

True Blue's integrated locking features reduce the amount of tools needed for installation which reduces frustration and time.

#### **FEATURES AND BENEFITS**

- Press-in trim veneer for designer finishes installs simply with overflow test plug. Eliminates the need for additional tools or sealants.
- Screw-less face plate is engineered for a high flow rate and multiple tub thicknesses. Installed with a clockwise turn, the symmetrical design eliminates the need for perfect alignment.
- Reusable test plugs install with a 1/4 turn and are approved for testing up to 40ft of head. Makes testing fast and reliable.
- Foamed rubber overflow gasket provides better compression and memory, creating a better and more reliable seal to prevent leaks.
- Locking drain gasket is designed with a softer durometer and will not fall off at tricky angles. Reduces installation frustrations while creating a better seal.
- Pre-assembled components make installation quicker, so you can go from box to test faster.

Available in full, half, rough or trim kits with options for ABS or PVC and Touch Toe, Uni-Lift or Push N' Pull.
