

BrassCraft®

Tankless Water Heater Kits

ALL-IN-ONE

Now available in  **Compliant**

Tankless Water Heater Service Valves

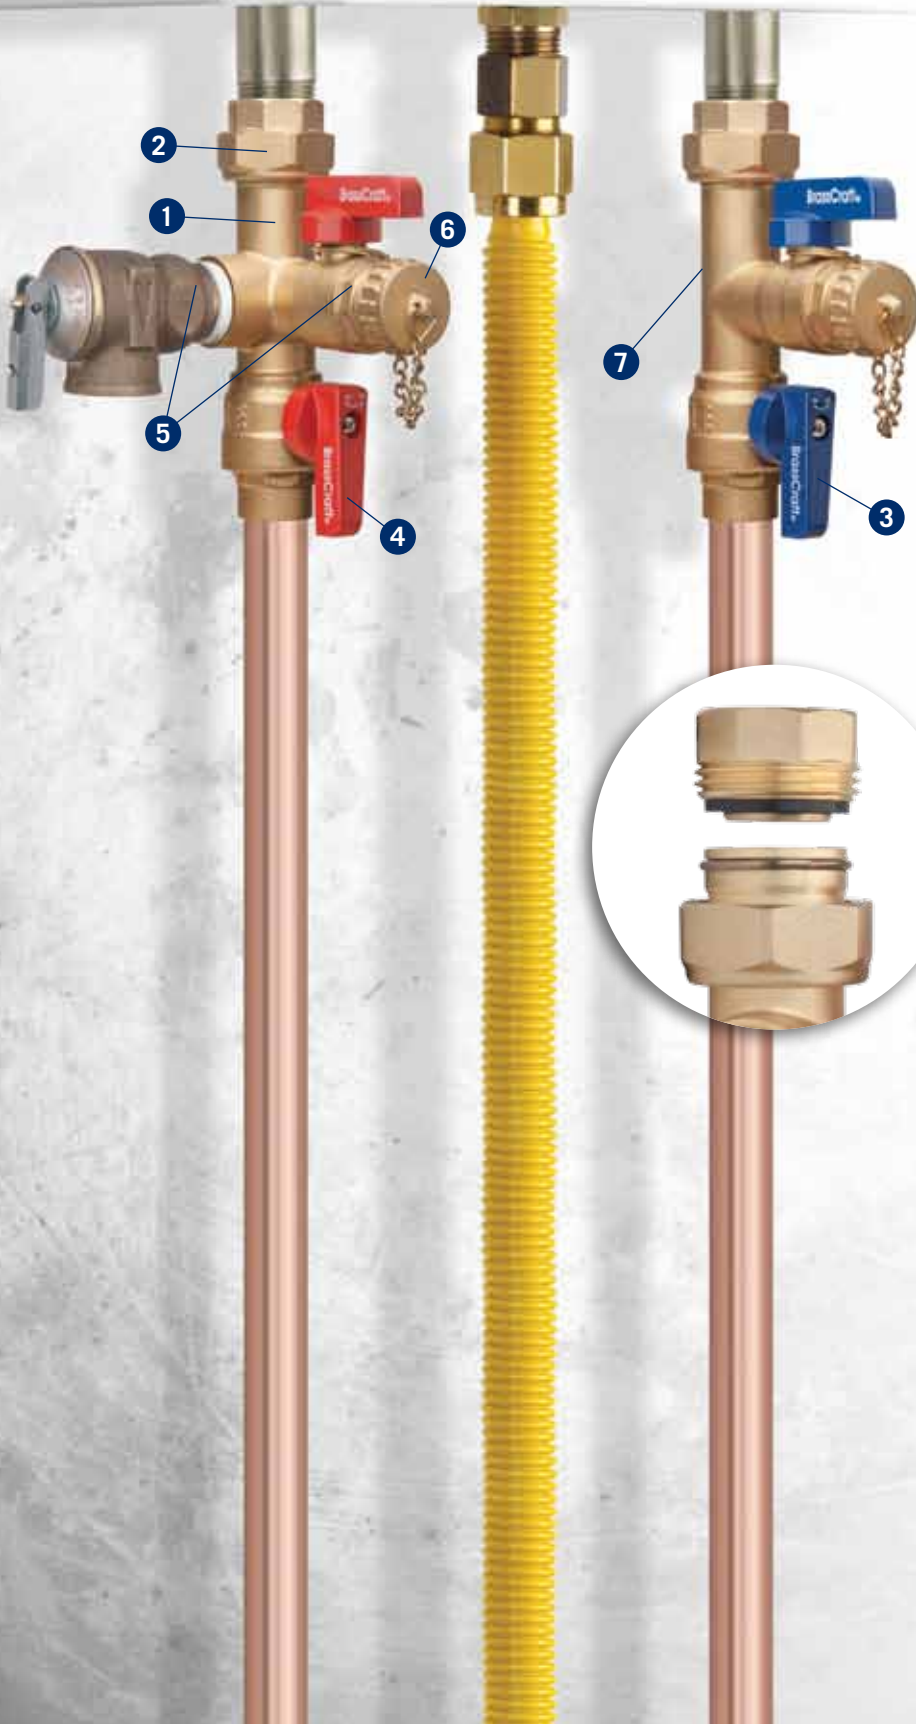

Slim. Sleek. And simply smart.

BrassCraft® tankless water heater service valves offer a full array of installation essentials including:

1 NEW! COMPACT VALVE BODY:
Slim-fit design provides an aesthetically appealing finished look—ideal for tight installations.

2 NEW! CAPTIVE NUT & WASHER:
Retaining ring and lip ensure the nut and washer remain intact, eliminating the potential for misplacing these crucial components during installation. Equally important, the captive washer won't misalign or kink—providing a hassle-free seal.

3 COLOR-CODED HANDLES:
For quick system identification.

Compact design ideal for cover and recessed box installations

NEW! PACKAGING: *Significantly smaller and conveniently sized to reduce jobsite waste*

All-In-One Installation Kits

BrassCraft Manufacturing has been helping plumbers for over 65 years. So we know a thing or two about making installation jobs quick and easy. That's what our all-in-one Tankless Water Heater Kits are all about. We put the components required for a professional looking, professional lasting installation into one convenient package—a package that also features a number of important benefits, including:

- A compact valve design makes installation easy—especially in areas with limited space
- A gas connector with the exclusive Pro-Coat® corrosion resistant coating for added protection from harmful chemicals that could degrade the connector and generate pinhole leaks
- A premium, Italian-made full-port gas ball valve
- IAPMO Certified. NSF 61 Approved (Service Valves)
- CSA Certified (Gas Connector, PRV and Gas Ball Valves)

With everything you need in one compact box—including the gas connector—our Tankless Water Heater Kits are convenient, easy to install and now compliant! It's what you've come to expect from the brand professionals worldwide trust for high quality plumbing solutions.

4 RIGHT-SIZED HANDLES, RIGHT-SIDE PLACEMENT:

Front-aligned, ergonomic design enables trouble-free valve positioning in tight spaces. Handles remain accessible during installation and maintenance—even when a cover box is involved.

5 INTEGRATED PR VALVE PORT & DRAIN VALVE:

Full system integration reduces the number of required connections, making installation quick and easy. Additionally, independent flow control on the drain valve provides efficient system maintenance and repair.

6 BRASS CAP WITH CHAIN:

Brass cap withstands higher temperatures than plastic, ensuring higher level of safety with a reduced risk of melting during sweat installation.

7 FULL PORT DESIGN:

Full-flow forged brass body eliminates potential for pinhole leaks.

Our Commitment to Compliance

As an industry leader, BrassCraft Manufacturing is continuously developing solutions for the ever-changing plumbing industry. In 2009, we met California's low-lead requirements as one of the first manufacturers to introduce a compliant line of products. Today, we proudly offer a full range of high quality compliant products nationwide including brass stops, solid brass fittings, water heater connectors, and Speedi Plumb® risers for your plumbing needs.

Why the move to low lead plumbing fixtures?

Low lead legislation requires the virtual elimination of the lead content of pipes, pipe fittings or plumbing fittings and fixtures intended to convey or dispense water for drinking or cooking. The laws prohibit the sale of plumbing fixtures with a wetted surface area containing more than a weighted average of .25% lead. Effective January 4, 2014, these same low lead standards will apply throughout the United States, pursuant to federal legislation. As 2014 approaches, continue to check our website for updates and information.

Tankless Water Heater Kits. Completely Inclusive. Altogether Innovative.

For over 65 years, plumbing professionals worldwide have trusted BrassCraft Manufacturing to deliver high quality products and customer service that consistently exceed the needs of the ever-changing plumbing industry. Our strength in product innovations and product line diversity is showcased in the full line of BrassCraft® Tankless Water Heater Installation Kits.

Designed to make quick work of virtually any installation, BrassCraft® Tankless Water Heater Kits incorporate dynamic innovations for both water and gas connections. From the fully integrated service valves to the corrosion resistant, full flow gas connectors, BrassCraft® Tankless Water Heater Kits

provide fast, no-hassle

installations with a clean, professional appearance.
