

Whole House City water filter F-300R

The F-300R whole house filter system provides healthier water throughout your home at the best price — satisfaction guaranteed.

Aquasana's unique whole house filter distributes clean water throughout the entire home. Get healthy, great tasting drinking water from every tap — from the kitchen to the bathroom sink. Experience clean and filtered water for drinking, cooking, bathing and showering.

Our unique three-stage filtration process reduces >97% of the chlorine in your water — all for a low price. It will also reduce other organic compounds, like herbicides and pesticides, in your water.

The system is easy to install with the help of a licensed plumber and requires no electricity or backflushing. System maintenance is easy with filter replacements needed every 300,000 gallons (about three years for the average three- to four-bathroom household), and most people can do it without plumber's assistance.

Choose an Aquasana whole house filter and rest easy knowing you that you made the smartest decision about the water in your home.

Made in the USA.

Pure Satisfaction

All Aquasana products offer a 90-day 100% satisfaction guarantee. (This system includes a three-year warranty, which covers defects in materials and workmanship.) If for any reason you are not satisfied with your purchase, contact the dealer you purchased from for a full refund (upon return of the product.)

This filter system is designed and tested for use with genuine Aquasana parts, including replacement filters and all hardware. Use of parts from other manufacturers may result in loss of contaminant reduction performance, system damage or failure. Use of parts from other manufacturers will also void your warranty. Contact your Ferguson store for replacement parts. This unit must be installed by a licensed plumber to validate the warranty.
