

DynAir's KWIKI line of bright, zinc-plated residential regulators is designed to allow easy installation onto any factory-made residential quality damper blade. The spring in the spring-loaded bearing will never bind or interfere with the blade. KB-1 (spring loaded bearing)

and KM-1T (threaded end bearing) will both perforate the metal with ease every time. And the special KWIKI handle can also be used on both ends by simply flipping it from one side to the other. Both ends are available with steel back-up washers and gaskets to resist leakage.

KWIKI SETS – UP TO 10" BY 10" DAMPER

Spring is locked out of the way for easy damper insertion.
