## ECS-2 ${ }^{\circledR}$ Double Net Straw Rolled Erosion Control Product

## Description:

The ECS $-2^{\circledR}$ is made with uniformly distributed $100 \%$ agricultural straw and two polypropylene nets securely sewn together with degradable thread. The tightly compressed blankets are wrapped and include a product label, code and installation guide. The blankets are palletized for easy transportation.
The ECS- $2^{\circledR}$ has functional longevity of approximately 12 months, but will vary depending on soil and climatic conditions, and is suitable for slopes $2: 1$ or less and low to medium flow channels. The ECS $-2^{\circledR}$ meets Type 2.D specification requirements established by the Erosion Control Technology Council (ECTC) and Federal Highway Administration's (FHWA) FP-03 Section 713.17.
