» On January 12, 2018 the Window Covering Manufacturers Association announced the approval of a New Window Covering Safety Standard. The new standard ANSI/WCMA A100.1-2018 will require that ready-made window coverings manufactured after Dec 15, 2018 be cordless.

» Compliance with this standard is required and may be enforced by the US Consumer Product Safety Commission.

» The Consumer Product Safety Commission (CPSC) is urging the education of housing managers on the importance of installing only the window covering products that meet the new standards for stock products. Occupants of these housing units are unknown and can often include children and infants.

» Lotus & Windoware, Inc has the largest selection of stock, cordless blinds Available Now, putting you in the perfect position to lead your industry in all things safety!

Inquire for more information on specs sizes and how to use this exciting new product.

Lotus & Windowware products are compliant with consumer product safety standards. Please contact your customer service representative or visit the websites of the US Consumer Product Safety Commission and the Window Coverings Safety Council for more information.

www.cpsc.gov
www.windowcoverings.org

All Lotus & Windowware products have been tested and meet the United States CPSC total lead content for mini blinds and have passed the NFPA 701 Flame Test. Please feel free to contact your Lotus & Windowware representative to obtain a copy of these test results or download them from our website at www.lotusblind.com.

All Lotus & Windowware products are manufactured in an ISO 9000 certified factory.

FREQUENTLY ASKED QUESTIONS

ON THE NEW WINDOW COVERING SAFETY STANDARD

What does the new standard do?

The new safety standard, ANSI/WCMA A100.1-2018, will ensure that a vast majority of window covering products sold in the United States and Canada will be cordless or have inaccessible or short cords by requiring that all stock products sold in stores and online—which account for more than 80 percent of all window covering products sold in the U.S. and Canada—to be cordless or have inaccessible cords. This approach is supported by a review of the hazard data that shows that a vast majority of incidents related to corded window coverings identified by the U.S. Consumer Product Safety Commission (CPSC) take place on stock products.

What is a stock product?

Most window covering products sold to consumers in retail stores or online are “stock” products, meaning that the products are completely or substantially fabricated in advance of being distributed in commerce. The SKU can either be sold “as is” or modified or adjusted by the seller, manufacturer, or distributor prior to being distributed in commerce in the U.S. and it would still be considered a stock blind, shade or shading product.

Why aren't custom products required to be cordless?

At this time, cordless products do not meet all the needs and desires of all consumers, including the elderly and users with disabilities. As a result, manufacturers need to be able to sell corded products to satisfy the needs of these customers and to certain applications. When purchasing custom products, a consumer is required to interact with a salesperson, installation specialist or online information and warnings, which provides window covering safety information, specifically regarding the fact that consumers should not use corded products in homes with young children. It should also be noted that many cordless options already exist for custom products.

What are the other updates from the last version of the safety standard?

The revised standard imposes new restrictions on these custom-order products such as requiring operating cords to have a default length of 40% of the blind height [currently it is unlimited] and a default to a tilt wand instead of a tilt cord. The new safety standard also includes a change in warning tags to more graphically depict the strangulation hazard.

When will the new standard go into effect?

The effective date of the new standard is December 15, 2018.

Because they are voluntary standards, does that mean compliance is not mandatory?

No. All companies who manufacture, distribute or sell window coverings in the U.S. must comply with the voluntary safety standards or face enforcement action by the CPSC and/or be open to legal action if non-compliant products are sold. Almost all consumer products have voluntary rather than mandatory safety standards. “Voluntary” simply signifies that industry worked cooperatively with the CPSC, safety experts, and others under the auspices of ANSI to develop the standard.

What products are covered under the new standard?

The standard applies to all types of window coverings sold or manufactured in the U.S. by all participants in the window coverings industry. How did the process for updating the safety standard work? The revised standard was updated in strict accordance with the internationally-respected American National Standards Institute (ANSI) process. ANSI requirements mandate an open and balanced process with public review opportunities. The 18 month process required assembling a consensus body (the canvass group), submitting the draft standard to the canvass group for ballot and comment, addressing the comments received, re-balloting, a public review period and then finally achieving approval of the standard.

Will there be more updates to the standard?

Yes. WCMA is creating a task force this month to study what else can be done to further enhance safety on corded custom products.

What if I want to buy a cordless window covering now?

There are many cordless options available to consumers now and they are easily identifiable by the ‘Best for Kids’ label. Consumers today can look for the “Best for Kids” certification label to identify cordless window covering options. WCMA created the “Best for Kids” certification program in 2015 to make it easier for consumers shopping for window coverings to identify cordless products.

Most Complete Assortment of Stock Sizes Available

1" Wide Static Resistant, Fade Resistant PVC Slats

2-Year Warranty

Oversize Headrail on Blinds 69" Wide and Larger

Double Slat Valance and Hold Down Brackets Included With Every Blind

1" Vinyl Mini Blind

Our most cost-efficient window treatment solution. The attractive 1" Vinyl Mini Blind sets the standard for simplicity and functionality. Just like the leaves of the lotus flower, the easy to clean vinyl material naturally repels dust, water and grime.

Our 1" Vinyl Mini Blind can be easily adjusted for a custom fit so you don't have to maintain large, expensive inventories. Sizes 69" and wider ship standard with an oversized headrail offering added support. Pair this with a double-slat valance and you have the perfect mini blind for sensitive budgets.

AVAILABLE IN WHITE AND ALABASTER *All widths are 1/2" less than stated size to allow for inside mounting.*

Specifications

HEADRAIL

Extruded PVC 1.135" width x .935" height x .070" thick for widths up to 68". At 69" and wider the headrail measures 1.500" width x 1.500" height x .070" thick.

BOTTOMRAIL

Extruded hollow PVC 1.035" width x .450" height x .055" thick.

WAND

Extruded PVC Hex shape, .315" across flats. Color coordinated.

SLAT

Extruded PVC .0157" thick x .970" width with crown of .160". 75% opacity. Flammability testing passed NFPA 701 small scale test.

TAPE ROLLER SUPPORT

Injection molded plastic with metal roller minimizing cord fray.

TAPE ROLLER

Injection molded plastic with ladder locking legs.

TILT ROD

Plated steel, "O" shape .150" x .125"

CORDLOCK

Injection molded plastic. Smooth brass fixed roller. Knurled floating brass roller.

TILTER

Injection molded plastic housing with steel wand hook. Gear ratio of 9 to 1. Metal rivet for added strength.

BOTTOMRAIL ANCHORS

Injection molded plastic face .500" diameter, stem .375" diameter.

BOTTOMRAIL ENDCAPS

Injection molded plastic.

SLAT CLIP

Injection Molded Clear Plastic.

CORD

Woven polyester .070" diameter.

LADDER

Woven polyester .840" spacing x 1.000" width.

CENTER SUPPORT

Plated steel .040" thick.

HOLD DOWN BRACKETS

Injection molded plastic.

TASSEL

Injection molded plastic - bell shaped.

MOUNTING BRACKET

Color coordinated injection molded plastic. Suitable for inside or outside mount.

Headrail

Heavy duty tilter with metal rivet

Cordlock with brass roller

Bottomrail of extruded hollow PVC

Child-safe tassel & Safety warning tag

Contemporary 2" Designer Look

2-Year Warranty

Sturdy Steel Headrail

Matching Valance

2" Vinyl Plus Blind

The Lotus & Windoware 2" Vinyl Plus Blind is the choice for Contractors on a limited budget who want an attractive, designer look. Our 2" Vinyl Plus Blind is made with a durable metal headrail and comes with a 2" valance.

The static-resistant slats of the 2" Vinyl Plus Blind won't warp or crack. They also have great cut-down capabilities for a custom fit so you don't have to maintain large, expensive inventories. The design of our 2" Vinyl Plus Blind paired with the most durable materials makes this blind blossom in any décor.

2" Wood Grain Faux Wood Blind

We are excited to introduce the newest member of the 2" Faux Wood family - the instant classic, Wood Grain! With the same sturdy build as its predecessor, this blind brings an added stately profile with two sizes of return corners to seamlessly complete the mitered crown valance. And unlike real wood, these are easy to clean, making them perfect for any room or facility.

2" Embossed Faux Wood

You spoke and we listened – our beautiful 2" Faux Wood Blind is now available in Wood Grain finish! This solid blind is still as functional and sturdy as ever, but with a more natural look for cozier settings. With a smooth grain finish, the slats are still easy to clean making them perfect for high-traffic areas. Another affordable compliment to a wide array of settings.

AVAILABLE IN WHITE *All widths are ½" less than stated size to allow for inside mounting.*

30" Wand

Specifications

HEADRAIL

Headrail is made of roll formed steel 1-1/2" wide by 1-3/4" high with a minimum thickness of .024". Headrail matches color of slats.

CARRIERS

Injection molded PVC with eight - prong rotation system carriers have self-lubricating wheels for reduced friction. Carriers allow for 180 degree simultaneous rotation.

END CONTROL

Each end is equipped with an injection molded PVC idle end which supports the pinion rod.

PINION ROD

The pinion rod is an 8-prong system made of extruded aluminum. The pinion rod passes through each carrier and allows for simultaneous rotation.

WAND

30" wand.

VANES

Made of extruded, non-leaded rigid PVC. Vane thickness is .019" to .021". Vanes are 3-1/2" wide and are flame retardant.

STACK

Available in one way draw that will stack left or right.
