## GFDL110EH

# GE® 7.0 Cu. Ft. Capacity Electric Dryer with 200 ft. long-venting

### Dimensions and Installation Information (in inches)

Electric Dryer Rating		
240V	5600W, 24A, 60Hz	
208V	4400W, 22A, 60Hz	

**Exhaust Options:** 4-way via rear, right, left and bottom.

**Circuit Requirements:** An individual, properly grounded branch circuit, protected by a 30-amp circuit breaker or a time-delay fuse, is required.

**Note:** Dryer wall outlet must be located within 36" of service cord entry and accessible when dryer is mounted in position.

**Installation Information:** For complete information, see installation instructions packed with your dryer.

For answers to your Monogram,® GE Profile™ or GE® appliance questions, visit our website at geappliances.com or call GE Answer Center® service, 800.626.2000.

## GFDL110EH

# GE® 7.0 Cu. Ft. Capacity Electric Dryer with 200 ft. long-venting

### **Special Installation Requirements:**

### Stacked Installation:

• Brackets for stacking dryer over washer are not included with the dryer. GEFLSTACK or part no. WE25X10018.

### Alcove or Closet Installation:

- If your dryer is approved for installation in an alcove or closet, it will be stated on a label on the dryer back.
- The dryer MUST be exhausted to the outside.
- Minimum clearances between dryer cabinet and adjacent walls or other surfaces are: 0" either side, 3" front and rear.
- Minimum vertical space from floor to overhead cabinets, ceilings, etc. is 52".
- Closet doors must be louvered or otherwise ventilated and must contain a minimum of 60 sq. in. of open area equally distributed. If this closet contains both a washer and a dryer, doors must contain a minimum of 120 sq. in. of open area equally distributed.
- No other fuel-burning appliance shall be installed in the same closet with a gas dryer.

### Bathroom or Bedroom Installation:

- The dryer MUST be exhausted to the outdoors.
- The installation must conform with the local codes, or in the absence of local codes, with the National Electric Code and National Fuel Gas Code, ANSI Z223 for gas dryers.

### Minimum Clearance other than Alcove or Closet Installations:

• Minimum clearances to combustible surfaces 0" both sides. 3" rear.

# For more information on venting kits and accessories, please call 1-800-GE-CARES.

For answers to your Monogram,® GE Profile™ or GE® appliance questions, visit our website at geappliances.com or call GE Answer Center® service, 800.626.2000.

### Stacked Dimensions (in inches)

### Pedestal Dimensions (in inches) SBSD137HWW - white

This optional 13" pedestal raises the door opening and height of the washer or dryer. Feet on 13" pedestal allow it to adjust to 13-3/8" height.

Above illustrations intended for dimensional reference only. Refer to photography for actual product appearance.

# GFDL110EH GE® 7.0 Cu. Ft. Capacity Electric Dryer with 200 ft. long-venting

### **Dryer Exhausting Information – Metal Duct Only**

For complete information, see installation instructions packed with your dryer.

**Ducting Materials:** For best performance, this dryer should be vented with 4" diameter all rigid metal exhaust duct. If rigid metal duct cannot be used, then UL-listed flexible metal (semi-rigid) ducting can be used (Kit WX08X10077). In special installations, it may be necessary to connect the dryer to the house vent using a flexible metal (foil-type) duct. A UL-listed flexible metal (foil-type) duct may be used ONLY in installations where rigid metal or flexible metal (semi-rigid) ducting cannot be used AND where a 4" diameter can be maintained throughout the entire length of the transition duct. Please see installation instruction packed with your dryer for complete instructions when using flexible metal (foil type) ducting.

### **Exhaust Length Calculation:**

- 1. Determine the number of 90° turns needed for your installation. If you exhaust to the side or bottom of dryer, add one turn.
- 2. The maximum length of 4' rigid (aluminum or galvanized) duct which can be tolerated is shown in the table.

A turn of 45° or less may be ignored. Two 45° turns within the duct length should be treated as a 90° elbow.

A turn over 45° should be treated as a 90° elbow.

Dryers **must** be exhausted to the outside.

**Caution:** For personal safety do not terminate exhaust into a chimney, under any enclosed house floor (crawl space), or into an attic, since the accumulated lint could create a fire hazard or moisture could cause damage. Never terminate the exhaust into a common duct or plenum with a kitchen exhaust, since the combination of lint and grease could create a fire hazard.

Exhaust ducts should be terminated in a dampered wall cap to prevent back drafts, bird nesting, etc. The wall cap must also be located at least 12" above the ground or any other obstruction with the opening pointed down.

For more information on venting kits and accessories, please call 1-800-GE-CARES.

For every extra 90° elbow, reduce the allowable vent system length by 10 ft. Two 45° elbows will be treated like one 90° elbow.

For the side exhaust installations, add one 90° elbow to the chart.

The total vent system length includes all the straight portions and elbows of the system (transition duct included).

Laundry Center length includes factory-installed elbow that does not impact vent length.

### GFDL110EH

# GE® 7.0 Cu. Ft. Capacity Electric Dryer with 200 ft. long-venting

### **Features and Benefits**

- Dura Drum provides long-lasting dependability
- HE SensorDry™ with dual thermistors continually monitors moisture and temperature to prevent clothing wear and tear due to over-drying and inconsistent heat
- Speed Dry quickly dries items and small loads for families on the go
- eDry option—energy saving option reduces dry temperatures on select cycles without sacrificing performance
- 4 heat settings provide the right temperature for the right drying needs
- 6 dry cycles—additional cycles for your clothes-drying needs
- 200 ft. long-venting capability Provides flexible installation
- Model GFDL110EHWW White
