Adjustable / Removable Handle

Available on
Gate Wrenches
Rod Wrenches
Curb Wrenches
(See Price List)

Handle can be adjusted for more Torque or when more room is needed .

Advantages of Removable Handle Wrenches

Ease of handling , and packaging for shipping , less shipping costs, storage capability, utilization of handle position, and versatility of end components on some keys, such as the (# 10036RHC thru #10039RHC series) Slide Handle Service Box Wrenches with Combo ends and removable handles.

Advantages of Removable Handle Wrenches

Ease of handling , and packaging for shipping , less shipping costs, storage capability, utilization of handle position, and versatility of end components on some keys, such as the (# 10036RHC thru #10039RHC series) Slide Handle SB Wrenches with Combo ends and removable handles. These keys utilize the use of a combo 2 hole and pentagon end to eliminate the use of 2 separate keys. Some towns and cities have both 2- hole and pentagon lids in service , on their curb boxes.

These keys can also have an optional plug cover holder(# 999) to hold the plug cover from turning when removing the pentagon stud . Simply remove the handle and slide the #999 assembly onto the shaft and your ready to go.

3" MAX Adjustment

About the Product

Heavy duty pipe support stands for horizontal piping. Our supports feature 193 GR.B7 stems that are fully adjustable and can be locked in place after adjustment. Heavy floor base plates w/ 4- 1/2" holes for mounting to floor. All components are fully welded carbon steel construction. Materials comply to American National Standard ANSI/MSS SP-58.

Support stand pipe is 2 1/2" schedule 40 steel pipe. Liners for Steel & PVC pipe should be used. These can be supplied upon request. Our supports have locking set screws on top & bottom assemblies to lock and hold the stand pipe after adjustment.

All stands have a minimum clearance of 10" from the ground to the bottom of the pipe.

Deduct 4" for support pipe. Example a 12" stand needs an 8" piece of 2-1/2" schedule 40 pipe, a 16" stand needs a 12" piece.

Product Number		Description
