Vacuum Breaker Trap Primer

**“TP” VARIATION**

**Description**
VB-72-A Vacuum Breaker Trap Primer. The Sloan® VB-72-A Vacuum Breaker Trap Primer provides for a constant water seal in floor drains. Maintaining a trap seal prevents objectionable sewer gases from escaping into the air. Each time the Sloan® Flushometer is activated, a small amount of water is diverted to the floor drain (piping from Trap Primer to floor drain not supplied by Sloan). The VB-72-A uses a patented Water Deflector that carefully regulates the amount of water diverted to the drain. This makes the VB-72-A specially suited for use with 1.28 gpf (4.8 Lpf) High Efficiency, 1.6 gpf (6.0 Lpf) Low Consumption and 3.5 gpf (13.2 Lpf) Water Saver Flushometers.

**Models**
- VB-72-A1 Supplied with Royal® Flushometers
- VB-72-A2 Supplied with Regal®, Gem® and Naval® Flushometers

**Specifications**
Vacuum Breaker Trap Primer for use with exposed Flushometers. The VB-72-A1 and VB-72-A2 Trap Primers include:
- One Piece, Chrome Plated Flush Connection
- Water Deflector to control the amount of water diverted from the flush
- 3/8” Elbow and Flex-bend Tube connection from Vacuum Breaker to wall
- Diverter Wall Flange and Fittings
- Chrome Plated Wall Flange and Fitting to connect ½” NPT pipe

The VB-72-A1 Trap Primer also includes:
- High Back Pressure Vacuum Breaker
- One-piece Bottom Hex Coupling Nut

The VB-72-A can be supplied with the following Flushometer Models:

<table>

† Check with local codes for approval to use VB-72-A1 Trap Primer with Model Numbers 110 and 111 Flushometers. Some codes require a minimum distance of 6” (153 mm) between the Critical Line of the Vacuum Breaker and the Trap Primer and the Trap Primer Outlet. In these cases specify the Model Numbers 113, 115 or 116.

When ordering a Sloan Flushometer with a Trap Primer, please specify the “TP” Variation; e.g., Model Number 110 TP.
