

Natural Gas Boilers
Efficiency: AFUE $\geq$ 90%
Qualifying Products List
January 18, 2013

HIGH EFFICIENCY BOILERS

General Requirements for High Efficiency Heating Boiler Rewards:

- Boilers must have an Input Capacity less than 300 MBTUH (Thousand British Thermal Units per hour).
- Boilers must have a modulating burner, and include an outdoor-air reset control (integrated or added to the system).
- Boilers must be a sealed combustion unit.
- Must be customer of participating natural gas utility and use natural gas for space heating. Boilers must be the primary heating source for the building or living space. Only natural gas boilers are eligible.
- Chimney liners must be installed where a high-efficiency gas boiler replaces an atmospherically-drafted boiler and only a water heater remains vented through the chimney. The interior opening left by the removed boiler must be closed with a metal cap and sealed with caulk or mortar.

Natural Gas Heating Boiler 90% AFUE:

- Boiler must have an AFUE of 90% or greater.

The following models have been verified as eligible for this reward by the Focus on Energy Program. Additional requirements apply. Please visit the program page for complete details and to verify eligibility.

Natural Gas Boilers
