The First Self-Centering Punch & Die

- PRECISION BRAND TruPunch® sets make perfect, custom washers, shims and gaskets in seconds
- Eliminates time and material wasted with conventional punch & dies
- No guess work needed to center the I.D.
- No need to scribe center lines
- Exclusive, patented punch, pilot and pin system
- Packaged in a durable plastic case

How to use the PRECISION BRAND TruPunch® sets:

1. Punch the I.D. hole first
2. Attach the appropriate I.D. pilot to the O.D. punch
3. Place the material between the top and base plates so the I.D. hole is beneath the O.D. guide hole
4. Insert the O.D. punch so that the I.D. pilot moves into the I.D. hole which will automatically center the material. Make sure the O.D. punch has been pushed completely through the top plate and is touching the material
5. Strike the punch squarely with enough force to penetrate the material with one blow

- **TruPunch®** by PRECISION BRAND can accommodate O.D. sizes up to 3/4"
- Nine punch sizes: 1/8", 3/16", 1/4", 5/16", 3/8", 7/16", 1/2", 5/8" and 3/4"
- Eight I.D. pilot sizes: 1/8", 3/16", 1/4", 5/16", 3/8", 7/16", 1/2" and 5/8"
- Cut steel, brass, copper, aluminum, rubber and plastic effortlessly up to .025" thick
- Cut stainless and blue tempered shim up to .010" thick

Punch & Die Stand

(Die sold separately)

- PRECISION BRAND Punch & Die Stand provides solid support for consistent shim and washer fabricating
- Custom fit, sturdy steel die stand holds dies from any of the Precision Brand sets: 40105, 40110, 40200 and 40300
- Stand allows for easy access to cut shims and washers
- Elevated die allows punches to fall clean, reduces shim burrs and decreases possible damage to punches
- The last hammer hit to push the punch completely through the die is eliminated, thus reducing risk of injury to the hand holding the die during this process

Sof' Shoe® Shim

Scan this QR Code with your Smartphone and watch our Sof' Shoe® product demo directly from your phone!

- PRECISION BRAND Sof' Shoe® shim solves angular soft foot alignment problems on motors, pumps, generators, turbines and other plant machinery in minutes
- Sof' Shoe® shim cures angular soft foot and extends bearing and motor life
- Sof' Shoe® shim is made of a proprietary elastomer which has unique flow and set characteristics to fill irregular gaps
- Sof' Shoe® shim is an inexpensive alternative when compared to more time consuming and expensive options such as milling the base or foot, hand cutting graduated shims, replacing base or rebuilding base with poured epoxy
- Each Sof' Shoe® shim thickness has a 12 percent flat compression under standard bolt torque, yet will absorb the angularity of nearly half its thickness
- Sof' Shoe® shim is stable to 225°F
- Flat sheets are also available on special order
- For more technical information on PRECISION BRAND Sof' Shoe® shim and angular soft foot contact the PRECISION BRAND factory
- Also available in bulk in approximately 39" nominal widths

Standard Series Hose Clamps

100% INTERLOCK CONSTRUCTION FEATURES:
One piece housing which directly locks into the band. Spot weld free design.

Engineered for Tough Installation

- Rounded edges to protect the hose
- Efficient three-piece construction
- No spot welds to corrode
- Easily installed with screwdriver, nut driver or socket wrench
- Screws feature deep slots for quick installation
- Meets or exceeds SAE torque specifications
- Sold in box quantities of 10
- Bulk quantities also available

B-H Series Partial Stainless

This clamp has a 1/2" stainless steel band with plated 5/16" slotted hex-head screw and housing. It is recommended for most applications.

B-HS Series All Stainless

The 1/2" band and housing components are all stainless steel. The slotted 5/16" hex-head screw is made from 400 series stainless steel. It is recommended for good corrosion resistance and extra strength.

B-HSP Series All 300 Series Stainless Steel

This high quality 300 series 1/2" band and housing is matched with a 300 series 5/16" slotted hex-head screw. This clamp is highly corrosion resistant, well suited for marine applications and is low in magnetic permeability.

Critical Connection Hose Clamps (Metric Smooth Band)

- Short housing saddle is weld free and keyed into the band
- The smooth form evens the pressure around the hose
- Pressed tooth form and rounded, raised band edges prevent damage to the hose
- More efficient sealing at lower torque
- Sold in box quantities of 10

Standard Series

- 9mm band and housing are 400 series stainless steel
- 6mm screw is zinc plated carbon

Miniature Series

- Band and housing are stainless steel
- 5mm slotted hex-head screw is zinc plated carbon

WaveSeal 360™ Hose Clamps

WaveSeal 360™ is a registered trademark of Ideal Clamp Products, Inc.

- Unique expansion and contraction creates a steady 360° seal in response to changing temperatures and works well with non-uniform hoses

- The two inward pointed ridges form points of high pressure, and between them a low pressure center that creates an o-ring effect

- 9/16" band width (14.29 mm)
- Recent leak pressure tests show that the WaveSeal 360™ clamp performed better in thermal cycling than typical constant tension clamps, Belleville spring or spring-loaded T-bolt styles
- Further testing revealed WaveSeal 360™ performs even better over time when compared to other leading brands in the same category

Common Uses

- Hydraulic systems – construction, agricultural, and telecommunications equipment
- Cooling systems – heater hose, radiator hose and heat exchanger
- Charged Air systems – cold and hot side diesel turbo charger, and air intake

Drill Rod

- PRECISION BRAND Drill Rod rounds are made of annealed, ground and polished, general purpose tool steel
- Used for punches, tools and dies, drills, taps, arbors, roller bearings, dowel pins and a variety of machine parts where high strength and long life are required
- Excellent finish, strength and machinability makes drill rod ideally suited for power drive shafts and applications where accuracy and straightness are required
- Stocked in 3 feet lengths
- Available in Water Hardening (W-1) and Oil Hardening (O-1) grades
- Other grades and sizes, including metric are available on special order

Water Hardening/W-1

Color Coded with red ends

- Made from a 1095 steel
- Most popular type
- Most versatile and least expensive
- Tough hardening quality affords optimum response to heat treatment and provides toughness and maximum wear resistance in service
- High carbon content allows it to be used without heat treatment for many maintenance applications
- Fine-grained, electric furnace melt, commercial grade tool steel

Oil Hardening/O-1

Color Coded with yellow ends

- Made from a 1085 steel
- Electric furnace melt tool steel
- Non-shrinking, general-purpose tool steel
- Excellent toughness and machinability characteristics
