Vacuum breaker to be certified to the A.S.S.E. Standard 1011 and listed by I.A.P.M.O.

MHY-90 Series wall faucet

MHY-90 Series wall faucet dimensions

Function: MIFAB'S MHY-90 Series of anti-contamination wall faucet is engineered for use in mild climate areas on residential, commercial, industrial, and institutional properties. It is manufactured and shipped with an anti-siphon vacuum breaker.

Exterior Finish: Three different finishes are available. They are: brass, polished chrome and/or chrome plated brass casting.

Operating Handle: Four different types of operating handles are available. They are: brown plastic wheel handle, clear plastic wheel handle, cast iron wheel handle and/or an operating key. The square brass stud that receives the screw to secure the four different types of operating handles is shielded for tamper proofing. This is applicable when the hydrant is used with an operating key.

Vacuum Breaker: Unique vandal resistant vacuum breaker protects from anti-siphon conditions. It is self draining and is engineered with fine male threads on the end that screws into the faucet body to ensure that the vacuum breaker must be in place in order for a hose connection to be secured to the faucet. The hose connection is 3/4" (19) male. The anti-siphon vacuum breaker is tested and certified to the A.S.S.E. Standard 1011 and listed by I.A.P.M.O.

Connection: Either 1/2" (13) or 3/4" (19) F.P.T. (female pipe thread connections). Only N.P.T. (tapered) threads can be used to connect the MHY-90 to the supply line. Do not use N.P.S.M. (straight) threads.

Shipping Weight: One lb. (.45 kg) per unit. Master box quantities is 24 pieces per box.

Model Selection: See page H9.
