and splash: Heavy Duty
- Market(s):** General industry, heavy manufacturing, laboratories, chem/petrochemical, agriculture, pharmaceutical, oil and gas, mining
- Application(s):** Chipping, splash, chemical mixing, grinding, machining, power fastening, sanding, sawing
- Material:** Propionate
- Color(s):** Clear
- Available Styles:** Molded visor; molded nitrometer
- Size:** Varies; see "Product Specifics" in Ordering Information chart.
- Features:** Performs well against many types of chemicals. Please refer to MSA's Chemical Application Quick Reference Guide (ID 0670-007/MC) for details.
Impact-rated (Z87+)
- Standards¹:** ANSI/ISEA Z87.1-2010; EN 166 (MSA 1B 3); CSA Z94.3 and AS/NZS 1337
- Certification:** Third-party by Intertek, INSPEC International Ltd., CSA International and SAI Global Ltd.
- Min Order Qty:** 5

V-GARD VISORS FOR CHEMICAL AND SPLASH APPLICATIONS		Part No.	Product Specifics
		10115855	<ul style="list-style-type: none"> • 8" (20.3 cm) x 17" (43.2 cm) x .098" (2.5mm) • Visor • Extra-thick to help prevent warping, cracking or crazing under tough conditions
		10115856	<ul style="list-style-type: none"> • 8" (20.3 cm) x 17" (43.2 cm) x .098" (2.5mm) • Nitrometer; for use with V-Gard Retractable or Standard Chin Protectors • Extra-thick to help prevent warping, cracking or crazing under tough conditions
		10115851	<ul style="list-style-type: none"> • 9.25" (23.5 cm) x 18" (45.7 cm) x .098" (2.5mm) • Visor • Extra-thick to help prevent warping, cracking or crazing under tough conditions • Extended length and width for greater coverage of neck and face

V-Gard propionate visors offer both chemical resistance and impact protection, unlike most propionate visors on the market. Not only are they marked with Z87+, but the clear visors are also compliant with EN166, meaning they were tested at a velocity nearly 32% faster than ANSI/ISEA Z87.1-2010. V-Gard green tint propionate Visors also offer maximum UV protection.

¹Standards requirements met by each V-Gard Frame or Headgear/V-Gard Visor combination designated on each V-Gard Visor.

V-Gard Visors: Heavy Duty Chemical and Splash (Tinted)

Classification:	Chemical and splash: Heavy Duty
Market(s):	General industry, heavy manufacturing, laboratories, chem/petrochemical, agriculture, pharmaceutical, oil and gas, mining
Application(s):	Outdoor use, chipping, splash, chemical mixing, grinding, machining, sanding, sawing
Material:	Propionate
Color(s):	Green tint
Available Styles:	Molded
Size:	Varies; see "Product Specifics" in Ordering Information chart.
Features:	Maximum UV protection ("U6") Impact-rated (Z87+) Green tint helps alleviate eyestrain and reduces glare
Standards¹:	ANSI/ISEA Z87.1-2010 and CSA Z94.3
Certification:	Third-party by Intertek and CSA International

V-GARD VISORS FOR ELEVATED TEMPERATURE APPLICATIONS		Part No.	Product Specifics
		10115845 	<ul style="list-style-type: none"> • 9.25" (23.5 cm) x 17" (43.2 cm) x .098" (2.5mm) • Extra-thick visor helps prevent warping, cracking or crazing under tough conditions • Conditioned to a high of 131°F (and a low of 23°F) and then tested to the medium impact rating in the EN166 standard (higher impact speed than ANSI/ISEA Z87.1-2010) • Visors do not reflect IR; not recommended for use against radiant heat hazards. • Not for use where a Shade IR visor is required.
		10115849 	<ul style="list-style-type: none"> • 9.25" (23.5 cm) x 18" (45.7 cm) x .098" (2.5mm) • Extra-thick visor helps prevent warping, cracking or crazing under tough conditions • Extended length for greater coverage of face and neck • Conditioned to a high of 131°F (and a low of 23°F) and then tested to the medium impact rating in the EN166 standard (higher impact speed than ANSI/ISEA Z87.1-2010) • Visors do not reflect IR; not recommended for use against radiant heat hazards. • Not for use where a Shade IR visor is required.

Many people mistakenly believe that green tinted visors offer protection from infrared (IR) radiation. If you need a specific reduction in the transmittance level for IR, look for a visor with a "W" or "R" mark - these are generally known as "shade" visors. Reflectance is another way to reduce the IR transmittance through a lens. See "V-Gard Visors: Radiant Heat/Elevated Temperature" for information about IR reflectance.

¹Standards requirements met by each V-Gard Frame or Headgear/V-Gard Visor combination designated on each V-Gard Visor.

Head, Eye, Face, and Hearing Protection

V-Gard Visors: Radiant Heat/Elevated Temperature

Classification:	Radiant heat/elevated temperature
Market(s):	Metal industries, glass manufacturing, iron and steel foundries, chemical manufacturing, construction, general manufacturing, textile manufacturing, mining, oil and gas
Application(s):	Grinding, pouring, casting, blowing/melting, rolling, sawing, cutting, crimping, millwrighting, machining/operating, pipelining, pulping
Material:	Polycarbonate
Color(s):	Clear, reflective-coated Green tint, reflective-coated
Available Styles:	Molded
Size:	9.5" (24.1 cm) x 17.75" (45.09 cm) x .07" (1.8 mm)
Features:	Reflects >60% Infrared (IR) radiation (EN166 "R" mark) in the 780nm to 2000nm wavelengths Impact-rated (Z87+) Maximum UV protection ("U6")
Standards¹:	ANSI/ISEA Z87.1-2010; EN 166 (2C-2.5 MSA 1BT3R [clear] and 2-4 MSA 1BT3R [green tint]); CSA Z94.3 and AS/NZS 1337
Certification:	Third-party by Intertek, INSPEC International Ltd., CSA International and SAI Global Ltd.
Min Order Qty:	5

V-GARD VISORS FOR ELEVATED TEMPERATURE/RADIANT HEAT APPLICATIONS		Part No.	Product Specifics
		10115848 	<ul style="list-style-type: none"> • Clear, reflective-coated • Reflective coating reflects IR and helps dissipate heat • Thick visor helps prevent warping, cracking or crazing under tough conditions • Extended length for greater coverage of face and neck; DO NOT use for welding
		10115850 	<ul style="list-style-type: none"> • Green tint, reflective-coated • Reflective coating reflects IR and helps dissipate heat • Green tint helps alleviate eyestrain and reduces glare; not for use where a Shade IR visor is required • Thick visor helps prevent warping, cracking or crazing under tough conditions • Extended length for greater coverage of face and neck; DO NOT use for welding

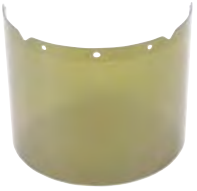

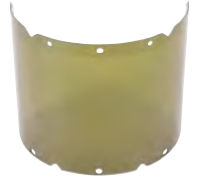

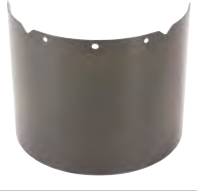

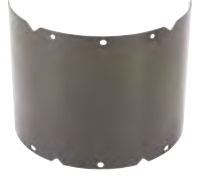

Reflective-coated visors offer protection from irradiance, or the electromagnetic radiation (EMR) energy created in elevated temperature environments. V-Gard Reflective Coated Visors offer an EN166 "R" mark. This means they have been certified to reflect >60% Infrared (IR) radiation in the 780 nm to 2000 nm wavelengths. V-Gard Reflective Visors have been shown to reduce temperatures behind the visor by several hundred degrees, and lower irradiance to below 0.1 kW/m². For details on V-Gard Reflective-Coated Visor performance, please see the MSA White Paper, "Radiant Heat Resistance" (ID 0670-020 MC) and "MSA V-Gard® Reflective-Coated Visors: Radiant Heat Resistance Simplified" (ID 0670-023 MC), available on MSAsafety.com.

¹Standards requirements met by each V-Gard Frame or Headgear/V-Gard Visor combination designated on each V-Gard Visor.

V-Gard Visors: Welding (Shade 3 and Shade 5)

Classification:	Welding
Market(s):	Fabrication, steel mills, shipbuilding, construction, open-pit mining, agriculture, oil/gas/petrochemical refineries, rubber manufacturing
Application(s):	Welding, metal pouring, gas soldering, light cutting/brazing, manufacturing, impact and debris
Material:	Polycarbonate
Color(s):	Shade 3 IR, green Shade 5 IR, green
Available Styles:	Molded or Nitrometer
Size:	8" (20.3 cm) x 17" (43.2 cm) x .07" (1.8 mm)
Features:	Protection from IR, up to Shade 3 or 5 (as noted) Impact-rated (Z87+)
Standards¹:	ANSI/ISEA Z87.1-2010; EN 166 (4-3/3 MSA 1BT39 [shade 3] and 4-5/5 MSA 1BT39 [shade 5]); CSA Z94.3 and AS/NZS 1337
Certification:	Third-party by Intertek, INSPEC International Ltd., CSA International and SAI Global Ltd.
Min Order Qty:	5

		P/N 10115827 Standard Chin Protector	<ul style="list-style-type: none"> 2.86" (7.26 cm) in height Opaque high-density polyethylene ensures safety and standards compliance with clear, tinted, shaded and coated V-Gard Visors Compact, lightweight design provides additional protection between chin and neck area Min Order Qty: 5

¹Do not use V-Gard Arc Visors with V-Gard Headgear. These visors are designated for use with specified V-Gard Frames and MSA helmets ONLY. See "V-Gard Headgear" for additional details.

²Standards requirements met by each V-Gard Frame/V-Gard Visor combination designated on each V-Gard Visor.

³MSA V-Gard Chin Protectors meet the applicable safety requirements as noted on the V-Gard Nitrometer Visor when worn in conjunction with V-Gard Frames and V-Gard Nitrometer Visors.

Head, Eye, Face, and Hearing Protection

V-Gard Headgear

V-Gard Headgear can be used for face protection when head protection is not required. V-Gard Headgear is available in two versions: General Purpose and Elevated Temperature (Extended). V-Gard Headgear are designed and approved for use with V-Gard Visors.¹

Classification:	General purpose
Market(s):	General industry, manufacturing, repair and maintenance, construction, oil and gas, forestry, shipbuilding, metalworking, automotive, mining, chemical industries
Application(s):	Chipping, splash, chiseling, drilling, grinding, machining, power fastening, sanding, sawing, laboratory
Material:	High Density Polyethylene (HDPE)
Color(s):	Black
Available Styles:	Ratchet closure
Size:	Standard (6½ – 8)
Standards²:	ANSI/ISEA Z87.1-2010; EN 166; CSA Z94.3; and AS/NZS 1337
Certification:	Third-party by Intertek, INSPEC International Ltd., CSA International and SAI Global Ltd.
Min Order Qty:	10

V-GARD HEADGEAR FOR GENERAL PURPOSE APPLICATIONS	Part No.	Product Specifics
	10127061	<ul style="list-style-type: none"> • Patent-pending, Infini-just lift/closure with grippable knobs that don't unscrew; no parts to lose! • Seven-point crown adjustment • Replaceable, sweat-wicking, cushioned headband helps keep workers dry and cool • Sweat-wicking ratchet cover keeps nape comfortable • For use ONLY with V-Gard Visors; not for use where head protection is required • All non-metal construction

Classification:	Elevated temperature
Market(s):	Food manufacturing/canneries, steel mills, construction, open-pit mining, agriculture, oil/gas/petrochemical refineries, rubber manufacturing, and steam tunnels
Application(s):	Food processing, machine operation, maintenance, millwright, cutting, punching, extrusion, drilling, blasting, casting/conveying, chemical mixing, sanding
Material:	Heat-Resistant Nylon
Color(s):	Gray
Available Styles:	Ratchet closure
Size:	Standard (6½ – 8)
Standards²:	ANSI/ISEA Z87.1-2010; EN 166; CSA Z94.3; and AS/NZS 1337
Certification:	Third-party by Intertek, INSPEC International Ltd., CSA International and SAI Global Ltd.
Min Order Qty:	5

V-GARD HEADGEAR FOR ELEVATED TEMPERATURE APPLICATIONS	Part No.	Product Specifics
	10127062	<ul style="list-style-type: none"> • Extended browguard for additional coverage in high temperatures • Tested to withstand temperatures up to 400°F³ • Patent-pending, Infini-just lift/closure with grippable knobs that don't unscrew; no parts to lose! • Seven-point crown adjustment • Replaceable, sweat-wicking, cushioned headband helps keep workers dry and cool • Sweat-wicking ratchet cover keeps nape comfortable • For use ONLY with V-Gard Visors; not for use where head protection is required • All non-metal construction

¹ **DO NOT** use V-Gard Headgear with V-Gard Arc Visors tested to ASTM F2178-2008 Test Method (ref. NFPA 70E-2012, Hazard Risk Category). These visors are designated for use with specified V-Gard Frames and MSA helmet ONLY as face protection for workers exposed to high voltage electric arcs. V-Gard Headgear has not been tested or certified to the Test Method, and should not be used for this type of Arc Flash protection.

² Standards requirements met by each V-Gard Frame or Headgear/V-Gard Visor combination designated on each V-Gard Visor.

³ Exposure to extreme heat can cause thermal discomfort. Proper precautions should be taken to prevent heat stress and other injuries.

V-Gard Headgear

V-Gard Headgear Kits offer simple and complete solutions for many general purpose and elevated temperature applications where face protection ONLY is needed.

V-GARD HEADGEAR KITS		P/N 10127063 V-Gard Headgear Kit, General Purpose	Contains: <ul style="list-style-type: none"> • V-Gard General Purpose Headgear (PN 10127061) • V-Gard Clear, PC Visor, 8" (20.3 cm) x 17" (43.2 cm) x .04" (1.02 mm) (PN 10115836)
		P/N 10127064 V-Gard Headgear Kit, Elevated Temperature	Contains: <ul style="list-style-type: none"> • V-Gard Headgear, Elevated Temperature, Extended (PN 10127062) • V-Gard Clear, Green tint PC, reflective coating, molded, 9.5" (24.1 cm) x 17.75" (45.09 cm) x .07" (1.78 mm) (PN 10115850)

V-Gard Headgear Replacement Sweatband¹

V-Gard Headgear Kits offer simple and complete solutions for many general purpose and elevated temperature applications where face protection ONLY is needed.

V-GARD HEADGEAR REPLACEMENT SEWATBAND		P/N 10127065 V-Gard Headgear Replacement Sweatband	<ul style="list-style-type: none"> • Sweat-wicking material over breathable foam helps keep workers cool, dry and comfortable • Hook & loop closure makes replacement easy • Tested to the FR requirements in CSA Z94.3-07 • Sold in boxes of 25 (5 packages of 5)
--	--	--	--

¹Use only genuine MSA V-Gard Headgear replacement parts to help ensure compatibility and compliance. MSA does not warrant, guarantee or promote the use of components manufactured by other companies when used in conjunction with MSA products.

Head, Eye, Face, and Hearing Protection

V-Gard Winter Liners

Flame resistant (FR) garments are made of special fibers that allow them to self-extinguish when exposed to flame or thermal ignition. Flame resistance cannot be removed by washing. Unlike many other winter liners in the market, ALL layers of fabric in V-Gard Supreme Liners are flame resistant, affording FR protection throughout the life of the product.¹ For this reason, only V-Gard Supreme Liners offer resistance to arc exposure.

Flame retardant garments have been chemically treated to resist burning when a flame is present. While chemical treatment can wear off after the first wash, all layers of ALL V-Gard Select products offer flame retardancy up to 50 washings.

V-GARD SUPREME LINERS 		P/N 10118421 Flame-Resistant V-Gard Supreme Liner	<ul style="list-style-type: none"> • Multiple layers of flame-resistant fabric • Fabric tested to withstand arc exposure to an ATPV of 8 cal/cm² • Water repellent • Adjustable chinstrap • Inside neck pocket holds warming packet² • Sold in sets of 3
	 	P/N 10118425 Flame-Resistant V-Gard Supreme Liner, Extended, 1-piece	<ul style="list-style-type: none"> • Multiple layers of flame-resistant fabric • Fabric tested to withstand arc exposure to an ATPV of 8 cal/cm² • Water repellent • Inside neck pocket holds warming packet² • Extended nape and wraparound collar for tucking into coat/shirt • Quilted flaps allow uncompromised hearing protection levels when using earmuffs • Sold in sets of 3
	 	P/N 10118427 Flame-Resistant V-Gard Supreme Liner, 2-piece	<ul style="list-style-type: none"> • Multi-layered flame-resistant top cap • Fabric tested to withstand arc exposure to an ATPV of 8 cal/cm² • Water repellent • Inside neck pocket holds warming packet² • Extended, zipper on/off high-bulk flame-resistant knit bottom • No metal parts • Sold in sets of 3

¹Garment care instructions must be followed. ²Warming packets available at most sporting goods retailers; not sold with liners.

According to one of the formal, certifying test houses, winter liners cannot be certified to "NFPA 2112, Standard on Flame-Resistant Garments for Protection of Industrial Personnel Against Flash Fire," as they are not considered "garments" under this Standard. Please contact MSA Customer Service for details.

<p>V-GARD SELECT LINERS</p> 	 	<p>P/N 10129659 Flame-Retardant V-Gard Select Liner, 2-piece</p>	<ul style="list-style-type: none"> • Double-layered flame retardant top cap, up to 50 washes • Extended, zipper on/off double-layer knit bottom; flame retardant, up to 50 washes • No metal parts • Water repellent • Sold in sets of 12

Head, Eye, Face, and Hearing Protection

SunShade Hard Hat Accessory

MSA SunShades not only help to protect wearer's ears and neck from sun and heat, but also enhance worker visibility with contrasting color band and reflective striping. Fit most hats and caps. Features include:

- Breathable, bright mesh fabric
- Choice of bright yellow-lime or orange colors
- Hat clips help to keep SunShade from falling or rotating
- Min Order Qty: 5

SUNSHADE HARD HAT ACCESSORY		
	10098032	SunShade, Yellow-Green, with reflective striping
	10098031	SunShade, Orange, with reflective striping

Sun Shields

Protect ears and neck from sun and heat with these easily attachable brims. Extends brim all the way around the helmet. Made of flexible, resilient polyurethane, these brims feature a smoke-tinted, Lexan constructed front:

- Polyurethane brim extender protects against sun and heat
- Easily attaches to helmets and caps
- Smoke-tinted Lexan front for extra protection

SUN SHIELD HARD HAT ACCESSORY		
	697290	Sun Shield, for Standard V-Gard Caps only
	697410	Sun Shield, for V-Gard Hats only
	10039114	Sun Shield, for V-Gard 500 Caps only

Chinstraps

Put and keep MSA helmets in their place with these comfortable, adjustable chinstraps.

- 2-, 3- and 4-point chinstraps available
- Non-metal chinstraps keep helmets in place
- Attaches directly to shell or suspension (as noted)
- Flexible construction and adjustable design for long-wearing comfort
- Available in cotton, polyester, nylon, or Nomex® webbing

CHINSTRAPS		
	10124238	Chinstrap, 4-pt, 3/4" polyester webbing, attaches to suspension (pkg of 10)
	10102191 ¹	Chinstrap, 2-pt, 3/4" Nomex webbing, attaches to shell
	81390 ²	Chinstrap, 2-pt, 3/4" cotton webbing, attaches to suspension
	81391 ²	Chinstrap, 2-pt, 3/4" polyester webbing, attaches to suspension
	81329	Chinstrap, 2-pt, 3/4" cotton webbing, attaches to shell
	88128	Chinstrap, 2-pt, 3/4" polyester webbing, attaches to shell
	804629	Chinstrap, 3-pt, 3/4" nylon webbing, for Vanguard helmets only

¹For elevated temperatures; flame-resistant.

²For use with MSA Staz-On suspensions only.

Custom Terri-Band Sweatband

Custom design fits all MSA suspensions. Washable, with plastic snaps.

CUSTOM TERRY SWEATBAND	10068911	Custom Terri-Band Sweatband (single)
	696688	Custom Terri-Band Sweatband (pkg of 10)

Helmet Lights

MSA offers two helmet lights that fit into our special cap adapters. Both of the lights are FM and CSA-approved for intrinsic safety, and are non-incendive.

HELMET LIGHTS	697259 ¹	VersaLite Helmet Light with 2 AA alkaline batteries
	697261 ²	Stealthlite Helmet Light (batteries not included)
	814322	Light holder for slotted cap, no metal parts

¹VersaLite Helmet Light does not include, but requires, slot adapter to work in helmet slots.
²Stealthlite Helmet Light does not include, but requires, batteries and a light holder to work in helmet slots.

Medical Information Carrier System

This simple helmet accessory provides crucial, lifesaving information in the event of a medical crisis on the job. Trilingual for today's multicultural workforce.

MEDICAL INFORMATION CARRIER SYETM	10013393	Medical Information Carrier System (pkg of 10)—English/Spanish/French
-----------------------------------	----------	---

In-Service Helmet Label

Add this label to the inside of helmet with the date the helmet was first used to track the shell's service life. MSA recommends that you replace the shell every 5 years and the suspension every 12 months.

IN-SERVICE HELMET LABEL	804358	In-Service Helmet Label (sheet of 25)
-------------------------	--------	---------------------------------------

Head, Eye, Face, and Hearing **Protection**

Welding Adapter Kits

Adapter Kits for Welding Shields and Defender+ Assembly

Kits permit the easy attachment of Welding Shields and Sparkgard Faceshields with visors to MSA's helmets.

Welding Shields and Accessories

MSA's thermal plastic welding shields protect workers' eyes and face from infrared burns, flying sparks, hot metal spatter and chips encountered in welding operations. The nylon welding shields come in a variety of styles.

For Shade 5 IR welding visors, see p. 133–134.
For Shade 5 IR welding spectacles, see p. 156.

ADAPTER KITS FOR WELDING SHIELDS AND DEFENDER+ ASSEMBLY		
WELDING ADAPTER KITS	488525	Standard Adapter for Welding Helmets and Sparkgards
	806211	EC Adapter Kit (positive positioning type)
	456568	Sparkgard only
PLASTIC INSTANT-RELEASE ATTACHMENT*	10036456	Quick Disconnect Kit, welder's adapter, with lugs
DEFENDER+ FRAME WITH INSTANT-RELEASE ATTACHMENT	10037098	Defender+ frame for slotted cap, without lock-down
METAL INSTANT-RELEASE ATTACHMENT	485460	Instant-Release and lugs for slotted caps (A, B, C, D, E, F, H)
	468771	Lugs only, for instant-release slotted caps (H)
	48733	Lugs only, for instant-release non-slotted caps (G)
WELDING SHIELDS AND ACCESSORIES		
WELDING SHIELDS ONLY <i>Less headgear and attachments</i>	695943	Plate Size: 2" x 4¼", non-coated black, slim-line, lift front

	696095	Plate Size: 4½" x 5¼", clear

*Note: Cannot be used on Vented V-Gard 500 Caps.

It is important that hearing protection used in a work environment provides sufficient noise attenuation to protect workers, but not so much protection that users are prevented from hearing their co-workers, alarms and other important signals. If workers must shout to hear each other from three feet away, noise levels are probably 85 dBA or more and hearing protectors are recommended.

For environments with impulse noises, select an electronic muff that not only amplifies sound to a predetermined safe level (82 dBA or lower), but which will also allow workers to communicate. However, in most cases, unless the environment has very loud or impulsive noises (such as gunfire or pneumatic equipment), properly selected, fitted and worn passive hearing protectors should provide sufficient protection. Check with the site safety specialist for specific hearing protection required.

Hearing Protection: Cap-Mounted, Electronic

Classification: Cap-mounted, electronic

Market(s): General industry, manufacturing, repair and maintenance, construction, oil and gas, forestry, shipbuilding, mining, military

Application(s): Hunting/shooting, food processing, construction, airlines, industries with high impulse noises, road maintenance, railroad work, pneumatic tools

Available Styles: left/RIGHT Cut-off
left/RIGHT Cut-off with FM radio (Dual Pro)

Noise Reduction Rating (NRR): 20 dBA

Features: Award-winning product design accounts for varying head, face and ear sizes/shapes
AUX input for connection to external devices, such as a portable media player or comms set
Battery save function and low battery warning
Earmuffs flip up and out of the way when not in use

Standards: Meets ANSI S3.19-1974 and CSA Class A standards

CAP-MOUNTED ELECTRONIC HEARING PROTECTION		Product Name	Part No.	Product Specifics
		left/RIGHT CutOff Pro	10111823 (yellow) 10111826 (blue)	<ul style="list-style-type: none"> • Amplifies weak sounds, letting speech and important signals through while protecting from high-impulse noise • Designed to work with MSA slotted helmets, including V-Gard Cap, V-Gard 500 Cap, Topgard® Cap, Thermalgard® Cap, and Super-V Cap • Up to 1000-hour battery life • Volume memory
		left/RIGHT Dual Pro	10111832 (blue)	<ul style="list-style-type: none"> • The level-dependent left/RIGHT Dual Pro ear muff provides a high level of hearing protection with a built-in FM radio • FM radio offers excellent reception and superior sound quality • Large push buttons for ease of use

¹Hygiene kits available for all products. Visit MSAsafety.com for details.

Head, Eye, Face, and Hearing **Protection**

Hearing Protection: Helmet-Mounted, Passive

Classification: Helmet-Mounted, Passive

Market(s): General industry, manufacturing, repair and maintenance, construction, oil and gas, forestry, shipbuilding, mining, military

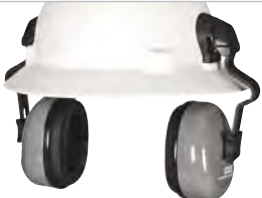

Application(s): Confined space, welding, sanding/grinding, power tools, occupations using noisy equipment

Available Styles: For Caps (left/RIGHT, Sound Control)
For Full Brim Slotted Helmets (Sound Control SH)

Noise Reduction Rating (NRR): Varies by product; see "Product Specifics" below. Stated NRR for medium V-Gard Helmets.

Features: Earmuffs flip up and out of the way when not in use

Standards: Meets ANSI S3.19-1974 and CSA Class A standards

HELMET-MOUNTED PASSIVE HEARING PROTECTION		Product Name	Part No.	Product Specifics
	left/RIGHT (HIGH)	10087422	<ul style="list-style-type: none"> • NRR 28 dBA • For MSA slotted caps • Distinct bright yellow cups • Dedicated right and left ear cups are designed to fit ears of all shapes and sizes for increased comfort and protection. • Precise fit provides maximum loud noise protection using minimal cup size • Muff cups adjust independently 	
	left/RIGHT (MED)	10087429	<ul style="list-style-type: none"> • NRR 25 dBA • For MSA slotted caps • Distinct blue cups 	
	Sound Control HPE	10061272	<ul style="list-style-type: none"> • NRR 27 dBA • For MSA slotted caps • Ideal for airfields, power plants and other areas with intense noise • The highest-rated protection available for low-frequency environments • Super-soft ear cushions help ensure all-day comfort 	
	Sound Control EXC	10061230	<ul style="list-style-type: none"> • NRR 25 dBA • For MSA slotted caps • Excellent noise attenuation with maximum ear space in cups • Spring design offers low-pressure and a high level of comfort 	
	Sound Control XLS	10061535	<ul style="list-style-type: none"> • NRR 23 dBA • For MSA slotted caps • Excellent grip makes it easy to adjust the cups, even when wearing gloves 	
	SoundControl SH	10129327	<ul style="list-style-type: none"> • NRR 25 dBA • For MSA Full Brim Slotted V-Gard Helmets • Three distinct wearing positions for ease of use • Easy cup height adjustment • Does not interfere with Class E rating of V-Gard Full Brim Helmet 	

Hearing Protection: Headband, Electronic

Classification: Headband, Electronic

Market(s): Oil, gas and petrochemicals, general industry, manufacturing, repair and maintenance, construction, shipbuilding, mining, military, recreational hunting/shooting

Application(s): Confined space, pneumatic machinery or equipment, oil rigs and drilling operations, gun ranges, airport ground personnel, maintenance, mechanics, industrial workers

Available Styles: Supreme Pro X
Supreme Pro

Noise Reduction Rating (NRR): Varies by product; see "Part No." below.

Features: Compresses hazardous noise to safe levels without "chopping" or "cutting off" important sounds, like instructions and warnings
Communicate and hear instructions without removing the hearing protector, regardless of background noise
Microphone and speaker sound levels are limited to a safe 82dB(A)
Compact, lightweight and foldable for easy storage
200-hour battery life with standard AAA batteries
AUX input for connection to external devices, such as a portable media player or comms set
3.5 mm mono cable included

Standards: Meets ANSI S3.19-1974 and CSA Class A standards

ELECTRONIC HEADBAND HEARING PROTECTION		Product Name	Part No.	Product Specifics
	Supreme Pro X	10082167 (NRR 18 dBA, headband)	10082166 (NRR 19 dBA, neckband)	<ul style="list-style-type: none"> • Offers an Ingress Protection Rating (IP) of 67, per the International Electrotechnical Commission (IEC) rating scale. Product tested to provide complete protection from dust ingress, and water ingress when immersed up to 1 meter (3 ft). • Well-shielded waterproof microphones for optimum sound direction location • Five-year (5) warranty on electronics.
	Supreme Pro	10061285 (NRR 18 dBA, headband)	10079966 (NRR 19 dBA, neckband)	<ul style="list-style-type: none"> • Splash-resistant • Less costly alternative to Supreme Pro X

Head, Eye, Face, and Hearing Protection

Hearing Protection: Headband, Passive

Classification: Headband, Passive

Market(s): Automotive, construction, food & beverage manufacturing, manufacturing, metal production & fabrication, military maintenance, repair and operation (MRO), mining, oil & gas, pharmaceutical, transportation

Application(s): Assembly, cleaning, demolition, electrical, sanding & grinding, machine operations, painting, sanding, welding

Available Styles: left/RIGHT
SoundControl
Economuff

Noise Reduction Rating (NRR): Varies by product; see "Product Specifics" below.

Features: Ease of use and consistent fit

Standards: Meets ANSI S3.19-1974 and CSA Class A standards

HEADBAND PASSIVE HEARING PROTECTION		Product Name	Part No.	Product Specifics
		left/RIGHT (HIGH)	10087399	<ul style="list-style-type: none"> • NRR 28 dBA • Distinct bright yellow cups • Dedicated right and left ear cups are designed to fit ears of all shapes and sizes for increased comfort and protection • Precise fit provides maximum loud noise protection using minimal cup size • Muff cups adjust independently
		left/RIGHT (MED)	10087426	<ul style="list-style-type: none"> • NRR 25 dBA • Distinct blue cups

		Sound Control HPE	10061271	<ul style="list-style-type: none"> • NRR 26 dBA • Provides the highest-rated protection available for low-frequency environments • Padded headband and super-soft ear cushions • Wide headband with ventilated padding provides a firm and comfortable fit • Easily adjustable headband force for individual fit
		Sound Control EXC	10061229	<ul style="list-style-type: none"> • NRR 24 dBA • Wide and soft padding provides a firm fit • Adjustable headband force for individual fit • Two-point mounting system ensures pressure is distributed evenly around the cushion
		Economuff	10004291	<ul style="list-style-type: none"> • NRR 20 dBA • Large earcup openings to fit most ear sizes • Soft, wide cushions for even pressure and extra comfort • Outstanding comfort and protection for the budget-conscious

Hearing Protection: Earplugs

Classification: Earplugs, Foam

Market(s): General industry, manufacturing, repair and maintenance, construction, oil and gas, forestry, shipbuilding, mining, military

Application(s): Assembly, cleaning, demolition, electrical, sanding & grinding, machine operations, painting, sanding.

Available Styles: Corded, 200-pair with jar-style counter dispenser
Uncorded, 200-pair with jar-style counter dispenser

Noise Reduction Rating (NRR): 31 dBA

Features: 2-packs of individually wrapped expandable foam ear plugs
Soft, low ear pressure plugs are comfortable for a variety of activities
Easy to roll foam easily inserts into ear and then expands for a comfortable, custom fit

Standards: Meets ANSI S3.19-1974 and CSA Class A standards

EARPLUGS	Product Name	Part No.	Product Specifics

Head, Eye, Face, and Hearing **Protection**

Sightgard® Protective Eyewear

All MSA Sightgard Safety Glasses and Goggles listed in this catalog are compliant with the general protector and impact requirements of ANSI/ISEA Z87.1-2010. Many are also compliant with CSA Z94.3-2007 and/or listed with CSA International as certified (as noted).

Eyewear Features

MSA Sightgard Protective Eyewear line offers *great styles – great options – great value:*

- Anti-fog coating and/or UV 400 additive offered on many styles.
- Anti-scratch coating provides excellent scratch resistance, extending lens life—a “must have” in abrasive work environments.
- Horizontal (sliding) or vertical (ratchet) temple adjustment models offer custom fit.
- Soft rubber nose bridges offer comfortable, non-slip support.
- Flexible rubber-tipped temples provide comfortable, all-day wearing.

Try It! Program

Many studies have shown that if eyewear impairs vision or is uncomfortable, workers tend to wear it incorrectly to compensate or remove it altogether — strongly increasing the risk of serious injury, as well as workers’ compensation claims and other costs. **MSA wants to help.**

Our **FREE** sample “Try It!” program offers 100+ products customers can sample *before* they buy them. Most MSA Sightgard safety eyewear are included. Just look for the “Try It!” symbol and call your MSA representative for your **free** sample!

Choosing the Proper Lens

Choosing the right lens for the job will not only protect eyes, but could also improve the wearer’s working experience. Our Lens Color Reference Chart lists benefits and uses for common lens options.

LENS COLOR/TINTS						
USE	Good for low-light conditions, especially at dawn/dusk and on foggy days. Increases contrast and enhances detail. Ideal lens for operations requiring optimum contrast of similar or small objects.	General purpose lens for indoor use, or outdoor use in low-light conditions. Provides maximum light transmission.	Enhances perception in changing light and shadow. Good for low light conditions.	Allows easy transition from inside to outside with same pair of glasses. Ideal for use while driving.	Most popular lens tint for outdoor use. Protects against visible glare without color degradation. Good choice for outdoor work, such as construction and landscaping.	Offers the same benefits as light mirror, but also allows easy transition from inside to outside with same pair of glasses. Ideal lens for occupations such as forklift drivers, dock workers, and truck drivers.
LENS COLOR/TINTS						
USE	Reduces glare and bright sunlight by reflecting light away from the lens. Enhances contrast without color degradation. Good general purpose lens for outdoor use.	Reduces intense sun glare reflected off shiny surfaces such as snow, water, sand and pavement. Improves contrast and depth perception. Great for outdoor use; not good for use while driving.	Superior glare reduction with heavy mirroring. Great lens for outdoor use in full sun conditions—favored by outdoor workers such as roofers, landscapers and builders.	Protects against low to medium infrared (IR) radiation up to Shade 5. Good choice for metal pouring, gas soldering, cutting and brazing operations.	Alleviates eye strain and fatigue by reducing glare caused by fluorescent and halogen lighting. Enhances contrast by absorbing all colors equally. Good choice for inspection operations or assembly work.	Blocks High-Energy Visible (HEV) light, also known as blue light (~400-500 nm). Blue light has been linked to certain eye diseases (such as macular degeneration) and to the suppression of melatonin (a hormone that helps regulate other hormones and stabilizes sleep patterns).

Sightgard Safety Glasses: Indoor Humid Conditions

Classification: Indoor: humid environments

Market(s): Facility maintenance, repair and operations, construction, food and beverage, general manufacturing and industry, mining, oil and gas, pharmaceuticals, transportation, shipbuilding, automotive

Application(s): Assembly and mechanical, drilling, grinding, machining, painting, sanding, sawing

Material: Polycarbonate

Features: Anti-fog coating
Clear lenses
Impact-rated (Z87+)
Anti-scratch coating (as noted)

Standards¹: ANSI/ISEA Z87.1-2010 and CSA Z94.3 (as noted)

Certification: Third-party by Intertek and CSA International

Min Order Qty: 12

OSHA's Occupational Safety and Health Standards for General Industry

Subpart D, Walking/Working Surfaces

- Fixed Ladders, Ladder Safety Devices 1910.27 (d) (5)
- Safety Requirements for Scaffolding, Boatswain's Chairs 1910.28 (j) (4)

Subpart F

- Powered Platforms and Building Maintenance 1910.66
- Personal Fall Arrest Systems 1910.66, Appendix C

Subpart R

- Agricultural Operations 1910.267
- Telecommunications 1910.268
- Electric Power Generation, Transmission and Distribution 1910.269

OSHA's Safety and Health Standards for Construction

Subpart E, Personal Protective Equipment

- Safety Belts, Lifelines and Lanyards 1926.104
- Safety Requirements for Scaffolding, Boatswain's Chairs 1926.105

Subpart L, Scaffolding

- Boatswain's Chairs 1926.450–454
- Aerial Lift Platforms 1926.453 (b) (2) (v)

Subpart M, Fall Protection

- Scope, Application and Definitions 1926.500
- Duty to Have Fall Protection 1926.501
- Scope, Application and Definitions 1926.502
- Duty to Have Fall Protection 1926.503

Subpart R, Scaffolding

- Fall Protection 1926.750

- Subpart M, Ladders 1926.1053

Approvals and Standards

What is ANSI?

ANSI (American National Standards Institute) is a voluntary standardization system and does not possess the ability to enforce its standards. ANSI facilitates development of national standards by establishing consensus among manufacturers and consumers. Many of OSHA's regulations are adopted from ANSI standards.

ANSI Z359 Standard for Personal Fall Arrest

- ANSI Z359.0Definitions
- ANSI Z359.1Fall Arrest Systems, Subsystems and Components
- ANSI Z359.2Minimum Requirements for a Comprehensive, Managed Fall Protection Program
- ANSI Z359.3Work Positioning and Travel Restriction Systems, Subsystems and Components
- ANSI Z359.4Assisted-Rescue and Self-Rescue Systems, Subsystems and Components
- ANSI Z359.6Specifications and Design Requirements for Active Fall Protection Systems
- ANSI Z359.12Connecting Components for Personal Fall Arrest Systems
- ANSI Z359.13Personal Energy Absorbers and Energy Absorbing Lanyards
- ANSI Z359.14Self-Retracting Devices

What is CSA?

The Canadian Standards Association (CSA) Technical Committee Z259 sets standards for fall protection equipment and practices. The CSA Certification and Test Division is responsible for testing and certifying products to the CSA Z259 product standards. Other certification organizations, including the Safety Equipment Institute, also certify fall protection equipment to the CSA Z259 standards. Products that are certified to the Z259 fall protection standards carry compliance markings of the certifying agency, for example:  or *CSEI*. All Canadian Provinces and Territories require that fall protection equipment must be certified by a recognized third-party organization in compliance with Canadian standards (or meet equivalent levels of protection approved by the legislative authority).

CANADIAN STANDARDS UNDER THE CSA Z259 FALL PROTECTION SERIES

- CAN/CSA Z259.10-06Full Body Harnesses
- CAN/CSA Z259.11-05Energy Absorbers and Lanyards
- CAN/CSA Z259.12-01Connecting Components for Personal Fall Arrest Systems
- CAN/CSA Z259.13-04Design of Active Fall Protection Systems
- CAN/CSA Z259.16-04Design of Active Fall Protection Systems
- CAN/CSA Z259.2.1-1998Fall Arresters, Vertical Lifelines and Rails
- CAN/CSA Z259.2.2-1999Self-Retracting Devices for Personal Fall Arrest Systems
- CAN/CSA Z259.2.3-1999Descent Control Devices

OUR COMMITMENT
TO YOU...

The MSA Fall Protection Promise

MSA promises to replace any MSA harness and/or textile lanyard FREE of charge if a user falls while properly using our product. If the fall occurs while using an MSA mechanical device, we will re-certify the device FREE of charge.

MSA believes that it is important to provide high quality products and recognize safe work practices.

Products should be returned with a signed copy of the accident report to:

MSA

Attn: Fall Protection Product Line Manager
1100 Cranberry Woods Drive
Cranberry Township, PA 16066-5204

Need it **NOW?** Call MSA!

Need it NOW! is our fall protection delivery program that's designed to get you the products you need, when you need them — **NOW!**

Two tiers of priority shipping are offered under the **Need it NOW!** delivery program:

- Tier I includes MSA's most popular products. Tier I delivery offers same day or next-day shipping.
- Tier II delivery offers shipping within 5 days.

Products included in this program are identified by the following symbols:

- Symbols with a 1 denote Tier I product status  
- Symbols with a 2 denote Tier II product status  
- Black symbols denote that the maximum order quantity for priority shipping is 100 units  
- Red symbols denote that the maximum order quantity for priority shipping is 50 units  

Visit our website at www.MSAafety.com to view complete program terms and conditions.

Fall Protection

Attachment points

Fall arrest systems are an assembly of components and subsystems, including the necessary connectors, used to arrest the user in a fall from a working height and suspend the user until rescue can be effected.

Suspension Systems permit workers to sit and work safely while elevated. The system is designed to raise or lower, and support a worker at an elevated work station. This system alone cannot be relied upon to provide proper fall arrest protection.

Restraint Systems are an assembly of components and subsystems, including the necessary connectors, used to: (a) stabilize and partially support the user at an elevated work location and allow free use of both hands; (b) restrict the user's motion so as to prevent reaching a location where a fall hazard exists.

Personnel-Riding Systems provide a quick means of raising a user out of, or lowering a worker into, a working environment. The system supports full body weight for a short period of time, but should not be used for suspension. A retrieval system by itself may not provide all the protection a worker requires. Fall arrest and/or restraint systems may also be required.

Harness Sizing Chart

Field ID and RFID

What is Field ID?

Field ID is an extremely simple yet powerful electronic inspection and safety compliance management system. Field ID simplifies and expedites equipment tracking, inspection, and compliance data management for those responsible for administering fall protection programs.

Field ID—A Resource Checklist

24/7 Web & Mobile Access	✓
Use Smartphones, Tablets and Mobile Devices in the Field	✓
Free Apple iOS and Google Android Apps	✓
Easy to Use & Simple Setup Process	✓
Live Online and Onsite Training Available	✓
RFID, NFC & Barcode Compatible	✓
Customizable Web Interface	✓
Scheduling & Email Notifications	✓
Instant Reporting	✓
Equipment & Asset Management	✓
GPS	✓
Multi-User Capabilities	✓
Safety Network Sharing	✓
Free Trial	✓
Live phone support from an award-winning third-party software provider	✓

How do I begin using Field ID?

RFID Field Retro Kit Ordering Information

Both kits come with:

- RFID chip
- Two means of attachment to product:
 - Key ring
 - Cable tie

Use either the key ring or cable tie method to securely attach the RFID chip to your product.

	10113494	RFID Field Retro Kit, pack of 20

EVOTECH® Full Body Harness

EVOTECH Full-Body Harness
Part No. 10105944

For the latest design features that improve user comfort, ease of use, durability, and user safety, choose the **EVOTECH Full Body Harness**. The EVOTECH Harness is RFID enabled, offering the Field ID Safety Network with Field ID access to provide a reliable, on-line inspection and safety compliance (ISCM) management system.

EVOTECH Construction Harness
Part No. 10112710

EVOTECH Tower Harness
Part No. 10112760

EVOTECH® Harness Features and Benefits

- Breathable padding with moisture-wicking material keeps users cooler
- No binding edge on shoulder padding prevents neck chafing
- Sub-Pelvic Strap with patented variable width webbing provides 50% more surface area for better weight distribution and improved comfort
- Patent-pending leg strap design keeps leg straps in place, increasing mobility and comfort
- Dual-color webbing—red pattern on outside, black on inside—promotes easy identification of twisted webbing
- Patent-pending web management system provides means of storing excess webbing
- 3-position back D-ring allows users to determine optimal lanyard connection position
- Web finials prevent fraying on web ends and simplify threading through buckles
- NanoSphere® coating on webbing repels dirt, grease, moisture, etc.
- Available with Suspension Trauma Safety Step to improve post-fall comfort and help prevent suspension trauma
- Reflective webbing integrated into harness webbing increases visibility in low-light environment
- Construction Harness features integral back pad and tool belt with dual-durometer padding for superior comfort in work positioning applications.

TechnaCurv® Full Body Harnesses

TechnaCurv Full Body Harnesses offer features never seen before in full-body harnesses: Curvilinear comfort system, Visco-Elastic shoulder padding, Secure-Fit buckles, and Sorbtek fabric on the shoulder and sub-pelvic pads. The harness is designed with downward adjusting torso straps on most models to ease fitting. MSA's assemble-to-order (ATO) process allows you to order exactly (and only) the options you want, providing you with the most comfortable, versatile, and safe harness available today.

Features and Benefits

- Resists water, oil, grease, and dirt with Teflon fabric protected webbing which increases the life of the harness
- Uses Visco-Elastic shoulder padding for comfort
- Designed with downward adjusting torso straps to ease fitting
- Tower Harness model available with integral body belt and removable saddle
- Order through MSA's assemble-to-order process to get the options you want

Value Added **NEW!**

The TechnaCurv Full Body Harness is now RFID-enabled, offering the Field ID Safety Network with Field ID Access to provide a reliable, online inspection and safety compliance (ISCM) management system.

- Harnesses ordered using the ATO System are non-returnable.
- If a Vest Style Harness with a Chest D-ring is selected, the Secure-Fit Buckle is not available as an option for the Chest Strap. (All Tower Style Harnesses include a Chest D-ring.)
- Tower Harness Styles include back pad, tool belt and saddle. (Tool Belt options listed in ATO are not available on Tower Harness.)
- Only D-ring Configuration Options 3 and 4 are available on the Tower Harness Style.
- TechnaCurv Construction Harness is not available on ATO.

Workman® Full-Body Harnesses

Workman Harness
Part No. 10108768

Workman Harness
Part No. 10072479

Quality, comfort, and value come together in the Workman line of products. Workman Full Body and Construction Harnesses feature lightweight components and durable webbing.

Features and Benefits

- Optimum quality at an economical price
- Yellow polyester webbing for increased visibility
- Color-contrasting thigh and torso straps simplify donning
- Choice of Qwik-Fit or tongue-buckle leg straps for easy adjustment
- Web retainer collars to keep excess webbing neat
- Includes two lanyard keepers for added safety when lanyard leg is not in use
- All Workman Harnesses include a load-indicator to alert you when the harness has been involved in a fall event

For more complete information on Workman Products,
see Bulletin 2302-11-MC.

Gravity™ Harnesses

Available in vest and cross-over styles and rated to a 400 pound capacity, Gravity Harnesses are suitable for controlled descent, positioning, ladder climbing, rescue, and fall arrest. A variety of options are available to meet your specific needs.

Features and Benefits

- Color-contrasting thigh and torso straps simplify donning
- Integral belt and comfortable saddle assist with support, position, restraint, and climb movements
- Includes two lanyard keepers for added safety when lanyard leg is not in use
- Includes a load-indicator to alert you when the harness has been involved in a fall event

For Gravity Harnesses with a belt, belt sizing is as follows:

<i>XSM</i>	<i>SML</i>	<i>MED</i>	<i>LGE</i>	<i>XLG</i>
28" – 36"	32" – 40"	36" – 44"	40" – 48"	44" – 52"

Harness Classes as defined in CSA Z259.10-06

Class A: Fall Arrest

Class D: Suspension & Controlled Descent

Class E: Evacuation

Class L: Ladder Climbing

Class P: Work Positioning

ArcSafe® Full-Body Harnesses

Maintenance and utility workers are protected from the hazard of high-energy electric arc flash while wearing ArcSafe Harnesses. This harness may also be used for retrieval from a confined space. The nylon web loop that is included adds comfort by reducing overall harness weight and also reduces potential of electrical arc to the harness.

Features and Benefits

- SEI-certified to the requirements of the ASTM F887-05 standard for arc flash protection up to 40 cal/cm²
- Nylon web loop attachment points
- Meets all applicable OSHA regulations and ANSI Z359.1 standards
- Certified to CSA Z259.10-06
- Integral load indicator
- 400 pound capacity
- Y-shaped back web loop locator pad provides comfort by moving the webbing away from the wearer's neck
- Color-coded leg and torso straps simplify donning
- Downward-adjusting torso straps ease adjustment

Energy-Absorbing Lanyards

Energy-absorbing lanyards are a component of a personal fall arrest system. They provide a means of connection between the back D-ring of MSA full body harnesses and a qualified anchorage and anchorage connector. The energy absorber keeps fall arrest forces below ANSI and OSHA limits and deceleration distance is controlled to a maximum of 42 inches. The lanyard is available in web, rope, and wire rope configurations with a variety of snaphooks.

Snaphooks

Workman Energy-Absorbing Lanyards

When a fall hazard is present, use a lightweight, low-profile Workman Energy-Absorbing Lanyard. The energy absorber not only limits force on the body in a fall, but also on the anchor location. The shock absorber includes a clear, durable protective cover over the labels to increase service life and allow for easy inspection.

- Tear-tape design to keep average fall arrest forces below 900 lbs.
- Choice of single- or twin-leg configurations
- Choice of adjustable or tie-back configurations

ArcSafe Energy-Absorbing Lanyards

Providing electrical arc flash protection, ArcSafe Lanyards use a tear-tape design to keep fall arrest forces and deceleration distances below ANSI, OSHA, and CSA limitations. ArcSafe Energy-Absorbing Lanyards connect the back D-ring of MSA full-body harnesses to a qualified anchorage and anchorage connector.

- Limits average fall arrest forces to 900 pounds or less
- Constructed of nylon webbing and length is adjustable
- Includes sewn loop on shock-absorber end and 36C snaphook on lanyard leg
- Incorporates a protective cover over the energy-absorber

FP5K® Tie-Back Energy-Absorbing Lanyards

The dependable FP5K Tie-Back Energy-Absorbing Lanyard uses an FP5K Carabiner which can be tied directly back to the lanyard. This product uses the Sure-Stop energy absorber to keep fall arrest forces within the limitations set by ANSI, OSHA, and CSA. It's unique carabiner body shape helps avoid confusion with standard connectors not designed for tie-back applications.

- 5,000 lb gate strength in any direction allows the FP5K carabiner to be tied back directly to the lanyard
- Monster-Edge Webbing with 12,000 pound minimum breaking strength
- Internal wear indicator consists of two yellow threads that, when visible, alert a user when the lanyard should be removed from service due to severe abrasion
- Available in both single- and twin-leg configurations

Diamond™ Energy-Absorbing Lanyards and Expanyards

Raising the standard for energy-absorbing lanyards, the FP Diamond Energy-Absorbing Lanyard's light weight and streamlined design contains a strong and durable polyester sheath that's abrasion and UV-resistant. FP Diamond Energy-Absorbing Lanyards connect the back D-ring of MSA full-body harnesses to a qualified anchorage and anchorage connector. The energy absorber keeps fall arrest forces and deceleration distances below ANSI, CSA, and OSHA limits.

- Keeps average fall arrest forces below 900 lbs
- Durable polyester sheath for increased abrasion and UV resistance
- Highly visible deployment tag
- Pouchless design for lighter weight and comfortable wear
- Single- and twin-leg configurations
- Single leg FP Diamond is bi-directional to make training easier
- Twin leg FP Diamond allows for 100% tie off
- Now available in Kevlar

Sure-Stop® Energy-Absorbing Lanyards

Using a tear tape design, the Sure-Stop Energy-Absorbing Lanyard keeps fall arrest forces and deceleration distances within the limitations set by ANSI, CSA, and OSHA. Energy absorbing lanyards are a component of a personal fall arrest system. They provide a means of connection between the back D-ring of MSA full-body harnesses and a qualified anchorage and anchorage connector.

- Tear tape design to keep average fall arrest forces below 900 lbs
- Available in adjustable or fixed lengths with your choice of rope, cable, or web
- Single- or twin-leg configurations
- Clear shock-absorber cover protects labels
- Heavy worker model available which uses gray webbing in the pouch to visually differentiate from standard lanyards

Thermatek® Energy-Absorbing Lanyard

Specially designed for high-heat applications, Thermatek® Energy-Absorbing Lanyards feature a Tuffweld protective cover over the energy-absorber and a Kevlar back-up strap inside the energy-absorbing pouch. Energy Absorbing Lanyards connect the back D-ring of MSA full-body harnesses to a qualified anchorage and anchorage connector. The energy absorber keeps fall arrest forces and deceleration distances within the limitations set by ANSI, CSA, and OSHA.

- Designed to hold up to heat and for use in the welding industry
- Tuffweld protective cover that is superior to Nomex
- Kevlar back-up strap is resistant to charring and burning
- Thermatek 12 lanyard model arrests a free-fall up to 12 feet and keeps fall arrest forces below OSHA limits
- Available in Kevlar web

Workman Personal Fall Limiters (PFL)

The Workman Personal Fall Limiter (PFL) and the Workman Twin Leg Personal Fall Limiter are two of the most versatile fall protection devices available on the market today. The Workman PFL has a fast acting brake mechanism and the Workman Twin Leg PFL offers a great alternative to twin-leg energy-absorbing lanyards.

- Rugged, impact-absorbing protective bumpers for added durability
- A 400 lb. working capacity eliminates the need to custom order a product for a worker exceeding 310 lbs
- ATO ordering flexibility allows you to order the exact and only options you want

- Replaceable Lifeline feature not available on Workman PFL's with cable lifeline.
- Workman PFL's ordered using the ATO matrix are not returnable.
- Large snaphooks (AL64 and 36CL) available with Back D-ring Connector on PFL Connector only

Workman Self-Retracting Lanyard (SRL)

With lightweight design, durable thermoplastic housing and impact-absorbing bumpers, the Workman SRL will not only be accepted by users, but also provides years of dependable service.

- RFID-enabled product for simplified product tracking and inspection
- 400-lb working capacity for increased versatility
- Integral, ergonomic carrying handle for easier transport and installation
- Available with galvanized or stainless steel lifeline to fit your varied applications
- Swivel snaphook with load indicator at lifeline end greatly limits twisting of cable; also alerts users that the Workman SRL has been involved in a fall
- Available in 30-ft and 50-ft lengths to provide the mobility you need
- Certification to ANSI Z359.14-2012 and CSA Z259.2.2 for compliance and peace of mind
- Meets all OSHA requirements

Fall Protection

Aptura® LT 30 Self-Retracting Lanyard (SRL)

With its solid design and fast-acting brake mechanism, the Aptura LT 30 SRL is the lightest weight, most versatile SRL available on the market today.

- Durable, high-impact thermoplastic housing to increase service life
- Rugged, impact-absorbing protective bumpers for added durability
- Field-replaceable lifeline option
- Lightweight design starting at 7.5 pounds
- A standard lifeline length of 30' with lengths available from 13' to 30' in 1' increments
- A 400 pound working capacity as a standard feature
- No annual factory re-certification required due to high-quality construction
- An integral load indicator lets you know when it is time to remove the product from service
- ATO ordering flexibility allows you to order the exact and only the options you want

Dyna-Lock® Self-Retracting Lanyards (SRL)

The MSA Dyna-Lock Self-Retracting Lanyards (SRL) are fast-acting fall arresters that limit free-fall distance, deceleration distance and fall arrest forces while allowing user freedom of movement. The Dyna-Lock SRL is ideal for climbing applications where vertical mobility is needed.

Features and Benefits

- Three independent locking mechanisms provide proven dependability in corrosive or freezing environments
- Integral energy absorber limits average fall arrest forces to 900 lbs or less
- Visual impact loading indicator on snaphook that alerts the user when the unit has been subjected to a load
- Wire rope available in galvanized or stainless steel
- Swivel snaphook to prevent birdcaging or kinking of lifeline
- Roller nozzle reduces wear on cable
- Durable stainless steel and extruded aluminum housing on web Dyna-Lock SRLs
- Durable galvanized steel housing on cable Dyna-Lock SRLs
- Integral carrying/mounting handle
- 4.5 feet per second locking speed

Fall Protection

Restraint Lanyards

Restraint lanyards are primarily used for travel restriction (to restrain a worker from reaching a fall hazard) and work positioning (stabilizing a worker at an elevated location) applications. All restraint lanyards meet applicable OSHA regulations. Compliance to CSA is noted in the tables below.

Part No. 506632

Anchorage Connector Components

For use in fall arrest and confined space entry applications.

- Anchorage Connector Extension features a 3,600 lb rated snaphook on one end and a 3" O-ring on the other
- Bolt D-ring with Hole Anchorage Connector is a permanent anchor connector designed for coupling a single fall arrest system to an anchorage such as beams or girders
- D-Plate Anchorage Connector provides a permanent anchorage point
- Chain Anchorage Connector is a temporary component for use near sharp edges or in high heat
- Large Hook with Strap is a temporary, overhead anchorage connector
- ManSafe Freestanding Constant Force Post is tested and approved for use on concrete, single-ply membrane, asphalt sanded, asphalt stone-chipped, and steel roof profiles (See Bulletin 2301-59-MC for more information.)

Fall Protection Kits

RCD® (Remote Connect/Disconnect) System

By using the strap tool the user can install the anchorage connector strap to an approved overhead anchorage point. By using the connect/disconnect tool the user can attach any lifeline with a 36C snaphook to the overhead anchorage connector strap, use the same tool to remove the lifeline from the overhead anchorage and then to remove the anchorage connector strap.

RCD (REMOTE CONNECT/DISCONNECT) SYSTEM	501443	Remote Connect/Disconnect System

	10129597	Remote Connect/Disconnect Tool
507405	Large tote bag	

Anthron Descent Device System

The Anthron Descender is a manually operated, controlled descent device most commonly used for suspended work positioning, self-evacuation, or rescue operations. A cam assembly provides friction on the rope to hold a load or allow the load to descend at a controlled rate. The system consists of a 7/16" (11mm) rope, the Anthron Descender, and two carabiners. Proper roping and rigging diagrams are on the side of the device, which can be installed or removed at any point on the rope and has a working load of 300 pounds (136 kg).

- Device can be installed/removed at any point on the rope.
- Proper roping/rigging diagrams on the side of the Anthron Descender
- Working load of 300 lbs (136 kg)
- System consists of a 7/16" (11 mm) rope, Anthron Descender, and 2 carabiners

Rope Grabs and Vertical Lifelines

Rope Grabs are designed as a means of fall arrest between a worker wearing a compatible full-body harness and a suitable fall arrest anchorage. They are used to arrest the user in a fall from a working height and suspend the user until rescue can be affected.

- Available in permanent and temporary models

Workman Tripod and Workman Confined Space Entry Kits

MSA Tripods make confined space entry with vertical descent easy. The Workman Tripod features internal leg-locking mechanism, maximum height indicator on the tripod legs, cut-resistant leg pin retention chains, recessed product labels, reduced weight and integral carrying strap. The Workman Tripod can be set up and dismantled without the use of tools.

- Automatic hinge lock legs with incremental adjustment
- Skid resistant feet

Complete confined space entry kits for multiple confined space applications. Features three tripod kits and two folding davit kits with a single part number for simplified ordering.

- Allow for non-entry rescue of a confined space entrant and great portability
- Lift and lower materials and personnel via the hoist while having the ability to use an SRL

Lynx Personnel/Material Hoist

A rugged, versatile and economical hoist for lifting, lowering and positioning of personnel and materials in confined space applications. Designed for a maximum workload of 310 lbs for personnel (10:1 design factor) and 620 lbs for materials (5:1 design factor), the Lynx personnel/material hoist provides an all steel construction with an internal energy absorber that operates even when usable length of line is fully extracted. Side, boom and socket mount hoists have integral brackets for attachment to the Workman tripod, davit systems, and qualified anchorage connectors. Each unit has a galvanized or stainless steel wire rope line with a self-locking swivel snaphook. **An optional air drive adapter enables powered lifting and lowering with separate air-powered drive assembly.**

Features and Benefits

- Designed for lifting, lowering, and positioning of personnel and materials
- Maximum work load of 310 lbs for personnel and 620 lbs for materials
- Anti-backlash crank handle with a lifting/lowering speed of 25 ft per minute
- Integral shock absorber
- Load-limiting clutch prevents overloading of hoist
- Emergency drive allows manual bypass of load-limiting clutch for extra lifting capacity in an emergency
- Air drive adapter enables powered lifting/lowering with optional air-powered drive assembly
- Includes a galvanized or stainless steel wire rope line with a self-locking swivel snaphook
- Primary gear backed up by two independent secondary brakes

Davits

**Folding Davit
Confined Space
Entry**

Folding Davit and Base

The Folding Davit and Base is a portable and economical anchorage connector used where a tripod will not work. Available with a zinc-plated alloy-steel Davit Arm and your choice of zinc-plated carbon steel or stainless steel Davit Base. This lightweight device provides a 24-inch reach and 77 inches of head clearance. It pivots 360-degrees and can readily maneuver personnel and materials between spaces below the deck where it is mounted. The Folding Davit may be carried from base to base and installed in minutes. Meets or exceeds ANSI Z359.1 and applicable OSHA requirements. Mounting brackets and pulleys sold separately.

Column Davit and Base

The Column Davit and Base are used for more permanent conditions where a tripod will not work. Available with a zinc-plated alloy-steel Davit Arm and zinc-plated carbon steel or stainless steel bases. Provides a 30 inch reach and 77 inches of head clearance. Pivots 360 degrees. Meets or exceeds applicable OSHA requirements. Mounting brackets and pulleys sold separately.

Ladder Climbing Equipment: Dyna-Glide® Climbing System

This system is used to arrest falls from heights where workers may be climbing up ladders, towers, or almost any structure. These systems enhance the way a climber is able to perform the necessary work. Our systems can be mounted to already-installed ladders, to corners of lattice towers, and to other suitably strong structures your crew needs to climb. Using different MSA mounting assemblies, Dyna-Glide systems can be attached to almost any structure that is permissible to climb. Systems can be constructed to continuously protect climbers—whether they're traveling vertically, horizontally, or around curves, corners, or obstacles. For added performance, the Dyna-Glide system can be used by more than one person at a time.

- Limits total fall distance to inches
- Components for complete rescue systems
- Allows for vertical and horizontal mobility
- Galvanized or stainless steel for corrosion resistance
- Your choice of Ladder Rail Combination (LRC) or Rail only
- Provides smooth travel—there's no binding of the fall arresters inside the rail
- Detachable, lightweight, stainless steel, and aluminum mechanism for hands-free ascent and descent
- Variety of accessories to enhance mobility and provide continuous protection, convenience, and comfort (if needed)

Two Examples of Dyna-Glide Assembly & Applications

Ladder Rail Combination Assembly (LRC) System

Ladder Climbing Equipment: Dyna-Glide® Climbing System

Rail Only System Assembly

	506283	Mounting angle corner, galvanized
	506312	Ungated top end stop, stainless steel
	506329	Rail connector, galvanized
	506388	Ladder/Rail Combination (LRC) standoff bracket, galvanized, standard length 7' 4-3/16"
	506389	LRC standoff bracket, bottom, galvanized
	506390	LRC, galvanized (CSA Part No. 10006461)
	506391	LRC side rail connector, galvanized

For more complete information on the Dyna-Glide System, see the Dyna-Glide Catalog (Bulletin 2300-22-MC).

Gravity Dyna-Line® Temporary Synthetic Horizontal Lifeline

Designed for easy installation and removal, the Dyna-Line Horizontal Lifeline is the temporary horizontal lifeline system created for a wide range of applications. Can be mounted to any suitable 5,000-pound rated anchorage point and can be rigged using many standard components, eliminating the need for special or "engineered" equipment. Has an integral line tensioner that allows proper tensioning of the lifeline before use. The Dyna-Line is the ultimate system for your crews.

- Highly visible 12-strand red rope will not hockle and minimizes fall distance due to its low stretch properties
- Can be used with any suitable 5000 lb. rated anchorage
- Single-Worker or Two-Worker system
- Load indicator on the Single-Worker kit and an energy absorber on the Two-Worker system clearly indicates that the system has seen fall arrest forces and should be removed from use
- Can be rigged using many standard components, reducing the need for special or engineered equipment
- Lengths up to 200 ft. System comes in a handy bucket for lengths up to 60 ft.

Value Added

- Bypass shuttles will soon be available on all two-worker temporary horizontal lifelines
- Allows users to pass each other on the same system while maintaining 100% tie-off

Gravity Sure-Line™ Temporary Synthetic Horizontal Lifeline

Designed for quick and easy installation at temporary work sites, the Sure-Line Horizontal Lifeline is suspended between two approved anchor points to provide worker fall protection during horizontal movement. This lightweight system is rated for two people.

- Incorporates a combination clamp/thimble that allows for effortless tensioning of the lifeline
- Available in 20 ft, 40 ft, or 60 ft lengths in two models (with and without turnbuckles)
- Includes an integral energy absorber

Horizon® Permanent Horizontal Lifeline

This complete above-beam cable horizontal lifeline system allows for a continuous tie off point along the line of travel. Below Beam Horizontal Lifelines kits come in 30 ft or 60 ft lifeline lengths. Each kit includes: beam grips, end fittings, shock absorber, lifeline, open wedge socket, turnbuckle.

⚠ WARNING

OSHA regulations state "Horizontal Lifeline Systems shall be designed, installed and used under supervision of a qualified person, as part of a complete fall arrest system, which maintains a safety factor of at least two." A qualified person is defined as "one with a recognized degree or professional certificate and/or extensive knowledge and experience in the subject field, who is capable of design, analysis, evaluation and specifications in the subject work, project or product." MSA can recommend a qualified person to design and install a Horizontal Lifeline System.

Horizontal Lifeline Kit Component Parts

Horizontal Lifeline Stanchions

MSA offers several Horizontal Lifeline Stanchion Kits to meet a variety of applications and provide fall protection for multiple workers.

- Quick and easy installation
- For use as a single-point anchor attachment for workers while installing lifelines

Sure-Rail™ Horizontal Lifeline

Customizable to your application, the Sure-Rail Horizontal Lifeline is typically used in areas with limited clearance below the working surface. This system consists of galvanized steel 1/2x2x10 rail sections, an aluminum rail trolley with stainless steel wheels, end stops, and various mounting hardware. This product provides ease of movement, little or no deflection in the rail limits fall distance and fall arrest forces on the body. The design of the Sure-Rail Horizontal Lifeline allows for even distribution of fall arrest forces to the structure, and its twin-track configuration allows users to bypass each other without having to disconnect and reconnect.

- Available in many standard configurations, can also be customized
- Twin-track configuration allows users to bypass each other without having to disconnect and reconnect
- Spring-loaded end stops provide easy insertion/removal of the trolley
- Bent rails are available for travel around corners

Structural supports, such as the hollow steel shape illustrated here, are not included with the Sure-Rail System. Design and fabrication of structural supports are the responsibility of the purchaser.

Custom fabrication of structure is not included in kits.

Rescue Equipment: FP Rescue™ Pulleys & Components

SuretyMan™ Pulleys

Designed to meet the rigorous standards of the professional rescuer. Built with high grade aluminum side plates and sheaves, oilite bearings, stainless steel bolts, washers, and lock nuts make these some of the best pulleys available. The aluminum side plates swivel and rotate to allow the pulley to be attached anywhere along the rope. The top holes of the side plates are large enough to accept three carabiners. Contain Prusik design (squared corners of the side plates) to provide rope security with a Prusik hitch. Pulleys accept 3/8" (1 cm) to 1/2" (1.3 cm) static kernmantle ropes. Side plates are powder coated. Strength: 2" (5 cm) Double 8,100 lb (36 kN), 4" (10 cm) Double 11,200 lb (49 kN).

SuretyMan Mini Knot Passing Pulley

The SuretyMan Mini Knot Passing Pulley was designed for the professional rescue team concerned with size and weight. The SuretyMan Mini Knot Passing Pulley features:

- Ample room for the passing of knots
- Locking pin
- Size: 9-1/2" (24 cm) tall, 4" (10 cm) wide, 3" (7.6 cm) deep
- Weight: 1.9 lb (.89 kg)
- Aluminum sheave (will not score like some plastic sheaves)
- Half the size and weight of some of the larger, bulkier knot passing pulleys

SuretyMan Edge Roller

The best way to protect your rope from sharp edges and reduce rope friction. High quality construction. The 6" x 10" (15.3 cm x 24.4 cm) base is rubber covered to reduce slippage. The bottom and side plate feature attachment holes for ease of security in any situation. Added slots in the base plate accept tube webbing for security. Two edge rollers are required (sold separately). Two quick links are required (sold separately). Edge roller is 4" (10 cm) tall. Weight: 2.8 lb (1.3 kg).

FP Rescue Pulley & Edge Roller Ordering Information

Rescue Equipment: FP Rescue Pulleys & Components

SuretyMan Q-Eight
Part No. SRSFFE2120

Locking off the Q-Eight

SuretyMan Q-Eight

- Ears/cleat are positioned to make tie off very easy and safe
- Aluminum, anodized gold
- Ears/cleat still prevent larks footing (girth hitch)
- Strength 13,000 lbs (58 kN)
- Designed for 7/16" (11 mm) diameter rope
- Weight 8 oz (.24 kg)(will work with 1/2" (12 mm) diameter rope)

SuretyMan Rescue Eight, Steel
Part No. SRSF5045

Locking off the Rescue Eight

SuretyMan Rescue Eight

- Designed for rope diameters from 7/16" (11 mm) to 5/8" (16 mm)
- Available in aluminum or steel
- Strength 6,720 lb (30 kN)
- Weight 1.5 lb (675 g)
- Designed for the fire service, rescue, and police tactical operations

Stealth Rigging Plate Part
No. SRSR5990

Stretcher Rigging Plate Part
No. SRSR5980

SuretyMan Rigging Plates

Stealth Rigging Plate: Anchor on the point and the wings will rotate toward the load for a straighter line of pull. Material: aluminum. Weight: .46 lb (250g). Strength: 11,000 lb (48 kN). Color: Teal

Stretcher Rigging Plate: Designed to unclutter and organize litter rigging points, reducing the chance of error. Material: aluminum. Weight: .74 lb (330g). Strength: 12,200 lb (54 kN). Color: Teal

Carabiner
No. SRCC641

SuretyMan Carabiner

- Traditional large "D" design
- Carbon steel, zinc-plated
- Developed for fire and rescue communities
- Strength 12,364 lbs (55 kN)
- Manual locking
- Weight 11 oz (311g)
- Certified to meet NFPA 1993-1995, Class "G"
- Gate opening 1.2" (32mm)

Rescue Equipment: FP Rescue Ropes

tying a two-wrap prusik hitch

Superior flexibility provided by unique double-twist cable core construction gives MSA Rescue Ropes resistance four times greater than other static kernmantle ropes. Designed with load absorbing capabilities to provide additional margin of safety in the event a dynamic force is applied.

- Multiple rescue and rigging applications
- With rope identification tag, rope will meet NFPA requirements

Fall Protection

Rescue Equipment: FP Rescue Workwinch and Tripod

- Sure-Strong® Tripod: portable, collapsible and designed for use in confined space applications for anchorage above a manhole or other confined space entry
- Sure-Strong Tripod is compatible with the Lynx Rescuer, Dynevac II, and Lynx Boom Mount Hoist
- Sure-Strong Workwinch: used for work positioning, material handling, or as a means of retrieval in an emergency
- Sure-Strong Workwinch: used in conjunction with a fall protection system and a Sure-Strong Tripod

Sure-Strong Workwinch
Part No. SCE1074411200

Fall Protection Rescue Kit

The Fall Protection Rescue kit is designed to be an "out of the bag" rescue system. This kit combines a remote hook and extension pole with a rescue utility system. The remote hook and extension pole allows for remote attachment of a rescue line to a victim. The Rescue Utility System allows a rescuer to raise or lower the victim to safety. This kit should be used with a back-up system (not included).

Ordering Information

SURE-STRONG RESCUE EQUIPMENT	Part No.	Description
	SCE107007	Sure-Strong 7' (2m) tripod, aluminum, 10,000 lb (48 kN)
	SCE107010HD	Sure-Strong 10' (3m) tripod, aluminum, 10,000 lb (48 kN)
	SCE1074411200	Sure-Strong Workwinch, 200' (61m) galvanized wire rope, with bracket (compatible with Lynx Tripod and Sure-Strong Tripod)

FALL PROTECTION RECEUE KIT	10030025	Fall Protection Rescue Kit

SuretyMan Rescue Utility System

SuretyMan Rescue Utility System Applications

The SuretyMan Rescue Utility System can be used in conjunction with the Sure-Strong Tripod

The SuretyMan Rescue Utility System can be used in conjunction with the Sure-Strong Tripod and Sked Rescue system

The SuretyMan Rescue Utility System can be used for self-rescue and/or victim rescue applications

The SuretyMan Rescue Utility System can be used in conjunction with the Sked Rescue system

The SuretyMan Rescue Utility System is primarily used for raising and lowering people or equipment in rescue and industrial work access and confined space applications. Pulleys are equipped with a built-in anti-reversing lock. Offers rapid deployment, is virtually maintenance free, and is rated for two-person load.

- Compact and lightweight with a standard system weight of 17 pounds (7.7 kg)
- Rated capacity of 600 pounds (272 kg) for personnel and materials
- Offers a standard rope length of 200 feet (66m) with a maximum rope length of 800 feet (267m)

NOTE: Due to 4:1 mechanical advantage, user should order system with 4 times the rope necessary for the application. For example, a 50' application requires 200' of rope.

SuretyMan Rescue Utility System Ordering Information

Basic High Angle Rescue Kits

The Basic High Angle Rescue Kits were designed for the Fire Department planning to assemble a high angle rescue team. A complete high angle rescue system consists of two kits: a Belay System Kit, and a Raising/Lowering System Kit.

Basic High Angle Rescue Kit Ordering Information

BELAY SYSTEM KIT	10030023	Belay System Kit
	Belay System Kit includes:	
	SRCC641	3 large "D" shaped rescue carabiners, NFPA approved Class G
	SRP504860SL	200' (61m) 1/2" rope, orange and white, NFPA approved
	SRP500900	33' (10m) 9mm accessory cord for making load- release hitch
	SRP500860	65" (1.65m) 8mm accessory cord & 53" (1.35m) accessory cord, make up the tandem Prusiks
	SFP2267406	6' (1.8m) SuretyMan anchorage sling
	SRB430301	#3 rope bag, orange
RAISING/LOWERING SYSTEM KIT	10030024	Raising/Lowering System Kit
	Raising/Lowering System Kit includes:	
	SRCC641	3 large "D" shaped rescue carabiners, NFPA approved Class G
	SRP504860SL	200-ft (61m) 1/2" rope, orange and white, NFPA approved
	SRP500900	33-ft (10m) 9mm accessory cord for making load- release hitch
	SRP500860	65" (1.65m) 8mm accessory cord & 53" (1.35m) accessory cord, make up the tandem Prusiks
	SRP500860	53" (1.35m) 8mm accessory cord for creating the Prusik to connect the raising system
	SPPPU8710	2 Single Pulleys, 4" (100mm) Prusik minding pulleys
	SRS14001	Brake Bar Rack, lowering device is NFPA approved
	SFP2267406	6-ft (1.8m) SuretyMan anchorage sling
SRB430305	#3 rope bag, black	

Confined Space/Head First Extraction System

A specialized rescue product designed for extreme cases in which a rescuer needs to be lowered head-first into a confined space to perform a rescue. The Confined Space/Head First Extraction System (HFES) allows the rescuer to be lowered comfortably into a confined space head first, harness the victim, and raise both victim and rescuer out of a confined space. Consists of an adjustable lifting strap (A), an adjustable victim strap (B), one pair of ankle harnesses (C), two carabiners (D), and a storage bag. This small, compact system can be used with any confined space retrieval equipment such as tripods and davits.

- Leaves both hands free for the rescuer to assist in the retrieval of another person
- Small, compact system

Ordering Information

CONFINED SPACE/ HEAD FIRST EXTRACTION SYSTEM	SRS3100	Confined Space/ Head First Extraction System
ACCESSORIES	SRS3103	Rescue Anklets
	507002	Rescue Wristlets

Bucket Truck Evacuation Kit

The Bucket Truck Evacuation Kit was created to provide all necessary equipment to allow a worker to safely evacuate an aerial bucket that has become inoperative.

Ordering Information

BUCKET TRUCK EVACUATION KIT	SKITSMT001	Bucket Truck Evacuation Kit
	Bucket Truck Evacuation Kit includes:	
	SRB430205	#2 Rope Bag
	SCE405010	10-ft Synthetic Ladder with Swivel Snaphook
	SSB22040	Boom Anchor Strap
SDC726075	Anthon system, which includes anthon device, carabiners (2), 75' (22m) 7/16" rope	

Escape Kit

The Escape Kit was created as a tool for emergency egress when trapped in an upper floor of a building. This kit is lightweight and easy to use.

Ordering Information

ESCAPE KIT	10030026	Escape Kit
	Escape Kit includes:	
	SRCA853	Carabiners
	SRP500900	60' (18.3 m) 9mm rope
	—	Mini Q-Eight
—	Small stuff sack	

Rescue Pole/Remote Hook

The Rescue Pole/Remote Hook is designed as a rescue tool for the retrieval of a worker suspended in a fall arrest system or for remote rescue access. In most cases, the need for the rescuer to go to the fallen worker (victim) is limited. The Rescue Pole can be used in a wide variety of rescue applications and will serve as an excellent tool to help perform a safer, efficient rescue. The system consists of an adjustable fiberglass pole, pole adapter, and remote hook. A nylon storage bag is optional.

Ordering Information

RESCUE POLE/ REMOTE HOOK	SFP675009	Adjustable pole, fiberglass 6' (1.8m) to 12 ft (3.6m)
	SFP675012	Adjustable pole, fiberglass 8' (2.4m) to 24 ft (7.3m)
	SRCA401	Remote hook, aluminum, with web sling
	SCE109001	Pole adapter, aluminum/rubber
	SCE109003	Pole adapter, 6' (1.8m), aluminum/rubber
	SRB675009	Storage bag for SFP675009

SKED Basic Rescue System

Sked Basic Rescue System
Part No. SRSSK200

The best solution for confined space, high angle or technical rescue, and traditional land-based applications, the Sked stretcher is a revolutionary design which provides outstanding patient protection and security. The Sked stretcher comes equipped for horizontal hoisting by helicopter or vertical hoisting in caves or industrial confined spaces. When the patient is secured, the stretcher becomes rigid. The durable plastic provides protection for the patient while allowing extrication through the most demanding confined spaces. The stretcher is rolled for storage in a tough cordura backpack which is included in the system. The system ships at 19 lb (8.6 kg) and comes complete for most applications.

Each Sked Basic Rescue System comes complete with:

- Sked Stretcher
- Vertical lift sling
- Cordura backpack/towing harness
- Tow strap
- Horizontal lift slings
- Removable webbing handles

Rescue Equipment: Cradles, Ladder and Etrier

Rescue Cradles

The Rescue Cradle is available in two model types. The SRH30701 model is designed to allow easy placement on a person. Equipped with 4" (10 cm) polyester webbing and 4 - 3" (7.6 cm) D-rings. One size fits all.

The Rescue Cradle, model SRH30703, is designed to be very similar to the SRH30701 model, except it is constructed with 1 - 3/4" (4.4 cm) nylon webbing, 2" (5 cm) attachment ring, and an elastic shoulder strap.

Rescue Ladder

Our Rescue Ladder has synthetic rope with reinforced fiberglass rungs. Applications include: confined space access, theatrical stage rigging, mine access, and many others.

Rescue Etrier

Etrier is French for a set of ascending web stirrups sewn or tied together. The Etrier is useful for stretcher tendering and other vertical activities including getting over difficult edges. The six-foot loops are reinforced/ stiffened for easier foot placement and abrasion resistance.

Length: 7 ft (2.1 m). Weight: 9 oz (280 g).

Ordering Information

CRADLES	SRH30701	Rescue Cradle, 4 D-rings, 4" (10 cm) polyester webbing
	SRH30703	Rescue Cradle, 2" attachment ring, 1-3/4" (4.45 cm) nylon webbing
LADDER	SCE400020	Rescue Ladder, synthetic rope, 20 ft (6.1 m)
ETRIER	SRS3200	Rescue Etrier, 1" web, 7 ft (2.1 m)

General Accessories

Hands-off™ Chisel Grip

The Hands-Off Chisel Grip keeps hands away from the point of contact. The Hands-Off Chisel Grip is ergonomically designed to match the specific shape of the human hand for a comfortable and firm grip.

- Permits faster, safer, more accurate work
- Easy adjustment to hold a variety of chisels and stakes up to 1" in diameter
- Vibration-absorbing handle
- Eases awkward hand positioning
- Economical
- Spark resistant

Ergonomic Tool Holders

- Holds wrenches, chisels, etc.
- Vibration-absorbing design
- Attach to broom handles and mops for better grip
- Eases awkward hand positioning

MSA Safety-At-Heights Training

Authorized Person for Safety at Heights

- For At-Risk Workers, Supervisors, and Managers
- The chance to experience a controlled fall using an energy-absorbing lanyard
- Hands-on and application oriented exercises
- 1-1/2 day format

Key Topics Include:

- Dynamics of a fall
- Fall hazard recognition
- Procedures for continuous Safety at Heights
- Impact forces
- Selection, application, and use of fall protection systems

Competent Person for Equipment Inspection

- For At-Risk Workers, Supervisors, and Managers
- Physical inspection of fall protection equipment
- 1/2 day format
- Emphasis on the formal equipment inspection process

Key Topics Include:

- Formal inspection and documentation process
- Equipment cleaning, storage, and disposal
- Identification of hazards impacting equipment integrity
- OSHA and ANSI inspection requirements

Competent Person for Safety at Heights

- For Supervisors, Safety Professionals, and Managers
- 3 day format
- Comprised of the Authorized Person for Safety at Heights, Inspection, and Management & Rescue Planning courses
- Safety at Heights Management & Rescue Planning
- For Supervisors, Safety Professionals, and Managers
- Emphasis on assessment, implementation, and management of a fall hazard control program
- Perform rescue simulations from an elevated structure
- Emphasis on planning for rescue after a fall

Key Topics Include:

- Fall Hazard survey and profile
- At-Risk Worker selection and issues
- Rescue equipment, personnel, and training considerations
- Fall protection systems selection
- Regulatory and standards review (OSHA, ANSI)
- Round-table discussion of fall protection issues

Training Centers

- Butler, PA
- Houston, TX
- Denver, CO
- Chicago, IL
- Edmonton, AB, Canada
- Queretaro, Mexico

Or, Let Us Train You at YOUR Facility

Tower Climbing Safety

- For At-Risk Workers, Supervisors, and Safety Professionals
- Experience a controlled fall using an energy absorbing lanyard
- 1 day format
- Hands-on exercises utilizing various tower climbing systems

Key Topics Include:

- Selection, application, and use of fall protection systems
- Dynamics of a fall
- Regulatory and standards (OSHA) review including the Telecommunications standard

MSA Custom Training Courses

- Focus on safety issues unique to your company
- Compliment your existing safety program
- Hands-on training in your daily work environment
- Custom training structures at your facility

REGISTRATION INFORMATION

We invite you to attend our next training session, which will prove to be a comprehensive and valuable experience.

Register by phone or fax:

Phone: 1-866-347-6093 • Fax: 724-776-4520.

Visit www.MSAafety.com for the current training schedule.

Course	Length	Course #
AUTHORIZED PERSON FOR SAFETY AT HEIGHTS	1-1/2 days	ZT-APHEIGHTS
COMPETENT PERSON FOR EQUIPMENT INSPECTION	1/2 day	ZT-CPINSPECT
SAFETY AT HEIGHTS MANAGEMENT AND RESCUE PLANNING	1 day	ZT-MGRESCUE
COMPETENT PERSON FOR SAFETY AT HEIGHTS	3 days	ZT-CPHEIGHTS
TOWER CLIMBING SAFETY	1 day	ZT-TOWER
MSA CUSTOM TRAINING COURSES	Course length, cost, and schedule will be determined upon request.	

Calculating Total Fall Distance

Knowing how to calculate Total Fall Distance is just as important as selecting the proper harness, lanyard, anchorage connector, and anchorage point for the specific task to be performed. Total Fall Distance (TFD) is defined as the sum of Freefall Distance (FFD), Deceleration Distance (DD), Harness Effects (HEFF), and Vertical Elongation (VEL). It is also wise to include a Safety Factor (SF) of at least one foot in the formula. Total Fall Distance can be calculated using the following formula:

$$\text{TFD} = \text{FFD} + \text{DD} + \text{HEFF} + \text{VEL} + \text{SF}$$

Before we can begin to calculate Total Fall Distance, we first need to define the variables in the formula above.

Freefall Distance (FFD): The vertical distance a worker travels between the onset of a fall until just prior to the point where the Fall Arrest System begins to arrest the fall. Federal OSHA limits this distance to 6' or less. To keep FFD to a minimum, always try to keep your anchor point as far above the back D-ring of the harness as possible.

Deceleration Distance (DD): The vertical distance a worker travels between the activation of the Fall Arrest System and final fall arrest. Federal OSHA limits this distance to 3.5' or less. The DD that each energy-absorbing fall arrest device will permit is typically stated on the product label.

Harness Effects (HEFF): The stretch of a harness during fall arrest. This is typically one foot or less for a properly-fitted harness. However, some harnesses use elastic-type webbing that can increase the harness effects to two feet or more.

Vertical Elongation (VEL): The stretch in the lifeline of the Personal Fall Arrest System. Vertical Elongation is measured on the part of the lifeline that is under tension during deceleration and final fall arrest. This variable will change drastically depending upon the type of Fall Arrest System you are using. For example, most energy-absorbing lanyards are designed to have a maximum deceleration distance of 3.5' which includes the vertical elongation of the lanyard. However, if you are using a rope grab system or a horizontal lifeline, vertical elongation must be calculated based on the stretch of the vertical or horizontal lifelines in those systems. You will need to check the specific manufacturers' product for exact stretch percentages.

Safety Factor (SF): An additional factor of safety to ensure that you have the required clearance below your working surface. This variable should be at least one foot, but can reflect any number with which you feel comfortable.

For illustration purposes, we will use the following equipment:

- Full Body Harness (non-elastic)
- 6' Energy-Absorbing Lanyard
- Fixed, Rigid Anchorage Connector (such as a D-Plate bolted to a structural I-beam)

Figure 1

In *Figure 1*, we see a worker with a 6' Energy-Absorbing Lanyard on an elevated platform. In this example, let's assume that his attachment point is 2' above the back D-ring of the harness. For every 1' the lanyard attachment point is above the harness back D-ring, 1' is deducted from the Freefall Distance. For every 1' that the lanyard attachment point is below the harness back D-ring, 1' is added to the Freefall Distance (see *Table 1*). In this scenario, if the worker falls, the Freefall Distance (FFD) will equal 4' since the lanyard attachment point is 2' above the back D-ring of the harness.

So, our formula so far looks like this: $\text{TFD} = 4' + \text{DD} + \text{HEFF} + \text{VEL} + \text{SF}$

The next variable to consider is Deceleration Distance (DD). Federal OSHA requires that this distance not exceed 3.5'. Since all manufacturers' product is slightly different, you should read the label on the product you intend to use to determine the maximum deceleration distance of that product. When calculating Total Fall Distance, the maximum deceleration distance that a product will permit should always be used. In our example, the maximum deceleration distance would be 3.5'.

$$\text{TFD} = 4' + 3.5' + \text{HEFF} + \text{VEL} + \text{SF}$$

The Harness Effects variable is relatively constant at less than one foot. This will vary slightly due to the adjustment of the harness, so we generally use one foot to account for these slight differences. However, elastic-type harnesses can have more than one foot of stretch, possibly two feet or more, and that additional distance must be accounted for in your calculation. In our example, we are using a non-elastic harness to keep our Total Fall Distance to a minimum.

$$\text{TFD} = 4' + 3.5' + 1' + \text{VEL} + \text{SF}$$

Calculating Total Fall Distance

FreeFall Distance for various Energy-Absorbing Lanyard Lengths and Elevations of Anchorage Connection Point.	Length of Energy-Absorbing Lanyard			
	6'	5'	4'	3'
Distance of Anchorage Connection Point Above (+) or Below (-) Harness Fall Arrest D-Ring				
+3	3	2	1	0
+2	4	3	2	1
+1	5	4	3	2
0	6	5	4	3
-1	7	6	5	4
-2	8	7	6	5
-3	9	8	7	6
-4	10	9	8	
-5	11	10		
-6	12			
	FreeFall Distance			

Table 1

Most manufacturers design their Energy-Absorbing Lanyards so that the vertical elongation of the lanyard is included in the OSHA mandated 3.5' maximum deceleration distance. However, if we were using a rope grab or horizontal lifeline, or if you were attaching to a non-rigid anchorage connector, VEL would need to be calculated based on the specifications of those components in your Fall Arrest System. Since we are using a 6' Energy-Absorbing Lanyard in our example and the VEL is already considered in the lanyard design, we will enter a "0" for the VEL variable.

$$TFD = 4' + 3.5' + 1' + 0' + SF$$

The final variable of the formula is the Safety Factor. It is always a good idea to include at least a 1' safety factor; however, the safety factor could reflect any number that makes you comfortable with your calculation.

Now we can solve our Total Fall Distance Formula:

$$TFD = 4' + 3.5' + 1' + 0' + 1'$$

$$TFD = 9.5'$$

Now we know that if the worker in *Figure 1* would happen to fall, his Total Fall Distance will be 9.5'.

But what does this number really mean?

It means that the clearance between the working surface and the next closest object in the fall path must be at least 9.5'. It is important to remember that Total Fall Distance is not always measured from the working surface to the ground, because sometimes the ground is not the closest object beneath the working platform. If there is any type of obstruction in the fall path of the worker (see *Figure 2*), your available clearance is measured from the working platform to the top of that obstruction. Sometimes these distances can be very short, and a fall protection means other than a 6' energy-absorbing lanyard is necessary. Total Fall Distance calculations can become more complex than those demonstrated here. The numbers and variables will change depending upon the type of Personal Fall Arrest System used. For example, when calculating Total Fall Distances for Horizontal Lifeline Systems you have additional variables to consider, such as cable deflection and the number of people on the system. The important thing to remember is that calculating Total Fall Distance is just as important as selecting the right product for the job. Forgetting to calculate Total Fall Distance is just as dangerous as forgetting to put on your harness before you begin to perform any work at heights.

W65 Self-Rescuer Respirator

Housed in a rugged stainless steel case and weighing only 2.2 pounds, the durable W65 Self-Rescuer provides emergency protection against carbon monoxide gas resulting from underground fires or explosions. The one-time-use device is for escape purposes only. The unit should not be used in atmospheres containing less than 19.5 percent oxygen or in atmospheres containing other toxic gases and vapors.

- Convenient, portable self-rescuer provides emergency protection against CO
- Lightweight unit weighing only 2.2 pounds

Miner's Support System and Multipurpose Pouch

The Miner's Support System from MSA is a lightweight but sturdy miner's belt that offers comfort, lumbar support, versatility and durability. It enables the miner to carry the cap lamp battery pack, filter self-rescuer, SCSR, tools, etc., on the job. A one-inch reflective strip sewn over a two-inch nylon strap makes the support system highly visible. For more complete information, see Bulletin 0115-03.

ALTAIR 4X MSHA Multigas Detector

Optimized for Miners

Building on years of design experience, MSA revolutionizes sensor technology with breakthroughs that improve mining application performance:

- Methane-optimized catalytic bead sensor provides increased stability over time
- Sensor response and clear times in less than 15 seconds
 - Reduces gas usage for bump testing and calibration
- Greater accuracy and repeatability within changing environmental conditions
 - Temperature, humidity and pressure
- Digital sensors offer increased RF (radio frequency) immunity
 - Eliminate false alarms from radios
- Accurate CO readings from 0-2000 ppm
- Industry-first CO/NO₂ combination sensor with wide range and fast response times
- Increased methane sensor poison resistance decreases down time and frequency of sensor replacements
- End-of-sensor life warning gives advanced notice of failing sensors
- Sensor life that greatly exceeds industry average

Video Programs

Order programs below online at www.goavmod.com/MSA. Available on DVD or as a download.

	Title and Comments	Running Time	Year Released
AIR-PURIFYING RESPIRATORS	Proper Donning & Use of the Advantage 420 Respirator	10 min.	2009
	Proper Care & Use of the Advantage 4000 Full-Face Respirator – <i>available in French, English and Spanish</i>	15 min.	2010
	Care and Use of the A-1000 and Millennium Gas Mask For use by First Responders and Law Enforcement personnel. This program uses and shows cartridges and canisters approved for use prior to 2004, DOES NOT cover specific CBRN canisters.	24 min.	2003
	Proper Care & Use of the Advantage 1000 Full-Face Respirator	15 min.	1994
	Proper Care & Use of the Comfo Classic Respirator – UPDATED	20 min.	2012
	Use & Maintenance of the Ultra-Twin Respirator	22 min.	1995
	Proper Care & Use of the OptimAir MM PAPR for the Abatement Industries – UPDATED to include the OptimAir MM2K	20 min.	2012
	Overview of OptimAir TL PAPR – UPDATED	15 min.	2013
	Proper Care & Use of the Responder Powered Air-Purifying Respirator	25 min.	2009
	Fit Testing MSA Respirators with the Qualitative Fit Test Kit	10 min.	2010
SUPPLIED-AIR RESPIRATORS	Proper Care & Use of the PremAire Supplied-Air Respirator System	43 min.	1994
	Proper Care & Use of the PremAire Cadet System	32 min.	1993
	Donning & Using the PremAire Cadet Escape Respirator	20 min.	2008
	Proper Care & Use of the Hip-Air Apparatus	28 min.	1992
	Proper Care & Use of the Pressure-Demand Air-Line Respirator	44 min.	1986
	Proper Care & Use of Constant-Flow Air-Line Respirators	27 min.	1992
	How to Use & Maintain the Custom Air V Escape Respirator	18 min.	1988
	Proper Care & Use of Your Response Escape Hood from MSA	11:15 min.	2002
	Proper Care and Use of the Xtreme Air Mask with HUD/RIC	40 min.	2003
	Proper Care and Use of the M7 Air Mask and Rescue Belt II – UPDATED	35 min.	2008
	Proper Care and Use of the M7 Responder Air Mask—Covers SCBA (35 min.), PAPR (25 min.), and APR (20 min.) options	80 min.	2008
	FireHawk Disassembly & Reassembly Instructional Program	11:46 min.	2002
	Proper Care and Use of the AirHawk II SCBA	25 min.	2009
	Proper Care and Use of the Quick-Fill System	min.	1992
TICS	Proper Care & Use of the Evolution 5000 Family of TICS—Covers 5200, 5600, and 5800, each in own 15 min. program.	45 min.	2008
PORTABLE INSTRUMENTS	Proper Use of the Altair 5 Multigas Detector	20 min.	2009
	Proper Use of the Altair 5X Multigas Detector – NEW	20 min.	2011
	Proper Use of the Altair 4X Multigas Detector	20 min.	2010
	Proper Use of the Altair 4 Multigas Detector	20 min.	2008
	Proper Use of the Altair 4 QuickCheck System	10 min.	2009
	Proper Care & Use of the Orion Multigas Monitor	29 min.	2001
	Orion G Multigas and Leak Detector Goose Neck and Coiled Hose Version, Rev.01	15 min.	2003
	Proper Care & Use of the Explosimeter Indicator, Model 2A	24 min.	1982
	Proper Care and Use of the Pulsar Single-Gas Detector	8 min.	2001
	Overview of the Galaxy Gas Tester	10 min.	2004
Overview of Galaxy GX2 Gas Tester – NEW	10 min.	2012	
FALL PROTECTION	Proper Care & Use of the EVOTECH Harness	10 min.	2010
	Harnesses—Donning and Doffing Instructions for the Pullover, Vestype, FP Pro and Tradesman Harnesses	—	—
	Using the RCD (Remote Connect/Disconnect) System	6:30 min.	1998
	Assembly and Use of the Horizon Rebar Anchorage System	10:22 min.	2000
	Davit Systems	9:59 min.	1999
	Assembling the Fall-Rescue Work System	9:07 min.	1999
	Dyna-Line Horizontal Lifelines	—	—
	Elements of Fall Protection	—	—
	Gravity Harnesses—Donning and Doffing Instructions	—	—
	Facing the Real Dangers of Confined Spaces	28 min.	1993
Workman Tripod Assembly	—	2010	
Use of the Suspension Trauma Safety Step	15 min.	2008	
HEAD PROTECTION	Proper Care & Use of MSA Head Protection – UPDATED	20 min.	2011

MSA—The Safety Company

Our business is safety. We've been the world's leading manufacturer of high-quality safety products since 1914. MSA products may be simple to use and maintain, but they're also highly-sophisticated devices and protective gear — the result of countless R&D hours, relentless testing, and an unwavering commitment to quality that saves lives and protects thousands of men and women each and every day. Many of our most popular products integrate multiple combinations of electronics, mechanical systems, and advanced materials to ensure that users around the world remain protected in even the most hazardous of situations.

Our dedication to safety has been the key to our impressive year-over-year growth. In 8 of the past 10 years we've achieved record growth numbers, with annual revenues of more than \$1 billion.

Our Mission

MSA's mission is to see to it that men and women may work in safety and that they, their families, and their communities may live in health throughout the world.

MSA: Because every life has a purpose.

Note: This Bulletin contains only a general description of the products shown. While uses and performance capabilities are described, under no circumstances shall the products be used by untrained or unqualified individuals and not until the product instructions including any warnings or cautions provided have been thoroughly read and understood. Only they contain the complete and detailed information concerning proper use and care of these products.
