

PSHYDG5GALFAS Instructions

Features:

Stops running water instantly.

Very fast setting (90 seconds @ 70°F)

High strength patching material

Easy to use – just add water.

Surface Preparation:

- Enlarge crack or holes to a min. depth and width of 3/4”
- Clean area to be patched to remove all contaminants and loose material
- Dampen the substrate with clean water

Mixing & Application:

- Do not mix more than can be applied in 1 minute.
- Add clean water to Hydraulic Cement and mix to a putty-like consistency
- Apply firmly into opening with a trowel or gloved hand
- Keep patch damp for 15 - 30 minutes to cure

Storage:

- Keep container tightly sealed in a cool dry place
- Shelf life is 18 months from date of manufacture

Cautions:

- Use in accordance with material safety data sheet and technical bulletin available in your workplace
- A dust respirator is recommended when mixing this product
- Contains cement, lime and silica
- May cause eye, skin and respiratory tract irritation
