

### GLOVES

#### Product Features

**GRAIN:** Grain leather is the smooth external side of the hide.

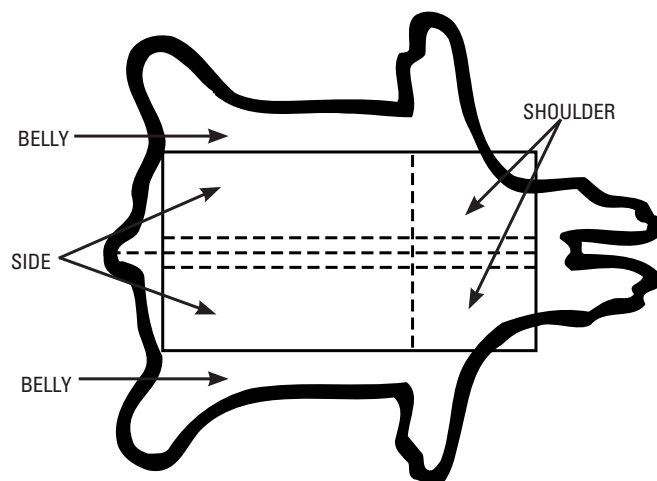

This type of leather provides durability and dexterity.

**SPLIT:** Split leather is the rougher internal side of the hide. The different types of split are side, shoulder and belly split.

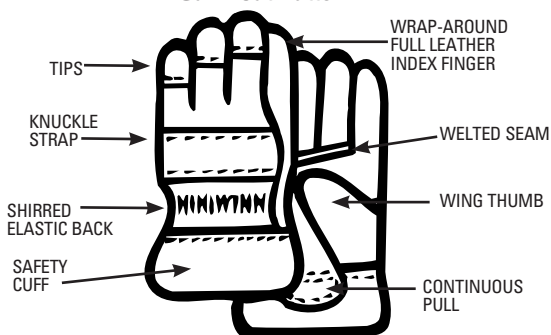

**Side Split:** Side split leather comes from the rib area of the animal. This part of the leather is the most durable and provides the greatest protection because of its greater density of fibers.

**Shoulder Split:** Shoulder split leather is more economical than side, but less durable. The additional movement of the animal in the shoulder area creates fewer fibers and a more visible texture difference.

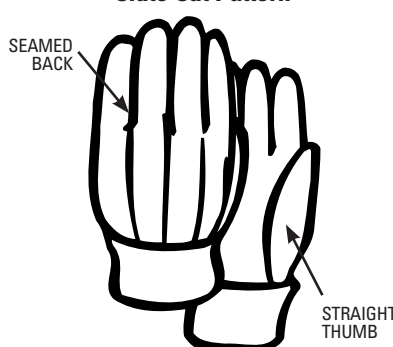

**Belly Split:** Belly split leather is the most economical; however, it has the least consistency in texture and appearance.

**Gunn Cut Pattern**

**Clute Cut Pattern**

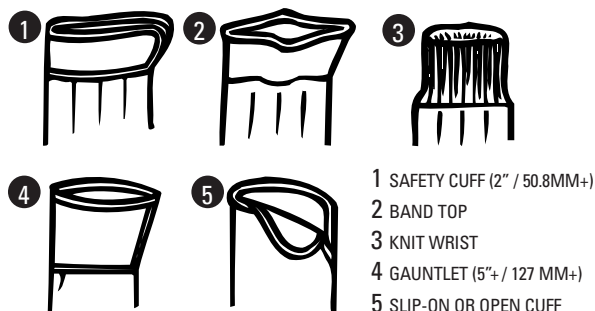

**Reversible Pattern**

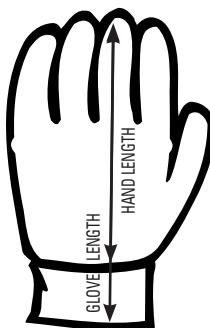

#### Disposable Gloves - PS3275L

- 100% Nitrile
- Industrial Grade
- Lightly Powdered
- Does not contain any natural rubber proteins
- 100 per box
- .09 MM / .035" thick

#### Cuff Styles

#### How to Size

#### What size do you need?

Measure from base of palm/wrist to top of the middle finger. This measurement in inches is your Hand Size.

The Measurement from the end of the glove cuff to top of the middle finger is the Glove Length.

Hand Size	Hand Length	Glove Length
6 or XS	6.30" / 160mm	8.74" / 222mm
7 or S	6.73" / 171mm	9.06" / 230mm
8 or M	7.17" / 182mm	9.45" / 240mm
9 or L	7.56" / 192mm	9.84" / 250mm
10 or XL	8.03" / 204mm	10.24" / 260mm
11 or XXL	8.46" / 215mm	10.63" / 270mm
