Quartz®

Explosionproof valve monitoring

The Quartz is available in explosionproof (QX), nonincendive, intrinsically safe (QN), and general purpose (QG) versions. The robust epoxy-coated anodized aluminum construction, and optional stainless steel version, makes this platform extremely durable and well-suited for use in corrosive, heavy washdown environments.

Options may be selected to accommodate most applications.

The Quartz series

The StoneL Quartz series is durable, corrosion-resistant, and versatile, making it ideal for most of your process valve monitoring requirements.

Enclosures optimized for environment

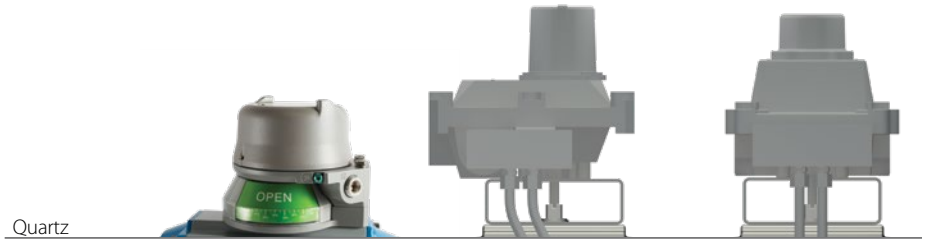
QX: Explosionproof, water tight and corrosion-resistant enclosure is approved for use in Div. 1/Zone 1 hazardous areas. Available options include stainless steel and epoxy-coated anodized aluminum.

QN: Nonincendive is approved for Div. 2/Zone 2 hazardous environments with proximity sensors using a clear cover. Intrinsically safe NAMUR sensors or passive switches are available for Div. 1/Zone 0 applications.

QG: General purpose features a clear Lexan® cover with mechanical switches. All enclosures are Type 4, 4x, and 6.

Save space with low profile design

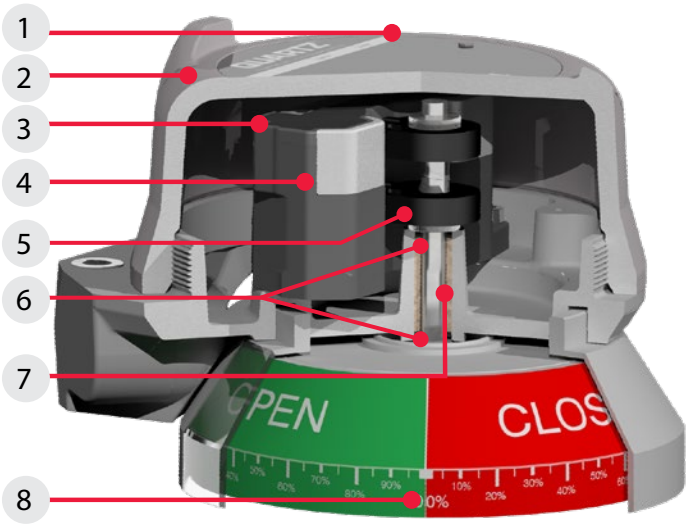
Clearance above the actuator is critical in complex piping systems. Quartz boldly displays valve position and encloses all electrical components in an explosionproof compartment with less than 5" clearance requirement.



Quartz

Features

1. **Enclosures optimized for environment**
   Available in three enclosure styles suitable for use in various process environment areas.
2. **Rapid enclosure access**
   Screw-on cover allows quick enclosure access, saving you valuable maintenance and set-up time. The cover provides a vaportight seal and allows entry to internal components in less than five seconds.
3. **Faster wiring**
   Pre-wired and labeled terminal strip enables quick, convenient attachment of field wires.
4. **Wide variety of switching & communication**
   Switching options include dual module sensors and communication, Maxx-Guard proximity switches, and mechanical switches. Continuous signal output is available in a 4-20 mA position transmitter.
5. **Quick set cams are easy to adjust**
   Touch and tune switch settings allow you to make adjustments in seconds without the use of tools.
6. **Dual shaft o-ring seals eliminate corrosion**
   Top inner and bottom outer shaft o-rings seal the drive bushing from both external corrosives and internal contaminants that enter the enclosure.



7. **Special drive bushing assures long cycle life**
   The oil impregnated bronze bushing maintains smooth operation and eliminates the potential for shaft seizure due to actuator shaft eccentricity.
8. **Bold space saving visual indication**
   Visual indicator offers excellent viewability without sacrificing accessibility or adding to space requirements. Indicators are also available with continuous percentage or three-way indication. (See page 51)

Wide variety of switch/sensor functions

A wide variety of switch/sensor communications and position transmitters may be selected for the Quartz series. Options include 2, 4 or 6 mechanical or proximity switches, position transmitters with or without switches, and the StoneL dual module with two SST or two NAMUR sensors or AS-Interface, DeviceNet™ or Foundation Fieldbus communication capabilities.

Proximity switches

Mechanical switches

Speed installation with LED indication

StoneL's coordinated visual indicator and LEDs give you an extra measure of safety and increased convenience during plant start-up and operation. Green visual indication and green LED means the valve is open and the computer circuit is properly operating. Red visual indication and red LED means the valve is closed and the computer is properly matched. All systems are functioning properly.

Eliminate seal fittings in Division 1 and 2 areas

FMus ratings certify the Quartz QX series with proximity switches for use without seal fittings in all hazardous areas. By passing special pressure piling tests, the all aluminum enclosure was certified for this elite distinction. Now, a time-consuming procedure can be safely eliminated in Division 1 and Division 2 areas.

Consolidate your components and minimize costs

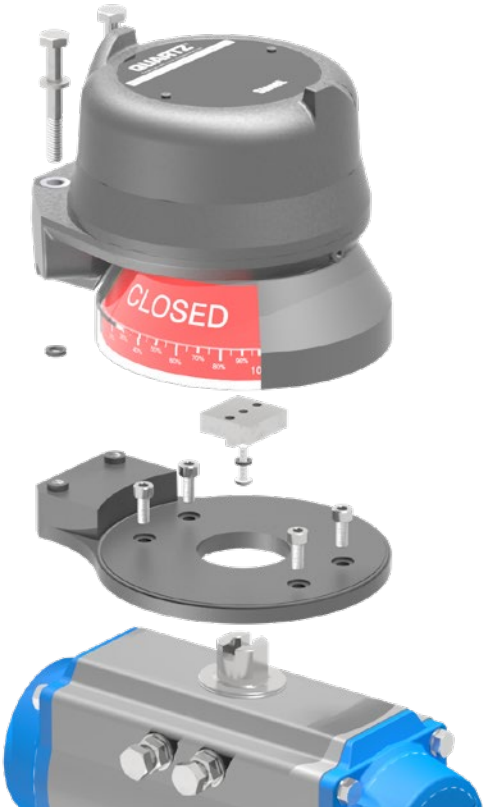
The Quartz design offers up to three conduit entries with extra wire terminations. By terminating solenoid valves in the switch enclosure, significant savings are realized by eliminating a junction box, wiring, conduit materials, and labor.

Mounting kits

Kits may be ordered in 316 stainless steel. Consult StoneL factory for details.

Sealed mounting kit

Mounting to standard actuators is achieved with a bold visual indicator and sealed mounting system. Sealed mounting is exclusive with extended visual indicator option N. Adaptor plate is epoxy-coated anodized aluminum. All fasterners and couplings are stainless steel.



- Direct mount to actuators with VDI/VDE 3845 interface.
- Tolerant to vibration and mechanical stress.
- Prevents contamination and icing in coupling area.
- Available for all VDI/VDE 3845 (NAMUR) mounting configurations and most quarter-turn actuators.

Quarter-turn actuators

Low profile convenient mounting systems are readily available in stainless steel for most standard actuators.

Manual valves

Proper fit and operation is assured with StoneL's custom designs for each manual valve. Hundreds of unique mounting systems have been designed and fabricated for manually operated valves.

Positioners

Quartz position transmitter and switches may be retrofitted directly to most positioners. 4-20 feedback may be provided on simple pneumatic positioners.

Linear operators

Precision ball joint connections attach the Quartz to valve travel stems. Stroke lengths ranging from 20 mm to 150 mm (¾" to 6") may be easily accommodated.

Quartz stainless steel option

For the most challenging environments

The explosionproof Quartz for process valve monitoring is available with a 316 stainless steel enclosure that is extremely durable and well-suited for use in corrosive, heavy washdown and high seas environments. A broad range of switching, position transmitters and communication options may be selected to accommodate most applications. You can attach the Quartz to quarter-turn actuators, manual operators, linear operators, and positioners using readily available stainless steel mounting systems.

Position transmitter

4-20 mA position transmitter

Position transmitters provide a precise 4-20 mA signal on a two-wire DC loop. Control valves and dampers are accurately monitored through their range of travel offering assurance of exact valve position at all times. Several function options are available making it easy to find the correct product that fits your desired application. Choose a position transmitter with a standard potentiometer (5_), a vibration proof, high-performance potentiometer (7_), or the innovative non-contact magnetic resistive (mag res) digital transmitter (T_).

Digital transmitter

The digital transmitter utilizes an innovative non-contact magnetic sensor. The module features easy push button calibration to reduce set-up and commissioning time. With the bold red/green LED indication, the unit is visible from a distance and the calibration diagnostic LED indications confirm set up is valid. The position transmitter module housed with the Quartz platform is fully sealed and potted, providing reliable operation and outstanding vibration tolerance in tough applications.

Position transmitter

Digital transmitter

Position transmitter specifications

	Standard transmitter (5_)	High performance transmitter (7_)	Digital transmitter (T_)
Output	2-wire 4-20 mA	2-wire 4-20 mA	2-wire 4-20 mA

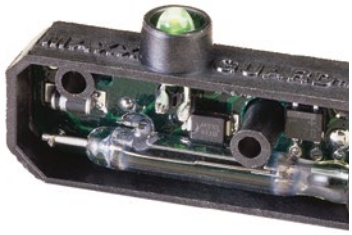
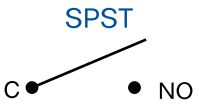
Sensors and switches

Maxx-Guard proximity switch

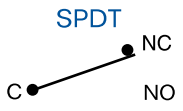
Maxx-Guard hermetically-sealed switches are suitable for computer input circuits and general purpose applications. SPDT tungsten contacts are designed for 125 VAC computer inputs and 240 VAC moderate power applications. SPDT rhodium contacts are suitable for both 24 VDC and 120 VAC computer inputs. SPST ruthenium contacts are ideal for either 24 VDC or 125 VAC low power computer inputs.



Maxx-Guard proximity switch Single-Pole Single-Throw (SPST)	
J switch	
Configuration	SPST NO; passive (intrinsically safe)
Electrical ratings	0.10 amp @ 10 - 30 VDC
Maximum voltage drop	0.1 volts @ 10 mA 0.5 volts @ 100 mA
Contact composition	Ruthenium
P switch	
Configuration	SPST NO
Electrical ratings	0.15 amp @ 125 VAC/30 VDC
Maximum voltage drop	0.1 volts @ 10 mA 0.5 volts @ 100 mA
Contact composition	Ruthenium



Maxx-Guard proximity switch Single-Pole Double-Throw (SPDT)	
G switch	
Configuration	SPDT
Electrical ratings	0.2 amp @ 120 VAC 0.30 amp @ 24 VDC
Maximum voltage drop	0.1 volts @ 10 mA 0.5 volts @ 100 mA
Contact composition	Rhodium
H switch	
Configuration	SPDT
Electrical ratings	240 volts max; 3 amps max 100 watts max; 2.0 watts min
Maximum voltage drop	0.1 volts @ 10 mA 0.5 volts @ 100 mA
Contact composition	Tungsten
M switch	
Configuration	SPDT; passive (intrinsically safe)
Electrical ratings	0.10 amp @ 10 - 30 VDC
Maximum voltage drop	0.1 volts @ 10 mA 0.5 volts @ 100 mA
Contact composition	Rhodium
S switch	
Configuration	SPDT (LED)
Electrical ratings	0.1 amp @ 120 VAC 0.1 amp @ 24 VDC
Maximum voltage drop	3.5 volts @ 10 mA 6.5 volts @ 100 mA
Contact composition	Rhodium



Specifications	
Temperature range	-40° C to 80° C (-40° F to 176° F)
Seal	Hermetically-sealed
Operating life	5 million cycles
Warranty	Two years

Sensors and switches

Mechanical switch (SPDT)

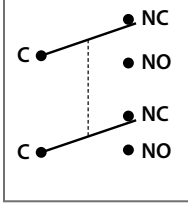
Low cost single-pole double-throw mechanical switches with silver contacts are recommended for high power 125 VAC applications. Gold contacts may be used in 24 VDC computer input applications when cycle life does not exceed 100,000 operations.

Mechanical switch (SPDT)	
Silver contacts (_V switch)	
Electrical ratings	10 amp @ 125⁄250 VAC 0.5 amp @ 125 VDC
Operating life	400,000 cycles
Not recommended for electrical circuits operating at less than 20 mA @ 24 VDC.	
Gold contacts (_W switch)	
Electrical ratings	1 amp @ 125 VAC 0.5 amp @ 30 VDC
Operating life	100,000 cycles

Mechanical switch (DPDT)

Double-pole double-throw mechanical switches enable two electrical circuits to be activated simultaneously. Each switch circuit is electrically isolated from the other. As with standard silver contacts, DPDT switches are designed to operate in high-power applications.

Mechanical switch (DPDT)	
14 switch	
Electrical ratings	4.5 amp @ 125⁄250 VAC, 24 - 125 VDC
Operating life	250,000 (VAC), 100,000 (VDC) cycles
Not recommended for electrical circuits operating at less than 20 mA @ 24 VDC.	



SST switching sensor

Solid state SST proximity sensors are ideal for use in AC and DC computer input circuits.

SST switching sensors	
_X switch	
Operation	NO/NC (cam selectable)
Maximum inrush current	1.0 amps @ 125 VAC/VDC
Maximum continuous current	0.1 amps @ 125 VAC/VDC
Minimum on current	2.0 mA
Leakage current	Less than 0.50 mA
Voltage range	24 - 125 VAC 8 - 125 VDC
Maximum voltage drop	6.5 volts @ 10 mA 7.5 volts @ 100 mA
Operating life	Unlimited
Warranty	Five years
