920 FG

920 FG

NOTE: Filter grilles are manufactured 3/16" undersized nominal duct outside dimension for ease of installation. Air filter should be 1/4" to 1/2" undersize. Verify with air filter manufacturer for air filter specification.

Shoemaker filter grilles allow for installation of larger thickness filters which can reduce pressure drop on the overall system, improving air flow through the heat exchanger and allowing more time between filter changes.
