## Type B Gas Vent Systems Give You These Important Advantages

Safety of the Hart \& Cooley ${ }^{\circledR}$ system is assured by the double-wall, air-insulated design and locking joints. Properly installed, the vent cannot come apart through vibration, and offers protection against vent failure or fire hazard. Type B Gas Vent is designed for negative pressure applications and flue gas temperatures not exceeding $550^{\circ} \mathrm{F}$ for Category I

Durability is the result of high-quality materials and workmanship, with galvanized outer pipe and aluminum inner pipe providing protection against corrosion and external damage.

Simple installation is achieved with a complete line of adjustable fittings and various lengths of pipe. Curled ends lock together for stability and easy assembly. A full set of installation instructions are supplied with all caps and supports.

3 " to 12" inner and outer pipe curled together as an integral unit.

TYPE BW (recessed heater)
Four-inch oval vent (when installed in $2 \times 4$ stud wall with recessed heater) requires clearances as determined by use of 4OBPWS hold-down plate, 4OCP ceiling plate spacers, and 4OFS firestop spacers.

TYPE B 2x4
Type B
Type B-2x4

Four- and five-inch oval vent (when installed in $2 \times 4$ stud wall, not using a recessed heater) requires clearance as determined by use of 4OFS or 5OFS firestop spacers at each ceiling level.
